

1Z0-1072-25 Exam Pass Guide & Valid 1Z0-1072-25 Test Guide

BTW, DOWNLOAD part of Actual4test 1Z0-1072-25 dumps from Cloud Storage: https://drive.google.com/open?id=1hGhtevwF0a_r0kH0LB_RatXFbCrA7rKP

With the rapid development of computer, network, and semiconductor techniques, the market for people is becoming more and more hotly contested. Passing a 1Z0-1072-25 exam to get a certificate will help you to look for a better job and get a higher salary. If you are worried about your job, your wage, and a 1Z0-1072-25 Certification, if you are going to change this, we are going to help you solve your problem by our 1Z0-1072-25 exam torrent with high quality, now allow us to introduce you our 1Z0-1072-25 guide torrent.

Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN• FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.
Topic 2	<ul style="list-style-type: none">• Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.

Topic 3	<ul style="list-style-type: none"> • Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources
Topic 4	<ul style="list-style-type: none"> • Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block • File • Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.

Valid 1Z0-1072-25 Test Guide - Pass4sure 1Z0-1072-25 Study Materials

Our 1Z0-1072-25 exam cram has been revised for lots of times to ensure all candidates can easily understand all knowledge parts. In the meantime, the learning process is recorded clearly in the system, which helps you adjust your learning plan. On the one hand, our company has benefited a lot from renovation. Customers are more likely to choose our products. On the other hand, the money we have invested is meaningful, which helps to renovate new learning style of the 1Z0-1072-25 Exam. So, why not buy our 1Z0-1072-25 test guide?

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q26-Q31):

NEW QUESTION # 26

Which of the following is a valid RFC 1918 CIDR prefix that can be used for creating an Oracle Cloud Infrastructure (OCI) Virtual Cloud Network (VCN)?

- A. 192.268.0.0/24
- B. 192.168.0.0/16
- C. 10.0.0.0/8
- D. 0.0.0.0/0

Answer: B,C

Explanation:

RFC 1918 defines IP address ranges that are reserved for private networks, which cannot be routed on the public internet. In Oracle Cloud Infrastructure (OCI), these private IP address ranges can be used to create Virtual Cloud Networks (VCNs). The valid RFC 1918 CIDR prefixes include:

192.168.0.0/16: A private IP range often used in home networks.

10.0.0.0/8: A large private IP range commonly used in enterprise networks.

Invalid Options:

B . 0.0.0.0/0: This CIDR represents all IP addresses and is not a valid private IP range.

C . 192.268.0.0/24: This is not a valid IP address range as the octet "268" is outside the allowable range of 0-255.

RFC 1918: Address Allocation for Private Internets

NEW QUESTION # 27

You want to protect your VM instance from low-level threats, such as rootkits and bootkits. What should you do?

- A. Use Vulnerability Scanning Service.
- B. Create a burstable instance.
- C. Use in-transit encryption.
- D. Create a shielded instance.

Answer: D

Explanation:

To protect your VM instance from low-level threats, such as rootkits and bootkits, you should create a shielded instance in Oracle Cloud Infrastructure (OCI). Shielded instances are designed to provide enhanced security features, including:

Secure Boot: Ensures that the instance boots only with trusted software.

Measured Boot: Records boot metrics, allowing verification that the instance has not been tampered with.

Trusted Platform Module (TPM): Provides additional security through cryptographic functions.

These features help protect against low-level threats that could compromise the integrity of the instance at boot time.

Reference:

Oracle Cloud Infrastructure Documentation: Shielded Instances

NEW QUESTION # 28

Why is the OCI Inter-Region Latency dashboard useful for optimizing data transfer and backup strategies?

- A. It focuses solely on latency within your own tenancy.
- B. It provides real-time data specific to your tenancy's workloads.
- **C. It offers a current and historical view of latency snapshots.**
- D. It's designed for troubleshooting latency issues within your specific applications.

Answer: C

Explanation:

The OCI Inter-Region Latency dashboard is useful for optimizing data transfer and backup strategies because it provides both current and historical views of latency snapshots between OCI regions. This information helps you understand the network performance between regions over time, allowing you to optimize the placement of resources and data transfer operations.

Optimization Use: By analyzing latency data, you can make informed decisions on where to store backups and how to efficiently transfer data across regions, potentially reducing costs and improving performance.

Reference:

Oracle Cloud Infrastructure Documentation: Inter-Region Latency Dashboard

NEW QUESTION # 29

How would you allow access to FSS for a DB System with read-only permissions?

- **A. Create an NFS export option that allows READ_ONLY access.**
- B. Modify the security list to allow stateful ingress rules.
- C. Modify the security list to allow stateless ingress rules.
- D. Create an instance principal for the DB System.

Answer: A

Explanation:

To allow access to Oracle Cloud Infrastructure (OCI) File Storage Service (FSS) for a Database (DB) System with read-only permissions, you should create an NFS export option that specifies READ_ONLY access.

NFS Export Options: These options define the access permissions (read/write or read-only) for clients connecting to the file system. By setting the export option to READ_ONLY, you ensure that the DB System can only read from the FSS and cannot modify or delete files.

Reference:

Oracle Cloud Infrastructure Documentation: File Storage Service Export Options

NEW QUESTION # 30

Which image option allows you to create identical instances with minimal effort?

- A. Select an image from the OCI Marketplace
- B. Use Oracle-provided images
- C. Bring your own image
- **D. Create a custom image**

Answer: D

Explanation:

When you need to create identical instances with minimal effort, creating a custom image is the best option.

Custom Images: A custom image captures the exact configuration of an instance, including the OS, software, configurations, and data. By using a custom image, you can easily replicate the same setup across multiple instances, ensuring consistency and reducing the need for manual configuration each time.

Other Options:

Bring Your Own Image: This allows you to import your custom OS image into OCI, but it's more suited for cases where you are migrating from another environment.

Select an Image from the OCI Marketplace: This provides pre-configured images from Oracle or third parties, but they may require additional setup to match your specific requirements.

Use Oracle-Provided Images: These are basic images provided by Oracle, which may not include the specific customizations you need.

Relevant OCI Documentation:

Custom Images Overview

This resource explains how to create and use custom images for quickly deploying identical instances.

NEW QUESTION # 31
