It is necessary to strictly plan the reasonable allocation of DEP-2025 test time in advance. Many students did not pay attention to the strict control of time during normal practice, which led to panic during the process of examination, and even some of them are not able to finish all the questions. If you purchased DEP-2025 learning dumps, each of your mock exams is timed automatically by the system. DEP-2025 learning dumps provide you with an exam environment that is exactly the same as the actual exam. It forces you to learn how to allocate exam time so that the best level can be achieved in the examination room.

Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.
Topic 2	<ul style="list-style-type: none"> Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality.
Topic 3	<ul style="list-style-type: none"> Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.
Topic 4	<ul style="list-style-type: none"> Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements.
Topic 5	<ul style="list-style-type: none"> Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs.
Topic 6	<ul style="list-style-type: none"> Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.
Topic 7	<ul style="list-style-type: none"> Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.

Topic 8	<ul style="list-style-type: none"> • Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.
Topic 9	<ul style="list-style-type: none"> • Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.
Topic 10	<ul style="list-style-type: none"> • Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.
Topic 11	<ul style="list-style-type: none"> • Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed.

Apple Deployment and Management Exam practice certkingdom dumps & DEP-2025 pdf training torrent

Our DEP-2025 exam prep can bring you high quality learning platform to pass the variety of exams. DEP-2025 guide dumps are elaborately composed with major questions and answers. DEP-2025 test question only needs 20 hours to 30 hours to practice. There is important to get the DEP-2025 Certification as you can. There is a fabulous product to prompt the efficiency--the DEP-2025 exam prep, as far as concerned, it can bring you high quality learning platform to pass the variety of exams.

Apple Deployment and Management Exam Sample Questions (Q66-Q71):

NEW QUESTION # 66

What's required to push apps to devices using an MDM solution?

- **A. Managed Distribution**
- B. User acceptance
- C. An APNs certificate
- D. A VPN configuration

Answer: A

Explanation:

Managed Distribution, available through Apple Business Manager (ABM) or Apple School Manager (ASM), is required to push apps to devices using an MDM solution. It allows administrators to assign app licenses (purchased or free) to devices or users, which the MDM then deploys silently, assuming the device is supervised or the user consents. An APNs certificate (option A) enables MDM communication but isn't specific to app pushing. User acceptance (option C) may be needed for non-supervised devices but isn't a requirement for supervised ones. A VPN configuration (option D) is unrelated. The Apple Business Manager User Guide details Managed Distribution's role in app deployment.

Reference: Apple Business Manager User Guide (Section: Managed Distribution).

NEW QUESTION # 67

Which type of app can be distributed through Apple Business Manager?

- A. Custom apps
- **B. All of the above**
- C. Purchased apps
- D. Free apps

Answer: B

Explanation:

Apple Business Manager (ABM) supports the distribution of multiple app types via Managed Distribution: custom apps (developed in-house), free apps (from the App Store), and purchased apps (bought through ABM's Apps and Books section). This flexibility allows organizations to manage all app needs within ABM, assigning them to users or devices via MDM. Options A, B, and C are all correct individually, but D encompasses them all, aligning with ABM's comprehensive capabilities as outlined in the Apple Business Manager User Guide.

NEW QUESTION # 68

What's the benefit of using supervision?

- A. Allows personalization
- **B. Enables additional restrictions**
- C. Separates personal and managed data
- D. Improves network performance

Answer: B

Explanation:

Supervision, applied via Apple Configurator or ADE, enables additional restrictions on devices, such as blocking app removal, enforcing single-app mode, or managing Activation Lock, providing greater control for organizations. Personalization (option A) is more limited under supervision. Network performance (option C) is unrelated, and data separation (option D) is a User Enrollment feature. The Apple Platform Deployment Guide highlights supervision's enhanced management capabilities.

NEW QUESTION # 69

Which feature allows IT administrators to manage cellular settings on a device?

- A. iCloud
- B. MDM
- **C. Configuration profiles**
- D. Find My

Answer: C

Explanation:

Configuration profiles allow IT administrators to manage cellular settings on iOS/iPadOS devices, such as configuring APN settings, disabling data roaming, or restricting cellular data for specific apps. These profiles are deployed via MDM or manually. Find My (option B) and iCloud (option C) are unrelated to cellular management. MDM (option D) delivers profiles, but the profiles contain the settings. The Apple Platform Deployment Guide details cellular configuration via profiles.

NEW QUESTION # 70

You bought new app licenses in Apple Business Manager, but they're not showing in your MDM solution. What might cause this?

- A. Creation of a new Content Manager
- B. APNs token annual expiration
- C. A password change to the MDM administrator account
- **D. A password change to the Managed Apple Account that downloaded the content token**

Answer: D

Explanation:

For managed app distribution, Apple Business Manager uses server tokens linked to Managed Apple Accounts.

When a password for the Managed Apple Account that originally downloaded the content token is changed, that token is invalidated. Apple documents clearly state that "if the password changes, the token must be regenerated and re-uploaded to the MDM solution." This explains why licenses suddenly stop syncing into MDM despite being purchased. APNs token expiration, admin password changes, or role assignments do not directly affect app license synchronization. Only the Managed Apple Account tied to the token can impact this.
