Our website provides the most up to date and accurate SolarWinds SCP-NPM learning materials which are the best for clearing SCP-NPM real exam. It is best choice to accelerate your career as a professional in the information technology industry. We are proud of our reputation of helping people clear [SCP-NPM Actual Test](#) in your first attempt. Our pass rate reached almost 86% in recent years.

After cracking the SolarWinds Network Performance Monitor (NPM) Exam (SCP-NPM) exam you will receive the credential badge. It will pave your way toward well-paying jobs or promotions in any reputed tech company. At Exam4PDF have customizable SolarWinds SCP-NPM practice exams for the students to review and improve their preparation. The SolarWinds [SCP-NPM Practice Test](#) material product of Exam4PDF are created by experts with the dedication to help customers crack the SolarWinds SCP-NPM exam on the first attempt.

Exam4PDF SolarWinds SCP-NPM exam practice questions and answers

On the one hand, the software version can simulate the real examination for you and you can download our study materials on more than one computer with the software version of our study materials. On the other hand, you can finish practicing all the contents in our SCP-NPM practice materials within 20 to 30 hours. What's more, during the whole year after purchasing, you will get the latest version of our study materials for free. You can see it is clear that there are only benefits for you to buy our [SCP-NPM](#) learning guide, so why not just have a try right now?

There are a lot of experts and professors in our company. All SCP-NPM study torrent of our company are designed by these excellent experts and professors in different area. We can make sure that our SolarWinds SCP-NPM test torrent has a higher quality than other study materials. The aim of our design is to improving your learning and helping you gains your SolarWinds Network Performance Monitor (NPM) Exam SCP-NPM Certification in the shortest time. If you long to gain the certification, our SolarWinds Network Performance Monitor (NPM) Exam guide torrent will be your best choice.

SolarWinds SCP-NPM certification exam consists of 65 questions that cover a range of topics related to network monitoring and management, including installation and configuration of the SolarWinds NPM software, monitoring and troubleshooting network performance issues, and using the various features and tools available in the software. SCP-NPM exam is designed to test a candidate's knowledge and skills in using the SolarWinds NPM software to ensure that they are capable of effectively managing network performance in a variety of environments. Achieving this certification demonstrates a high level of proficiency in network management and can help IT professionals stand out in a competitive job market.

SolarWinds SCP-NPM Certification Exam is an industry-recognized certification for IT professionals who want to demonstrate their proficiency in managing and monitoring network performance using the SolarWinds Network Performance Monitor (NPM) tool. SolarWinds Network Performance Monitor (NPM) Exam certification exam is designed to test the knowledge and skills of IT

professionals who are responsible for managing complex networks and ensuring that they perform optimally.

SolarWinds - SCP-NPM - SolarWinds Network Performance Monitor (NPM) Exam –High-quality Pass4sure Dumps Pdf

In today's competitive industry, only the brightest and most qualified candidates are hired for high-paying positions. Obtaining SCP-NPM is a wonderful approach to be successful because it can draw in prospects and convince companies that you are the finest in your field. Pass the SCP-NPM Exam to establish your expertise in your field and receive certification. However, passing the SolarWinds Network Performance Monitor (NPM) Exam SCP-NPM exam is challenging.

IT professionals who pass the SolarWinds SCP-NPM Exam demonstrate a deep understanding of network performance monitoring concepts and best practices. They are skilled in using SolarWinds NPM to optimize network performance and ensure high availability of critical applications and services. SolarWinds Network Performance Monitor (NPM) Exam certification also validates their ability to troubleshoot complex network issues and provide effective solutions that meet the needs of their organization.

SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q50-Q55):

NEW QUESTION # 50

How do you assign users access to select reports?

- A. Create the reports while logged in as each user and set permissions
- B. Configure the report and add a Report Limitation. Assign the limitation to users who need access to the report
- C. Save the reports in different sub-directories and set the permissions for each user
- **D. Use custom properties and account limitations to control report access**

Answer: D

Explanation:

To assign users access to select reports, you can use custom properties and account limitations to restrict the scope of data that users can view and report on. Custom properties are user-defined fields that you can assign to monitored objects, such as nodes, interfaces, or applications. Account limitations are rules that you can apply to user accounts to filter the network data that users can access and view. By using custom properties and account limitations together, you can create granular and flexible report access for different users or groups. For example, you can create a custom property called Department and assign it to nodes that belong to different departments in your organization. Then, you can create an account limitation based on the Department custom property and assign it to users who only need to see and report on the nodes in their own department. References: How to create different Orion Support Users and assign them different properties in NPM, Define what users can access and do in the SolarWinds Platform

NEW QUESTION # 51

Users report that NPM performance is slow when managing devices through the Orion Web Console. You verify the SNMP trapping is responsible for the poor performance. How do you resolve this issue?

- A. Add an Additional Web Server to handle the load of users accessing the NPM Orion Web Console
- **B. Point the devices to a trap manager and filter unwanted messages before forwarding remaining traps to the Orion Platform**
- C. Reduce the number of days SNMP messages are kept in the SolarWinds Trap Viewer
- D. Add the devices as managed nodes to cut down on the trap messages received

Answer: B

Explanation:

SNMP traps are unsolicited messages sent by network devices to report events or issues. If NPM receives too many traps from devices that are not managed by NPM, or traps that are not relevant for monitoring, the performance of the Orion Web Console can be affected. To resolve this issue, you can point the devices to a trap manager, such as Kiwi Syslog Server, and configure it to filter out unwanted traps before forwarding the remaining ones to the Orion Platform. This way, NPM will only process the traps that are important for monitoring and alerting, and reduce the load on the database and web server. Reference: Configure SNMP traps in NPM, Filter traps in Kiwi Syslog Server, [Forward traps to another host in Kiwi Syslog Server]

NEW QUESTION # 52

You can make bulk changes, such as changing the polling method, to nodes.

- A. FALSE
- B. TRUE

Answer: B

Explanation:

You can make bulk changes to nodes in NPM using the Manage Nodes feature. This allows you to select multiple nodes and edit their properties, such as the polling method, the polling frequency, the SNMP credentials, the custom properties, and more. You can also use the Edit Nodes feature to assign or unassign pollers to nodes, such as the Universal Device Poller (UnDP), the Hardware Health Poller, the Wireless Poller, and more^{1,2}. Reference: 1: Change the polling method for a node³, 2: Manage pollers using Device Studio⁴

NEW QUESTION # 53

While building an Orion map in the NPM web console you notice that two of your devices do not show a connection between them. You verify the two devices are connected. How can you resolve this issue? (Choose all that apply.)

- A. Change the monitoring method from SNMP to CLI
- B. Build a custom connection between the devices
- C. Verify you are monitoring Layer 2 and 3 topologies
- D. Build a new Orion map and add the related entities instead of the nodes

Answer: B,C

NEW QUESTION # 54

You're troubleshooting a complex network issue and need to build a comparison of several metrics across multiple devices and SolarWinds products to identify the problem. What feature can you use?

- A. NetPath
- B. AppStack
- C. Network Insight
- D. PerfStack

Answer: D

Explanation:

PerfStack is a feature of the Orion Platform that allows you to compare and correlate performance data from multiple SolarWinds products and entities in a single view¹. You can drag and drop metrics from different sources, such as NPM, SAM, NCM, NTA, and more, and create custom dashboards that help you troubleshoot complex network issues². PerfStack can also show historical data and baselines for comparison³. References: 1: Network Performance Monitor Administrator Guide - Use PerfStack to troubleshoot issues 2: Network Performance Monitor Getting Started Guide - Troubleshoot your network with PerfStack 3: SolarWinds Certified Professional Program - Diagnostics and Troubleshooting Exam Study Guide - Use PerfStack to troubleshoot issues
