To become certified, individuals must pass a rigorous examination that tests their knowledge and skills in physical security. PSP exam consists of 125 multiple-choice questions and is administered over a four-hour period. Individuals must achieve a minimum score of 70 percent to pass the exam and earn the ASIS PSP Certification. ASIS Physical Security Professional Exam certification is valid for three years, after which individuals must recertify by completing continuing education credits or retaking the exam.

ASIS Physical Security Professional Exam Sample Questions (Q207-Q212):

NEW QUESTION # 207

The amount of force may be equal to, but not greater than, the force is being used against them, this phenomenon is called:

- A. Precautions
- B. Security
- C. Self-defense
- D. Protection

Answer: C

NEW QUESTION # 208

A study of BDP international has found that _____ of shippers are factoring in additional time to comply with the Advanced Manifest System, which went into effect in February 2003. This Department of Homeland security rule requires the filing of complete import manifest documentation at least 24 hours before U.S.-bound ships are loaded at foreign ports.

- A. 25 perc
- **B. 30 percent**
- C. 35 percent
- D. 40 percent

Answer: B

NEW QUESTION # 209

In its simplest form, what is the main drawback of critical path method scheduling?

- A. It requires a backward pass to calculate late dates.
- **B. It assumes that resources are unlimited.**
- C. It doesn't account for interdependent between activities.
- D. It allows for Precedence Diagramming Method to be used in place of Arrow Diagramming Method.

Answer: B

Explanation:

A fundamental limitation of Critical Path Method (CPM) scheduling is its assumption of unlimited resources, meaning it does not account for resource constraints when calculating schedules.

* Option A (backward pass) is a standard part of the CPM process.

* Option C is incorrect as CPM considers activity dependencies.

* Option D refers to flexibility in diagramming methods, not a drawback.

The PSP Study Guide highlights resource constraints as a significant challenge in CPM application.

NEW QUESTION # 210

What involves a discreet investigation into the past and present activities of the applicant?

- A. Supervisory
- B. Reporting
- **C. Back-grounding**
- D. Recording

Answer: C

NEW QUESTION # 211

For which of these delays should an owner grant a time extension?

- **A. Differing site conditions and centrifuge delay.**
- B. Structural steel shop drawings.
- C. Differing site conditions at parking structure.
- D. Shop drawings and centrifuge delay.

Answer: A

Explanation:

Granting Time Extensions:

* Differing site conditions are excusable delays under standard contract terms, requiring time extensions.

* Centrifuge delays and shop drawings typically fall under the contractor's responsibility and are not excusable.

Excluded Options:

* A & B: Shop drawing-related delays are the contractor's risk unless explicitly agreed otherwise.

* D: Combining excusable and non-excusable delays does not entitle an extension.
