TOP HCL-HWA-ADM-102 Latest Demo 100% Pass | Valid HCLSoftware Latest HCLSoftware Certified Administrator- HWA 10.2 Exam Format Pass for sure

Our HCL-HWA-ADM-102 learning question can provide you with a comprehensive service beyond your imagination. HCL-HWA-ADM-102 exam guide has a first-class service team to provide you with 24-hour efficient online services. Our team includes industry experts & professional personnel and after-sales service personnel, etc. Industry experts hired by HCL-HWA-ADM-102 Exam Guide helps you to formulate a perfect learning system, and to predict the direction of the exam, and make your learning easy and efficient. Our staff can help you solve the problems that HCL-HWA-ADM-102 test prep has in the process of installation and download.

HCLSoftware Certified Administrator- HWA 10.2 Sample Questions (Q436-

Q441):

NEW QUESTION # 436

HCL Workload Automation 10.2 container deployment on ECS EC2 launch type with EBS gp3 volumes encounters "iothreads exhausted" during configureDb despite 3000 IOPS provisioned. CloudWatch metrics show QueueLength 50+. Task definition cpu: 4096 memory: 8192. Which container deployment EBS configuration using precise task definition volumes resolves I/O throttling?

- A. launchTemplate: blockDeviceMappings: [{deviceName: "/dev/xvdb", ebs: {volumeSize: 500, volumeType: "io2", iops: 100000}}]
- B. ebs: volumeSize: 500 provisionedIOPS: 3000 throughput: 250MiB/s encrypted: true volumeType: gp3
- C. volume: name: tws-data volumeType: gp3 size: 500 iops: 16000 throughput: 1000 deleteOnTermination: false
- D. storageType: io2 size: 1000Gi iopsPerGB: 1000 multiAttachEnabled: true encrypted: true kmsKeyId: alias/hwa-key

Answer: C

Explanation:

ECS configureDb requires gp3 volume iops: 16000 throughput: 1000MiB/s exceeding baseline 3000 IOPS for DDL burst, size: 500GB accommodating symphony growth, deleteOnTermination: false preserving data across task replacements. io2 cost-prohibitive for HWA, throughput 250MiB/s insufficient for parallel table population, io2 iopsPerGB yields only 1000 IOPS minimum.

NEW QUESTION # 437

Which parameters are configurable in the Dynamic Workload Console advanced settings file TdwcGlobalSettings.xml? (Select All that Apply)

- A. Carry forward behavior for job streams
- B. Timeout for HCL Workload Automation for Z engine operations
- C. Maximum query result limits
- D. Current user registry in use
- E. Custom documentation URLs for jobs and job streams

Answer: B,D,E

Explanation:

Explanation: The TdwcGlobalSettings.xml file allows customization of advanced console behavior, including URLs for associating custom documentation with scheduling objects, detection of the user registry, and specific timeouts for operations on z/OS engines. Query limits and carry forward are managed elsewhere in console settings or global options.

NEW QUESTION # 438

In HCL Workload Automation 10.2 architecture, which workstation types maintain a local copy of the Symphony file for fault-tolerant operation? (Select two)

- A. Dynamic agents
- B. Backup Master Domain Manager
- C. Master Domain Manager (MDM)
- D. Domain Manager (DDM/FTAs acting as managers)
- E. Standard agents

Answer: B,C,D

Explanation:

Master Domain Manager (MDM) generates and distributes the Symphony production plan. Domain Manager (DDM/FTAs acting as managers) and Backup Master Domain Manager hold copies for failover and subdomain management. Dynamic agents and standard agents do not store Symphony locally.

NEW QUESTION # 439

For deploying with Docker in restricted environments, which feature allows non-root installation in recent HCL Workload

Automation 10.2 updates?

- A. Agent-only non-root
- B. Root required for schema creation
- **C. Regular user account for all components**
- D. Only console non-root
- E. Helm operator mandatory

Answer: C

Explanation:

Updates enable deploying server and agent components with Docker using regular user accounts without root privileges, extending non-root support introduced for traditional installations.

NEW QUESTION # 440

Scenario: In HCL Workload Automation 10.2 with federated LDAP, users from a secondary domain fail bind due to referral chasing issues. Which ldapRegistry parameters enable proper cross-domain resolution? (Select two)

- **A. referral="follow"**
- B. queryPageSize="200"
- C. connectTimeout="30s"
- **D. chaseReferral="true"**
- E. sslRef="ldapSSL"

Answer: A,D

Explanation:

referral="follow" instructs Liberty to automatically chase referrals. chaseReferral="true" reinforces referral handling for multi-domain forests.

NEW QUESTION # 441

.....

After you pay for our HCL-HWA-ADM-102 exam material online, you will get the link to download it in only 5 to 10 minutes. You don't have to wait a long time to start your preparation for the HCL-HWA-ADM-102 exam. The only thing you must make sure is that you have left your right E-mail address when you purchase our HCL-HWA-ADM-102 Study Guide. Moreover, you don't need to worry about safety in buying our HCL-HWA-ADM-102 exam materials. We have considered all the details for you. You can just buy and download right now!
