These sections include supply chain management fundamentals, inventory management, warehouse management, transportation management, and quality management.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant

Expert Sample Questions (Q161-Q166):

NEW QUESTION # 161

You are the quality assurance manager of a pharmaceuticals company.

One of your customers has requested to only receive batches of item B0001 that have an acid concentration between 5.5 - 10.5 percent.

You need to set up the customer specific batch attribute to track percent acid for B0001.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION # 162

You need to configure the solution for the two issues the production manager reported.

How should you complete the configurations? To answer, move the appropriate configurations to the correct issues. You may use each configuration once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Topic 6, Adatum CorporationAdatum Corporation is a multi-entity corporation located in Seattle, Washington in the United States. The company is a leading producer of specialty cakes and cookies. The company also manufactures specialty chocolates that use ethically sourced ingredients from around the world. The company plans to launch a new product line of organic chocolates later this year.

Adatum plans to implement Dynamics 365 Finance and Dynamics 365 Supply Chain Management to manage financials, inventory, and manufacturing capabilities across the entire organization.

* Manufactured products are stored at the distribution warehouses until they are shipped to customers.

* Individually branded pre-packaged cake and cookie mixes are supplied to specialty cafes and restaurants.

The mixes are shipped directly to the cafes and restaurants from the production factories.

* The company maintains a fleet of trucks and also subcontracts shipments between the factories and warehouses to outside vendors.

* The mixes and specialty chocolates are based on standard recipes that use precise ingredient ratios. There are strict rules around ingredient substitutions.

* All mixes use one of three base recipes as their foundation: BaseA, BaseB, and BaseC. Additional ingredients, spices, and flavorings are then added to make the final product.

* BaseA and BaseB are made in large batches and stored until they are used in the other mixes.

* Mixes with BaseA have a shelf life of six months due to the type of flour it uses.

* Specialty chocolates are manufactured only during the holiday season.

* Specialty desserts are offered during the holiday season. This year, customers may specify additional icing colors and cake layers when placing orders. Depending on the popularity of two of the new colors, they may be offered the next year.

* Cocoa oil that is extracted during the production of some of the specialty chocolates is used in the BaseB foundation mix.

* Cleaning and setup of machinery between products has been causing delays in production.

* Prices of raw ingredients such as sugar can fluctuate greatly depending on seasonal and worldwide demand.

* To properly record profitability, all raw materials use the first in, first out (FIFO) costing method, while finished products are recorded at standard costs.

* Large fluctuations have been occurring at month end in costs reported due to the inability to track production runs that span from month-to-month.

* Leftover flour and sugar from production runs are collected, packaged, and donated to local food banks if the amount is too small to use in other runs.

* To maintain Adatum's certification as a manufacturer of ethically sourced ingredients, the traceability of every ingredient in all products to their source must be tracked.

* All products must be randomly tested for adherence to quality standards for ingredient makeup and weight.

* Similar recipes must be able to be produced in succession to limit machinery cleaning and setup times.

- * All costs must be tracked for each production run and be able to be reconciled at the end of the monthly accounting cycle, including any work in process (WIP) costs and donations.
- * The organic chocolate line must be set up. The ingredients cannot be mixed with non-organic ingredients in inventory.
- * Mixes are generally stored and sold in 16-ounce bags. Some quantities are sold and distributed in 5, 10, and 20-gallon containers to large restaurants.
- * Each mix has a single unique item number and is tracked per batch produced.
- * Specialty chocolate products must be stored in climate-controlled areas of the warehouse.
- * QA TesterA discovers during a random test that the batch of a mix does not contain the necessary amount of IngredientB.
- * VendorZ, who transports finished goods from PlantA to Warehouses, is consistently late picking up product.
- * OperatorA must consolidate partial mix batch group runs into saleable package quantities.
- * UserB must set up the mix items.
- * UserC learns that mixes containing BaseA have been stamped with a batch date from the flour vendor and is not being calculated from the mix manufacturing date. The mixes from the past month that might be impacted need to be identified and the calculation needs to be corrected.
- * UserD must update the costs of finished goods. Accounting wants labor calculated in WIP based on how much time an individual spends performing the operation, as well as the finished goods to post to a specific different ledger account.
- * UserE must set up and maintain the cost of sugar.
- * UserF must decrease downtime for the machinery.
- * UserG must plan the specialty desserts for the current holiday season.

NEW QUESTION # 163

An automobile manufacturer leases cars to companies for use as company cars.

A car leased to a company breaks down and requires repairs.

You must open a maintenance request and replace the car with an equivalent model until the original car is repaired and returned to the company. When the manufacturer receives and inspects the car, the replacement car can be released to the company.

You need to select the maintenance request components to use.

Which components should you use? To answer, drag the appropriate components to the correct assets. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Note: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

To select the maintenance request components to use, you should use the following:

* The leased car that must be repaired: You should use the Inbound asset component. An inbound asset is an asset that is received from a customer or vendor for maintenance or repair1. You can use the Inbound assets page to create and manage inbound assets in Asset Management2. You can also create a maintenance request for an inbound asset and link it to a work order3.

* The replacement car for the leased car: You should use the Outbound asset component. An outbound asset is an asset that is sent to a customer or vendor as a temporary replacement for an asset that is being maintained or repaired1. You can use the Outbound assets page to create and manage outbound assets in Asset Management. You can also link an outbound asset to an inbound asset or a work order.

1: Inbound and outbound assets 2: Inbound assets 3: Create a maintenance request for an inbound asset :

[Outbound assets]

NEW QUESTION # 164

You need to configure the two lift kit subassembly cost requirements for production.

Which methods should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 165

A company uses Dynamics 365 Supply Chain Management.

Several production orders are in the started status.

An issue with equipment causes a rollback in the production status for some of the orders.

Some orders must be reset once the equipment is repaired, based on which products were being manufactured.

You need to reset the production orders based on the requirements

Which status should you use for each requirement? To answer, drag the appropriate statuses to the correct requirements. Each status may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

ANSWER.

Explanation:
