## Reliable C\_WME\_2506 Test Camp - New C\_WME\_2506 Test Tutorial

Even we have engaged in this area over ten years, professional experts never blunder in their handling of the C\_WME\_2506 exam torrents. By compiling our C\_WME\_2506 prepare torrents with meticulous attitude, the accuracy and proficiency of them is nearly perfect. As the leading elites in this area, our C\_WME\_2506 prepare torrents are in concord with syllabus of the exam. They are professional backup to this fraught exam. So by using our C\_WME\_2506 Exam torrents made by excellent experts, the learning process can be speeded up to one week. They have taken the different situation of customers into consideration and designed practical C\_WME\_2506 test braindumps for helping customers save time. As elites in this area they are far more proficient than normal practice materials' editors, you can trust them totally.

## SAP C\_WME\_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.</li> </ul>

## SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q45-Q50):

### NEW QUESTION # 45

When adding new users to an account on a platform, admins must select their permission levels. The company gets a lot of support tickets about users asking what each permission level means or asking to adjust permission levels because they were set up incorrectly. The company already has a help article that lists out all of the permission level definitions, but it isn't used often. Which of these options would be the best solution to create with WalkMe?

- A. Smart Walk-Thru navigating users to the help Resource
- B. ShoutOut every time admins begin adding a new user
- C. Launcher next to the field that activates a Resource
- D. Validation SmartTip

**Answer: C**

Explanation:

The issue is that admins frequently submit support tickets due to confusion about permission levels, despite an existing help article. The best WalkMe solution is a Launcher next to the field that activates a Resource, which links directly to the help article. This approach provides context-sensitive access to the documentation exactly where admins need it-near the permission level field-encouraging its use and reducing support tickets without disrupting the workflow.

The other options are less effective:

- \* ShoutOut every time admins add a user(A) is intrusive and not directly tied to the permission field.
- \* Validation SmartTip(B) is for enforcing input rules, not linking to help content.
- \* Smart Walk-Thru to the help Resource(C) is overly complex for simply accessing documentation.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.3: Launchers):

"Launchers placed next to form fields can activate Resources, such as help articles, providing instant access to relevant documentation to reduce user errors and support tickets." The course Getting Started with Building WalkMe Solutions states:

"For underutilized help content, place a Launcher near the relevant field to trigger a Resource, ensuring users access guidance in context to resolve confusion efficiently." Option D is the best solution to reduce support tickets by leveraging the existing help article.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.3: Launchers.

WalkMe Editor User Guide, "Using Launchers with Resources" Section.

Course: Getting Started with Building WalkMe Solutions, Module 11: Reducing Support Tickets.

### NEW QUESTION # 46

What is the function of WalkMe Discovery's License Optimization feature?

- A. To disable unused applications permanently
- B. To automatically renew software licenses without user intervention
- C. To increase the number of applications used in an organization
- D. To identify potential wasted spend on app licenses

**Answer: D**

#### NEW QUESTION # 47

The ShopMe team wants to put a Launcher on every product page. Example URLs of the product pages are as follows:

<http://shopme.walkme.com/product/taylor-swift-1989/>

<http://shopme.walkme.com/product/nicki-minaj-the-pinkprint/>

<http://shopme.walkme.com/product/beyonce-beyonce/>

How would they build the Current URL rule for when this should appear with best practices in mind?

- A. Current URL is like > walkme.com
- B. Current URL > contains > shopme.walkme.com
- **C. Current URL > contains > /product**
- D. Current URL > is like > shopme.walkme.com/product

**Answer: C**

#### NEW QUESTION # 48

You have a Smart Walk-Thru that begins on the home page, directs the user to a product page where there is a Subscribe button, and continues from there. If the user is already on a product page with a Subscribe button, you want the user to be able to start the Smart Walk-Thru from that page. However, since not all product pages have a Subscribe button, you don't want the user to be able to start the Smart Walk-Thru on those pages because the Smart Walk-Thru is specifically related to product subscriptions. The URL of the product pages starts with: [www.PetShop.com/product-page](http://www.PetShop.com/product-page). Following best practices, which rule(s) would you suggest to use as a Start Point?

- A. Element On Screen -> is visible
- B. Current URL -> is exactly -> [www.PetShop.com/product-page](http://www.PetShop.com/product-page)
- **C. Current URL -> Contains -> /product-page AND Element on screen -> Is Visible**
- D. Current URL -> Contains -> /product-page/mixed-bird-seeds OR Element on screen -> is Visible

**Answer: C**

Explanation:

To ensure the Smart Walk-Thru starts only on product pages with a Subscribe button, the Start Point must combine URL and element conditions. The rule Current URL -> Contains -> /product-page AND Element on screen -> Is Visible targets pages with "/product-page" in the URL (covering all product pages) and checks for the Subscribe button's visibility. This ensures the Smart Walk-Thru is available only on relevant pages, following best practices for precise and reliable Start Points.

The other options are incorrect:

- \* Element On Screen -> is visible (A) is too broad, applying to any page with the element.
- \* Current URL -> is exactly -> [www.PetShop.com/product-page](http://www.PetShop.com/product-page) (C) is too restrictive, missing subpaths.
- \* Current URL -> Contains -> /product-page/mixed-bird-seeds OR Element on screen -> is Visible (D) is too specific to one product and uses OR logic, allowing starts on non-relevant pages.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.2: Smart Walk-Thrus):

"For Start Points, combine URL rules (e.g., 'Current URL contains /product-page') with element visibility checks (e.g., 'Element on screen is visible') to ensure Smart Walk-Thrus start only on relevant pages." The course Getting Started with Building WalkMe Solutions states:

"Use AND logic in Start Points, like URL contains and element visibility, to restrict Smart Walk-Thru initiation to pages meeting all criteria, ensuring relevance." Option B is the best Start Point rule.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.2: Smart Walk-Thrus.

WalkMe Editor User Guide, "Configuring Start Points" Section.

Course: Getting Started with Building WalkMe Solutions, Module 6: Smart Walk-Thru Configurations.

#### NEW QUESTION # 49

You and your Project Lead just had a conversation with a business stakeholder who wants you to create WalkMe content for their team. They provided you with all of the following information: Sales team members are constantly rushing through entering contract

details in your sales platform, which adds to inaccurate data for the business. Once they get to the contract page, there are many fields to fill out that are unique to each client. They often don't remember which is the correct option from a number of dropdown fields, and the company doesn't currently have any documentation that explains the dropdown fields. What is the end user behavior (pain point) you need to address with WalkMe content?

- A. Sales team members are rushing through entering contract details
- B. No help documentation currently exists
- **C. Users do not know which is the correct option in the dropdown fields**
- D. The business has inaccurate data

**Answer: C**

Explanation:

The end user behavior (pain point) to address is that users do not know which is the correct option in the dropdown fields. This specific behavior directly causes the inaccurate data, as sales team members are selecting incorrect options due to a lack of guidance. WalkMe content, such as Guidance SmartTips, can provide real-time instructions for each dropdown field to ensure correct selections, addressing the root cause of the issue.

The other options are related but not the primary pain point:

- \* Inaccurate data(A) is the outcome, not the behavior.
- \* No help documentation(B) is a contributing factor, not the user's action.
- \* Rushing through details(C) is a secondary behavior, but the core issue is incorrect dropdown selections.

Extract from Official WalkMe Documentation:

Per the SAP WalkMe Digital Adoption Consultant Study Guide (Section 1.3: Identifying Pain Points):

"Identify the specific end user behavior causing issues, such as selecting incorrect options in dropdowns, to target WalkMe content effectively, like SmartTips for field guidance." The course Getting Started with Building WalkMe Solutions explains:

"Focus on the user behavior driving the problem, such as confusion over dropdown options, to design WalkMe solutions that provide clarity and improve accuracy." Option D is the end user pain point to address.
