최신 Salesforce Accredited Professional AP-219 무료샘플문제 (Q108-Q113):

질문 # 108

Which two process exceptions are available out of the box in order management? (Choose 2)

- A. Inventory check exception
- B. Navigate invoice amount
- C. Unable to capture payment
- D. Find location fault

정답: C,D

질문 # 109

An administrator is creating a flow to manage order fulfillment The administrator creates a fault path to handle a possible error. What object record should the administrator create in the fault path to notify users of an error?

- A. Fulfillment Error
- B. Process Exception
- C. Order Summary Exception
- D. OrderError

정답: B

설명:

The object record that the administrator should create in the fault path to notify users of an error is Process Exception. A Process Exception is a record that represents an error or exception that occurred during the order lifecycle, such as payment authorization failure, inventory allocation failure, fulfillment location assignment failure, etc. A Process Exception has a lookup relationship to the Order object, and it contains information such as the exception type, status, message, etc. Verified

질문 # 110

What two steps are required to add an item to the Actions & Recommendations panel on the Order Summary record page?

- A. Create a New Deployment
- B. Create a new sub-flow
- C. Drag the Actions & Recommendations component on the page
- D. Make a new Lightning Record Page

정답: B,C

설명:

Two steps that are required to add an item to the Actions & Recommendations panel on the Order Summary record page are: Drag the Actions & Recommendations component on the page. The Actions & Recommendations component is a standard component that displays actions and recommendations based on business logic for records in Lightning Experience or Salesforce mobile app. The administrator can use the Lightning App Builder to drag and drop the Actions & Recommendations component

onto the Order Summary record page layout.

Create a new sub-flow. A sub-flow is a type of flow that can be invoked by another flow as an element. A sub-flow can contain logic and actions that are specific to a certain scenario or use case, such as order fulfillment or payment processing. The administrator can use Flow Builder to create a new sub-flow that defines the actions and recommendations for Order Summaries, and then add it to the Actions & Recommendations component on the record page.

질문 # 111

Which object is used to create an invoice?

- A. Fulfillment Order
- **B. Order Summary**
- C. Order
- D. Shipment

정답: B

설명:

The Order Summary object is used to create an invoice. An invoice is a document that requests payment from a customer for an order. An invoice can include one or more fulfillment orders and one or more credit memos. A fulfillment order is a record that represents a part of an order that is fulfilled by a specific location. A credit memo is a record that represents a partial or full refund for an order or a fulfillment order. To create an invoice, an administrator can use the Create Invoice Apex action in a flow. The Create Invoice Apex action requires the Order Summary ID as an input parameter and creates an Invoice record associated with the Order Summary record.
