The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q54-Q59):

NEW QUESTION # 54

In which part of a business scenario are business capabilities and value streams modeled?

- A. When identifying and documenting desired outcomes
- B. When identifying the business and technology environment
- C. When identifying the human actors
- D. When identifying, documenting and ranking the problem

Answer: B

Explanation:

In a business scenario, business capabilities and value streams are modeled when identifying the business and technology environment. Here's a detailed explanation:

* Business Scenarios in TOGAF:

* Business scenarios are used to capture and describe the business requirements, providing a context for the architecture development. They help in understanding the business environment, identifying problems, and defining desired outcomes.

* Identifying the Business and Technology Environment:

* Business Capabilities: During this phase, the architect identifies the key business capabilities required to achieve the business objectives. These capabilities represent what the organization needs to be able to do.

* Value Streams: Value streams are also identified and modeled to understand how value is delivered to customers and stakeholders. They provide a high-level view of the end-to-end processes that create value.

* TOGAF ADM References:

* Phase A: Architecture Vision: In this phase, understanding the business and technology environment is crucial for defining the architecture vision. Modeling business capabilities and value streams provides a foundation for this understanding.

* Phase B: Business Architecture: This phase involves a detailed analysis of business capabilities and value streams to ensure that the architecture supports the business strategy and objectives.

* Importance:

* Contextual Understanding: By modeling business capabilities and value streams, architects gain a comprehensive understanding of the business and technology environment. This helps in aligning the architecture with business needs and ensuring that it supports value creation.

* Strategic Alignment: Identifying and modeling these elements ensures that the architecture is aligned with the strategic goals of the organization and supports its key business activities.

In summary, business capabilities and value streams are modeled when identifying the business and technology environment, providing a comprehensive understanding of how the organization operates and how the architecture can support its objectives.

NEW QUESTION # 55

Which of the following describes how the Enterprise Continuum is used when developing an enterprise architecture?

- A. To identify and understand business requirements
- B. To describe how an architecture addresses stakeholder concerns
- C. To coordinate with the other management frameworks in use
- **D. To classify architecture and solution assets**

Answer: D

Explanation:

The Enterprise Continuum is a tool within the TOGAF framework that provides methods for classifying architecture and solution assets. The continuum is a view of the Architecture Repository that provides methods for classifying, storing, and managing the various architecture assets. These assets include architectures, architectural patterns, architecture descriptions, and other related artifacts. The Enterprise Continuum enables architects to organize the repository in a way that is consistent and understandable, facilitating the reuse of these assets across various architecture development initiatives.

NEW QUESTION # 56

Consider the following ADM phases objectives.

□ Which phase does each objective match?

- A. 1F-2F-3E-4G
- **B. 1F-2G-3F-4F**
- C. 1G-2E-3F-4E
- D. 1E-2F-3E-4G

Answer: B

NEW QUESTION # 57

In the ADM, what is the name for a document deliverable that has completed a review and is approved?

- A. final
- B. version 0.9
- C. approved
- **D. ratified**

Answer: D

NEW QUESTION # 58

In what TOGAF ADM phase is the information map linked to other business blueprints?

- A. Preliminary Phase
- B. Phase B
- C. Phase A
- **D. Phase E**

Answer: D

Explanation:

Phase E Explanation of Correct answer: In Phase E (Opportunities and Solutions) of the TOGAF Explanation:ADM, the information map is linked to other business blueprints such as the Business Capability Map, the Value Stream Map, and the Business Process Model Phase E Explanation of Correct answer: In Phase E (Opportunities and Solutions) of the TOGAF Explanation:ADM, the information map is linked to other business blueprints such as the Business Capability Map, the Value Stream Map, and the Business Process Model2. This helps to identify and prioritize opportunities for business improvement and transformation2.
