## Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q115-Q120):

### NEW QUESTION # 115

You have configured the below commands on a FortiGate.

```
config system settings
set strict-src-check enable
end

Config system interface
edit port1
set src-check disable
next
end
```

What would be the impact of this configuration on FortiGate?

- A. FortiGate will enable strict RPF on all its interfaces and port1 will be enable for asymmetric routing.
- B. Port1 will be enabled with flexible RPF, and all other interfaces will be enabled for strict RPF
- C. FortiGate will enable strict RPF on all its interfaces and port1 will be exempted from RPF checks.**
- D. The global configuration will take precedence and FortiGate will enable strict RPF on all interfaces.

**Answer: C**

Explanation:

The global setting enables strict source checking (RPF) on all interfaces by default. The per-interface setting disables the source check on port1, exempting it from strict RPF enforcement.

### NEW QUESTION # 116

Refer to the exhibit. Why did the FortiGate device drop the packet?

Time	Message
Packet Trace #1 14	
06:39:29	vd-root:0 received a packet(proto=1, 10.0.11.50:3->100.65.0.254:2048) tun_id=0.0.0.0 from port4, type=8, code=0, id=3, seq=168.

06:39:29	after iprope_captive_check(): is_captive-0, ret-matched, act-drop, idx-0
06:39:29	Denied by forward policy check (policy 0)

- A. It failed the RPF check.
- B. It cannot reach the next-hop IP.
- C. It matched an explicitly configured firewall policy with the action DENY.
- D. It matched the default implicit firewall policy.

**Answer: C**

Explanation:

The packet trace shows policy-0 is matched, act-drop and Denied by forward policy check (policy 0). This means the packet matched an explicitly configured firewall policy (policy ID 0 in this case) whose action is set to DENY, and the traffic was dropped accordingly.

06:39:29	Denied by forward policy check (policy 0)

Why did the FortiGate device drop the packet?

- A. It matched the default implicit firewall policy.
- B. It matched an explicitly configured firewall policy with the action DENY.
- C. It failed the RPF check.

**Answer: A**

#### NEW QUESTION # 118

Refer to the exhibit.

Edit SSL/SSH Inspection Profile

Protecting SSL Server

Inspection method: SSL Certificate Inspection

CA certificate: Fortinet CA\_SSL

Blocked certificates: Block

Untrusted SSL certificates: Block

Server certificate SNI check: Strict

What would be the impact of these settings on the Server certificate SNI check configuration on FortiGate?

- A. FortiGate will close the connection if the SNI does not match the CN and SAN fields.
- B. FortiGate will accept the connection with a warning if the SNI does not match the CN or SAN fields.
- C. FortiGate will accept and use the CN in the server certificate for URL filtering if the SNI does not match the CN or SAN fields.
- D. FortiGate will close the connection if the SNI does not match the CN or SAN fields.

**Answer: A**

#### Explanation:

With the Server certificate SNI check set to Strict, FortiGate enforces that the SNI must match either the Common Name (CN) or Subject Alternative Name (SAN) in the server certificate; otherwise, it closes the connection.

#### NEW QUESTION # 119

Refer to the exhibit. The NOC team connects to the FortiGate GUI with the NOC\_Access admin profile. They request that their GUI sessions do not disconnect too early during inactivity. What must the administrator configure to answer this specific request from the NOC team?

- A. Increase the `admintimeout` value under config system accprofile `NOC_Access`.
- B. Ensure that all `NOC_Access` users are assigned the `super_admin` role to guarantee access
- C. Increase the offline value of the Override Idle Timeout parameter in the `NOC_Access` admin profile.
- D. Move `NOC_Access` to the top of the list to ensure all profile settings take effect.

#### Answer: A

#### Explanation:

The `admintimeout` setting in the admin access profile controls the inactivity timeout for GUI sessions. Increasing this value will extend the session duration before automatic disconnection.
