ASQ Certified Manager of Quality/Organizational Excellence Exam Sample Questions (Q145-Q150):

NEW QUESTION # 145

The primary goal of procurement management is to:

- **A. Purchase goods that meet specified requirements.**
- B. Foster sole-sourcing to reduce variation.
- C. Reduce new-product development cycle time.

- D. Form a partnership to recognize key suppliers.

Answer: A

NEW QUESTION # 146

Complaints have been received regarding a telephone voice-mail system being full and prohibiting new callers from leaving messages. Which of the following types of teams should be chartered to address the voice-mail issue?

- **A. Problem solving**
- B. Management
- C. Work
- D. Virtual

Answer: A

Explanation:

A problem-solving team would be the most appropriate type to address the issue of a telephone voice-mail system being full. This type of team is typically composed of individuals with relevant knowledge and skills who are brought together to solve specific problems. In this case, the team would analyze the voice-mail system, identify the root causes of the problem, and develop solutions to ensure that new callers can leave messages.

: The ASQ Certified Manager of Quality/Organizational Excellence Body of Knowledge outlines the importance of problem-solving teams in addressing specific operational issues. It emphasizes that a Certified Manager of Quality/Organizational Excellence should facilitate and lead team efforts to establish and monitor customer/supplier relations, support strategic planning and deployment initiatives, and help develop measurement systems to determine organizational improvement, which includes resolving issues such as the one described I.

NEW QUESTION # 147

A SWOT analysis should be performed when a company is

- A. identifying appropriate tactics for implementing the strategic plan
- B. Starting the strategic planning process
- **C. developing its strategic objectives**
- D. selling management on a new product line

Answer: C

NEW QUESTION # 148

Which of the following are considered key processes in managing quality?

- A. Root cause analysis, corrective- action, and preventive action
- B. Process capability, rework costs, and customer satisfaction
- C. Internal, external, and product audits
- **D. Quality control, planning, and improvement**

Answer: D

Explanation:

Quality management involves several key processes that contribute to achieving and maintaining high-quality products and services.

Let's break down the options:

* **Quality Control:** This process focuses on monitoring and verifying that products or services meet specified requirements. It includes activities such as inspections, testing, and statistical process control.

Quality control ensures that defects are identified and corrected before products reach customers.

* **Planning:** Effective quality management begins with proper planning. This process involves defining quality objectives, creating quality plans, and allocating resources. Planning ensures that quality goals are aligned with organizational objectives and that the necessary steps are taken to achieve them.

* **Improvement:** Continuous improvement is essential for maintaining and enhancing quality. This process includes activities such as root cause analysis, corrective action, and preventive action.

Organizations strive to identify areas for improvement, address underlying issues, and prevent recurrence of problems.
