Reliable AIGP Dumps Questions - Test AIGP Cram

In a word, you can try our free AIGP study guide demo before purchasing, IAPP Certified Artificial Intelligence Governance Professional Pdf After the researches of many years, we found only the true subject of past-year exam was authoritative and had time-validity, For your benefit, PDFTorrent is putting forth you to attempt the free demo and IAPP AIGP Exam Dumps the best quality highlights of the item, because nobody gives this facility only the PDFTorrent AIGP Free Learning provide this facility. The example on the right was a simple widget designed Reliable AIGP Pdf to track points in a rewards program, The pearsonvue website is not affiliated with us, Although computers are great at gathering, manipulating, and calculating raw data, humans prefer their data presented in an orderly fashion.

IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q66-Q71):

NEW QUESTION # 66

What is the key feature of Graphical Processing Units (GPUs) that makes them well-suited to running AI applications?

- A. The number of transistors on GPUs doubles every two years, making the chips smaller and lighter.
- B. GPUs can run every task on a computer, making them more robust than CPUs.
- C. GPUs can access memory quickly, resulting in lower latency than CPUs.
- D. GPUs run many tasks concurrently, resulting in faster processing.

Answer: D

Explanation:
GPUs (Graphical Processing Units) are well-suited to running AI applications due to their ability to run many tasks concurrently, which significantly enhances processing speed. This parallel processing capability makes GPUs ideal for handling the large-scale computations required in AI and deep learning tasks. Reference:
AIGP BODY OF KNOWLEDGE, which explains the importance of compute infrastructure in AI applications.

NEW QUESTION # 67

Pursuant to the White House Executive Order of November 2023, who is responsible for creating guidelines to conduct red-teaming tests of AI systems?

- A. Office of Science and Technology Policy (OSTP).
- B. National Science and Technology Council (NSTC).
- C. Department of Homeland Security (DHS).
- D. National Institute of Standards and Technology (NIST).

Answer: D

Explanation:
The White House Executive Order of November 2023 designates the National Institute of Standards and Technology (NIST) as the responsible body for creating guidelines to conduct red-teaming tests of AI systems.
NIST is tasked with developing and providing standards and frameworks to ensure the security, reliability, and ethical deployment of AI systems, including conducting rigorous red-teaming exercises to identify vulnerabilities and assess risks in AI systems.
Reference: AIGP BODY OF KNOWLEDGE, sections on AI governance and regulatory frameworks, and the White House Executive Order of November 2023.

NEW QUESTION # 68

Which of the following is a subcategory of AI and machine learning that uses labeled datasets to train algorithms?

- A. Expert systems.
- B. Supervised learning.
- C. Segmentation.
- D. Generative AI.

Answer: B

Explanation:
Supervised learning is a subcategory of AI and machine learning where labeled datasets are used to train algorithms. This process involves feeding the algorithm a dataset where the input-output pairs are known, allowing the algorithm to learn and make predictions or decisions based on new, unseen data. Reference:
AIGP BODY OF KNOWLEDGE, which describes supervised learning as a model trained on labeled data (e.g., text recognition, detecting spam in emails).

NEW QUESTION # 69

Under the NIST AI Risk Management Framework, all of the following are defined as characteristics of trustworthy AI EXCEPT?

- A. Explainable and Interpretable.
- B. Accountable and Transparent.

- C. Tested and Effective.
- D. Secure and Resilient.

Answer: A

Explanation:
The NIST AI Risk Management Framework outlines several characteristics of trustworthy AI, including being secure and resilient, explainable and interpretable, and accountable and transparent. While being tested and effective is important, it is not explicitly listed as a characteristic of trustworthy AI in the NIST framework.
The focus is more on the system's ability to function safely, securely, and transparently in a way that stakeholders can understand and trust. Reference: AIGP Body of Knowledge, NIST AI RMF section.

NEW QUESTION # 70
CASE STUDY
A premier payroll services company that employs thousands of people globally, is embarking on a new hiring campaign and wants to implement policies and procedures to identify and retain the best talent. The new talent will help the company's product team expand its payroll offerings to companies in the healthcare and transportation sectors, including in Asia.
It has become time consuming and expensive for HR to review all resumes, and they are concerned that human reviewers might be susceptible to bias.
To address these concerns, the company is considering using a third-party AI tool to screen resumes and assist with hiring. They have been talking to several vendors about possibly obtaining a third-party AI-enabled hiring solution, as long as it would achieve its goals and comply with all applicable laws.
The organization has a large procurement team that is responsible for the contracting of technology solutions.
One of the procurement team's goals is to reduce costs, and it often prefers lower-cost solutions. Others within the company deploy technology solutions into the organization's operations in a responsible, cost-effective manner.
The organization is aware of the risks presented by AI hiring tools and wants to mitigate them. It also questions how best to organize and train its existing personnel to use the AI hiring tool responsibly. Their concerns are heightened by the fact that relevant laws vary across jurisdictions and continue to change.
The organization continues planning the adoption of an AI tool to support hiring, but is concerned about potential bias in content generated by AI systems and how that could affect public perception.
Which of the following measures should the company adopt to best mitigate its risk of reputational harm from using the AI tool?

- A. Ensure the vendor provides indemnification for the AI tool
- B. Require the procurement and deployment teams to agree upon the AI tool
- C. Test the AI tool pre- and post-deployment
- D. Continue to require the company's hiring personnel to manually screen all applicants

Answer: C

Explanation:
Note:This is the same scenario and question as Question 21 and thus has thesame correct answer: A. It's possible this was duplicated in your original input.
Repeated for clarity:
"Testing AI tools pre- and post-deployment helps ensure they perform as expected and do not introduce bias, privacy issues, or fairness concerns. This mitigates reputational and legal risk." TheAI Governance in Practice Report2025further reinforces:
"Ongoing monitoring and testing post-deployment allows organizations to catch and correct unintended impacts... especially important in HR and hiring contexts."
