The three versions of our GES-C01 exam questions are PDF & Software & APP version for your information. Each one has its indispensable favor respectively. All GES-C01 training engine can cater to each type of exam candidates' preferences. Our GES-C01 practice materials call for accuracy legibility and high quality, so GES-C01 study braindumps are good sellers and worth recommendation for their excellent quality.

This pdf covers all of the GES-C01 Exam Questions from the previous exams as well as those that will appear in the upcoming Snowflake GES-C01 exam. The GES-C01 PDF exam questions are compiled according to the latest exam syllabus to ensure your success. The Snowflake GES-C01 PDF exam questions are also printable to make handy notes.

>> Sure GES-C01 Pass <<

Desktop Based Snowflake GES-C01 Practice Test Software

If you can get the certification for the exam, it not only can prove the ability of you but also can improve your competitive force in the job hunting market. GES-C01 exam braindumps are high quality and accuracy, and we can help you pass the exam in your first attempt, otherwise we will give you refund. Moreover, GES-C01 test materials contain most of the knowledge points for the exam, and you can pass the exam as well as improve your ability in the process of learning. GES-C01 exam materials offer you free update for 365 days after payment, and the update version will be sent to your email automatically.

Snowflake SnowPro® Specialty: Gen AI Certification Exam Sample Questions (Q319-Q324):

NEW QUESTION # 319

A security administrator needs to manage access to Snowflake Cortex LLM functions and models, and ensure compliant usage across different regions for various teams. Which configuration options and parameters are relevant for these requirements?

- **A. Option C**
- B. Option E
- **C. Option B**
- **D. Option A**
- E. Option D

Answer: A,C,D

Explanation:

NEW QUESTION # 320

A data scientist is designing a Retrieval Augmented Generation (RAG) system in Snowflake for querying a large knowledge base of internal documents. They plan to store document embeddings and use vector similarity for retrieval. Which statement accurately describes the use of vector functions and associated costs in this RAG architecture?

- **A. The**
-
- **B. Snowpark Python fully supports all Snowflake vector similarity functions, including**
-
- **C. Storing vector embeddings, created using functions like**
-
- **D. When using**
-
- **E. □**

Answer: D

Explanation:

Option A is incorrect because

□ is a vector similarity function, not an embedding generation function. Embedding generation functions like
□ incur compute costs based on input tokens. Option B is incorrect. While there are storage costs associated with storing data in Snowflake, the sources do not state that storing vector embeddings themselves incur 'token-based costs for the storage itself'; rather, the EMBED_TEXT functions incur compute costs per input token during the embedding creation process. Option C is correct. Vector similarity functions, including
□, do not incur token-based costs. This contrasts with embedding creation which does incur such costs. Option D is incorrect. Snowflake Cortex provides four vector similarity functions:
□; no single one is stated as the 'only recommended' or universally superior. Option E is incorrect. The Snowpark Python library explicitly states it does not support the
□ function, making the claim of full support for all similarity functions false.

NEW QUESTION # 321

A data scientist is tasked with improving the accuracy of an LLM-powered chatbot that answers user questions based on internal company documents stored in Snowflake. They decide to implement a Retrieval Augmented Generation (RAG) architecture using Snowflake Cortex Search. Which of the following statements correctly describe the features and considerations when leveraging Snowflake Cortex Search for this RAG application?

- **A. For optimal search results with Cortex Search, source text should be pre-split into chunks of no more than 512 tokens, even when using models with larger context windows like**
-
- **B. To create a Cortex Search Service, one must explicitly specify an embedding model and manually manage its underlying**

infrastructure, similar to deploying a custom model via Snowpark Container Services.

- C. The
- D. Enabling change tracking on the source table for the Cortex Search Service is optional; the service will still refresh automatically even if change tracking is disabled.
- E. Cortex Search automatically handles text chunking and embedding generation for the source data, eliminating the need for manual ETL processes for these steps.

Answer: A,C,E

Explanation:

Option A is correct because Cortex Search is a fully managed service that gets users started with a hybrid (vector and keyword) search engine on text data in minutes, without needing to worry about embedding, infrastructure maintenance, or index refreshes. Option B is incorrect because Cortex Search is a fully managed service; users do not need to manually manage the embedding model infrastructure. A default embedding model is used if not specified. Option C is correct because, for best search results with Cortex Search, Snowflake recommends splitting text into chunks of no more than 512 tokens, as smaller chunks typically lead to higher retrieval and downstream LLM response quality, even with models that have larger context windows. Option D is correct because the 'SNOWFLAKE.CORTEX.SEARCH PREVIEW' function allows users to test the search service to confirm it is populated with data and serving reasonable results for a given query. Option E is incorrect because change tracking is required on the source table for the Cortex Search Service to function correctly and reflect updates to the base data.

NEW QUESTION # 322

- A. □
- B. □
- C. □
- D. □
- E. □

Answer: A,B,C,D,E

Explanation:

NEW QUESTION # 323

- A. Option A
- B. Option E
- C. Option C
- D. Option B
- E. Option D

Answer: D,E

Explanation:

NEW QUESTION # 324

Along with SnowPro® Specialty: Gen AI Certification Exam (GES-C01) self-evaluation exams, GES-C01 dumps PDF is also available at Prep4sures. These GES-C01 questions can be used for quick SnowPro® Specialty: Gen AI Certification Exam (GES-C01) preparation. Our GES-C01 dumps PDF format works on a range of Smart devices, such as laptops, tablets, and smartphones. Since GES-C01 Questions Pdf are easily accessible, you can easily prepare for the test without time and place constraints. You can also print this format of Prep4sures's SnowPro® Specialty: Gen AI Certification Exam (GES-C01) exam dumps to prepare off-screen and on the go.

GES-C01 Latest Dumps Files: <https://www.prep4sures.top/GES-C01-exam-dumps-torrent.html>

All these three Snowflake GES-C01 exam questions formats contain the real and updated GES-C01 exam questions, Snowflake

GES-C01 Latest Dumps Files puts customers' interest and GES-C01 Latest Dumps Files products quality of the first place, So, our high quality and high accuracy rate GES-C01 training materials are your ideal choice this time, Prep4sures also offers an exclusive 'Exam Mode' where you can attempt 50 random questions related to your GES-C01 exam.

Working with this book, It begins with the GES-C01 Guaranteed Success specification of a model and uses that model to generate data, predictions, or recommendations, All these three Snowflake GES-C01 Exam Questions formats contain the real and updated GES-C01 exam questions.

100% Pass Quiz GES-C01 - SnowPro® Specialty: Gen AI Certification Exam –Professional Sure Pass

Snowflake puts customers' interest and Snowflake Certification products quality of the first place, So, our high quality and high accuracy rate GES-C01 training materials are your ideal choice this time.

Prep4sures also offers an exclusive 'Exam Mode' where you can attempt 50 random questions related to your GES-C01 exam, If you choose our GES-C01 exam question for related learning and GES-C01 training, the system will automatically record your actions and analyze your learning effects.
