Pass4suresVCE Microsoft AI-900 practice test software is another great way to reduce your stress level when preparing for the AI-900. With our software, you can practice your excellence and improve your competence on the Microsoft AI-900 exam dumps. Each Microsoft AI-900 Practice Exam, composed of numerous skills, can be measured by the same model used by real examiners. Pass4suresVCE Microsoft AI-900 practice test has real Microsoft AI-900 exam questions.

Microsoft AI-900 exam is an excellent certification for individuals who want to demonstrate their knowledge and skills in the field of artificial intelligence and machine learning. It provides a great starting point for individuals who want to pursue a career in this field and is also helpful for professionals who want to stay up-to-date with the latest technological advancements.

The AI-900 exam is an excellent starting point for individuals who are interested in pursuing a career in AI or are looking to enhance their existing knowledge of AI. Microsoft Azure AI Fundamentals certification exam is also an excellent way for organizations to ensure that their employees have the necessary knowledge and skills to leverage AI technologies effectively. Overall, the Microsoft AI-900 Certification Exam is a valuable tool for individuals and organizations looking to stay competitive in the rapidly evolving world of AI technology.

Best Accurate Microsoft AI-900 Certification Dumps - AI-900 Free Download

A steadily rising competition has been noted in the tech field. Countless candidates around the globe aspire to be Microsoft Azure AI Fundamentals in this field. Microsoft AI-900 stand out from the rest of the Microsoft professionals. Once you become Microsoft certified, a whole new scope opens up to you and you are immediately hired by reputed firms. Even though the Microsoft Azure AI Fundamentals boosts your career options, you have to pass the AI-900 Exam. This Microsoft Azure AI Fundamentals exam serves to filter out the capable from incapable candidates.

Microsoft Azure AI Fundamentals Sample Questions (Q281-Q286):

NEW QUESTION # 281

Match the principles of responsible AI to the appropriate descriptions.

To answer, drag the appropriate principle from the column on the left to its description on the right. Each principle may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Answer:

Explanation:

Explanation

Graphical user interface, text, application Description automatically generated

NEW QUESTION # 282

Your company is exploring the use of voice recognition technologies in its smart home devices. The company wants to identify any barriers that might unintentionally leave out specific user groups.

This is an example of which Microsoft guiding principle for responsible AI?

- A. accountability
- B. fairness
- C. privacy and security
- D. inclusiveness

Answer: D

Explanation:

According to the Microsoft Azure AI Fundamentals (AI-900) Official Study Guide and the Microsoft Responsible AI Framework, Inclusiveness is one of the six guiding principles for responsible AI. The principle of inclusiveness ensures that AI systems are designed to empower everyone and engage people of all abilities. Microsoft emphasizes that inclusive AI systems must be developed with awareness of potential barriers that could unintentionally exclude certain user groups. This directly aligns with the scenario described—where the company is examining voice recognition technologies in smart home devices to identify barriers that might leave out users, such as those with speech impairments, accents, or language differences.

The official Microsoft Learn module "Identify guiding principles for responsible AI" explains that inclusiveness focuses on creating systems that can understand and serve users with diverse needs. For example, voice recognition models should account for variations in dialect, tone, accent, and speech patterns to ensure equitable access for all. A lack of inclusiveness could cause bias or misrecognition for underrepresented groups, leading to unintentional exclusion.

Microsoft's guidance further stresses that designing for inclusiveness involves involving diverse users in the data collection and testing phases, conducting accessibility assessments, and continuously improving model performance across different demographic groups. In this way, inclusiveness promotes fairness, accessibility, and usability across cultural and physical differences.

In contrast:

- * A. Accountability is about ensuring humans are responsible for AI outcomes.
- * B. Fairness focuses on preventing bias and discrimination in data or algorithms.
- * C. Privacy and security ensure protection of personal data and secure handling of information.

Thus, evaluating potential barriers that could exclude specific user groups exemplifies Inclusiveness, as it demonstrates a proactive approach to making AI accessible and beneficial for all users.

NEW QUESTION # 283

Select the answer that correctly completes the sentence.

Answer:

Explanation:

Explanation:

NEW QUESTION # 284

Match the Azure Cognitive Services to the appropriate AI workloads.

To answer, drag the appropriate service from the column on the left to its workload on the right. Each service may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Answer:

Explanation:

Explanation:

The correct matches are Custom Vision, Form Recognizer, and Face - each corresponding to a distinct capability under Azure Cognitive Services as described in the Microsoft Azure AI Fundamentals (AI-900) official study guide and Microsoft Learn modules on Computer Vision workloads.

* Custom Vision # Identify objects in an image The Custom Vision service is part of the Azure Cognitive Services suite that enables developers to train custom image classification and object detection models.

Unlike the prebuilt Computer Vision API, Custom Vision allows users to upload their own labeled images and teach the model to recognize specific objects relevant to their business context. The AI-900 syllabus explains that Custom Vision is ideal for tasks such as identifying products on a shelf, categorizing images, or detecting defects in manufacturing.

* Form Recognizer # Automatically import data from an invoice to a database Form Recognizer is a document processing AI service that extracts structured data from forms, receipts, and invoices. It uses optical character recognition (OCR) combined with layout and key-value pair detection to automatically capture information such as invoice numbers, amounts, and vendor names. The AI-900 study materials highlight this service under the Document Intelligence category, emphasizing its ability to streamline data entry and business automation workflows by importing extracted data directly into databases or applications.

* Face # Identify people in an image The Face service provides advanced facial detection and recognition capabilities. It can locate faces in images, compare similarities between faces, identify known individuals, and even detect facial attributes such as age or emotion. The AI-900 course classifies this under Computer Vision services for person identification and security-related use cases such as access control or identity verification.

Thus, each mapping aligns precisely with the AI-900 official learning outcomes on Cognitive Services capabilities:

- * Custom Vision # Object recognition
- * Form Recognizer # Data extraction from forms
- * Face # People identification
- # Final verified configuration:
 - * Custom Vision # Identify objects in an image
 - * Form Recognizer # Automatically import data from an invoice to a database
 - * Face # Identify people in an image

NEW QUESTION # 285

You have an Azure subscription that uses Azure OpenAI.

You need to create an original image of a rural scene to use on a website.

What should you do?

- A. From GitHub Copilot, provide instructions to create the image of the rural scene.
- B. **From Azure AI Foundry, deploy a DALL-E model, and provide instructions to create the rural scene.**
- C. From Microsoft Bing, search the term "rural scene" and download the results.
- D. From Azure AI Foundry, deploy a GPT-3.5 Turbo model and provide instructions to create the image of the rural scene.

Answer: B

NEW QUESTION # 286

.....

If you are now determined to go to research, there is still a little hesitation in product selection. AI-900 exam prep offers you a free trial version! You can choose one or more versions that you are most interested in, and then use your own judgment. AI-900 Exam Materials really hope that every user can pick the right AI-900 study guide for them. If you really lack experience, you do not know which one to choose. You can consult our professional staff.
