Valid SAP C_THR92_2505 Torrent - C_THR92_2505 Detailed Study Plan

The SAP C_THR92_2505 online practice test engine that comes with the SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting (C_THR92_2505) exam questions from Pass4cram assists you in simulating the real SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting (C_THR92_2505) exams. This is excellent for familiarizing yourself with the SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting and learning what to anticipate on test day. You can also use the SAP Practice Test (Links to an external site.) engine to monitor your progress and review your answers to see where you need to improve for the SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting (C_THR92_2505) exam.

SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting Sample Questions (Q43-Q48):

NEW QUESTION # 43

What is a prerequisite for using the SuccessFactors standard canvas report templates?

- A. The customer must have licensed SuccessFactors Employee Central
- B. The templates must have been downloaded from the Success Store.
- C. The customer must have enabled the templates in Provisioning.
- D. The templates must have been loaded within Report Center.

Answer: C

Explanation:

* Enabling Templates in Provisioning:

* SuccessFactors standard canvas report templates must be enabled in Provisioning by an implementation partner or SAP administrator before they can be used.

NEW QUESTION # 44

You are using a pivot table in your canvas report but the report does NOT display the most recent data. What could be the reason?

- A. You are using a wrong People Scope.
- B. You are NOT using a template.
- C. You are using the percent of total option.
- D. You are using a query with a static date filter.

Answer: D

Explanation:

* Issue with Static Date Filters:

* If the query uses a static date filter (e.g., a specific range like "January 1, 2023, to March 31, 2023"), the report will not reflect the most recent data as the filter restricts results to the defined date range.

* Resolution:

* Update the query to use dynamic date filters (e.g., "Last 30 Days" or "Current Year") to ensure the pivot table includes the latest data.

NEW QUESTION # 45

When a user builds a query, what is the default People Scope of the query?

- A. Direct Reports of the logged-in user
- B. The HR reports of the logged-in user
- C. All Reports of the logged-in user
- D. All employees in the department of the logged-in user

Answer: A

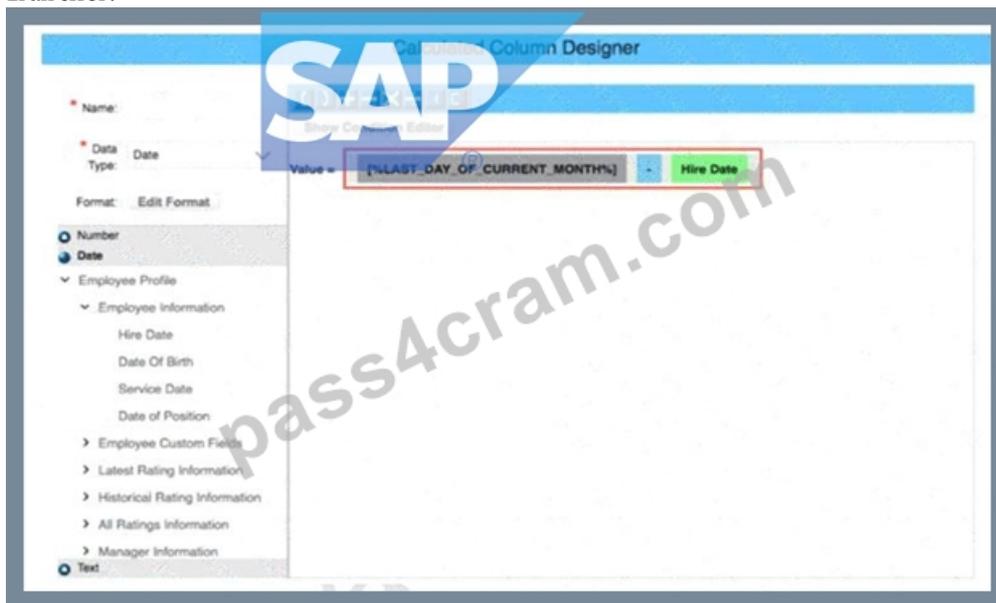

Explanation:

* Default People Scope:

* When building a query, the default People Scope is set to the Direct Reports of the logged-in user. This ensures the user only sees data relevant to their scope of responsibility.

NEW QUESTION # 46

You are creating a calculated column to calculate an employee's organizational tenure. Why does the formula in the screenshot result in an error?

- A. An incorrect dynamic date variable has been used.
- B. An "if then else" statement needs to be included.
- C. The result of the formula is negative.
- D. An incorrect data type has been selected.

Answer: D

Explanation:

* Error Analysis

* Calculated columns in Query Designer require the correct data type to be specified based on the formula. If the selected data type does not match the formula's expected output, an error occurs.

* Why the Error Occurs

* The formula appears to involve a calculation related to dates. If the data type is not set to a compatible format (e.g., "Number" or "Date"), the calculation fails.

* Why Other Options are Incorrect

- * A (Incorrect Dynamic Date Variable): The issue is not with the date variable but with the data type.
- * B (IF-Then-Else Statement): Such a statement is unnecessary in the given formula.
- * C (Negative Result): Negative results are not inherently problematic unless restricted by the data type.

References

- * SAP SuccessFactors Calculated Columns Guide

NEW QUESTION # 47

If you want to create a single filter that utilizes criteria from multiple tables in the same query, which filter do you need to use in Query Designer?

- A. Query Advanced filter
- B. Table Advanced filter
- C. Table Simple filter
- D. Query Scope filter

Answer: A

Explanation:

* Filter Types in Query Designer

* A Query Advanced Filter is used to define filter conditions across multiple tables in a single query. This is necessary when the criteria involve fields from different data sources.

* Why Other Options are Incorrect

* A (Query Scope filter): Used to limit data based on scope, but it does not combine criteria across multiple tables.

* B (Table Simple filter): Applies filters only to a single table.

* D (Table Advanced filter): Applies advanced criteria but only within a single table.

References

- * SAP SuccessFactors Query Designer Documentation

NEW QUESTION # 48

.....

We know that tenet from the bottom of our heart, so all parts of service are made due to your interests. You are entitled to have full money back if you fail the exam even after getting our C_THR92_2505 test prep. Our staff will help you with genial attitude. We esteem your variant choices so all these versions of C_THR92_2505 Study Materials are made for your individual preference and inclination.
