FS-Con-101 Test Questions Answers & Valid FS-Con-101 Test Cost

Practice materials are typically seen as the tools of reviving, practicing and remembering necessary exam questions for the exam, spending much time on them you may improve the chance of winning. However, our FS-Con-101 training materials can offer better condition than traditional practice materials and can be used effectively. We treat it as our major responsibility to offer help so our FS-Con-101 Practice Guide can provide so much help, the most typical one is the efficiency of our FS-Con-101 exam questions, which can help you pass the FS-Con-101 exam only after studying for 20 to 30 hours.

Salesforce Certified Field Service Consultant Sample Questions (Q12-Q17):

NEW QUESTION # 12

To prepare for an upgrade, a mobile technician creates a product request for three circuit boards to be sent from the main warehouse to the customer site. The completed job needs two of the boards. Which two Field Service tools should the technician use to return the unused circuit board to the warehouse? Choose TWO answers

- A. Work Order
- **B. Product Receipt**
- C. Product Transfer
- **D. Return Order**

Answer: B,D

Explanation:

The technician would use a Return Order to create a return for the unused circuitboard. The Return Order would specify the quantity of the product being returned, the reason for the return, and the shipping address.

The technician would then use a Product Receipt to record the receipt of the returned product. The Product Receipt would specify the quantity of the product received, the condition of the product, and the location of the product.

The other two options are incorrect because they are not used to return products. A Work Order is used to track the work that needs to be done on a product or service. A Product Transfer is used to move products from one location to another.

NEW QUESTION # 13

Universal Containers is deploying Field Service Lightning in Europe, where pricing varies by country. What Price Book structure is recommended?

- A. Utilize a standard Price Book specific to each country.
- **B. Utilize a custom Price Book specific to each country.**
- C. Utilize the standard Price Book with pricing rules applied.
- D. Utilize a custom Price Book with pricing rules applied.

Answer: B

Explanation:

A custom Price Book allows different prices for the same products in different markets. A standard Price Book has the same prices for all markets. Pricing rules are not available for Field Service Lightning.

NEW QUESTION # 14

Universal Containers wants to track Technicians' van stock using the Salesforce Field Service mobile app and ensure that Technicians report when parts are used.

Which three data elements should a Consultant recommend tracking to support these requirements?

Choose 3 answers

- **A. Mobile Locations**
- B. Products Required
- C. Warehouse Locations
- **D. Inventory**
- **E. Products Consumed**

Answer: A,D,E

Explanation:

Inventory is used to track product quantities in different locations such as warehouses or vans. Products Consumed are used to report when parts are used by technicians during service appointments and adjust inventory levels accordingly. Mobile Locations are used to track inventory in technicians' vans or trucks using geolocation data from their mobile devices. Warehouse Locations are used to track inventory in fixed locations such as warehouses or depots using address data from their records. Products Required are used to request products from inventory for a service appointment, but do not ensure that technicians report when parts are used.

NEW QUESTION # 15

Northern Trail Outfitters is adding Field Service Schedule Optimization to its Field Service implementation.

Which licensing will be required for the Field Service Schedule Optimization user?

- **A. Salesforce License**
- B. Scheduling License
- C. Resource License
- D. Dispatcher License

Answer: A

Explanation:

This licensing will be required for the Field Service Schedule Optimization user, as it allows accessing Salesforce features and functionality such as optimization jobs and settings. References: https://help.salesforce.com/s/articleView?id=sf.fs_permission_sets.htm&type=5

NEW QUESTION # 16

Universal Containers wants to dispatch emergency work identified throughout the day that needs to be completed before lower-priority work.

What should the Consultant recommend to meet this requirement?

- A. Write a batch Apex class to unschedule low priority work orders.
- B. Create a custom Gantt action to call an Apex class to reschedule appointments.
- C. Define a Global Optimization job to run hourly.
- **D. Apply the Reshuffle action within the Gantt.**

Answer: D

Explanation:

Reshuffle is an action within the Gantt that allows rescheduling multiple service appointments at once based on predefined criteria such as emergency priority, travel time, or skills[209]. Reshuffle would allow Universal Containers to dispatch emergency work identified throughout the day that needs to be completed before lower-priority work by running a reshuffle action that prioritizes emergency work and assigns it to the best available resources[210]. Defining a Global Optimization job to run hourly would not allow Universal Containers to dispatch emergency work identified throughout the day that needs to be completed before lower-priority work. Global Optimization is a feature that allows rescheduling multiple service appointments at once based on predefined criteria such as emergency priority, travel time, or skills[211]. Running a Global Optimization job hourly would not be responsive enough for emergency work identified throughout the day. Creating a custom Gantt action to call an Apex class to reschedule appointments would not be necessary for Universal Containers to dispatch emergency work identified throughout the day that needs to be completed before lower-priority work. Custom Gantt actions are actions within the Gantt that can be customized using Apex code to perform specific tasks such as sending notifications or updating fields[212]. Creating a custom Gantt action would require additional development and maintenance and would not leverage the existing Reshuffle action.

Writing a batch Apex class to unschedule low priority work orders would not allow Universal Containers to dispatch emergency work identified throughout the day that needs to be completed before lower-priority work. Batch Apex is a way of processing large volumes of data asynchronously using Apex code[213].

Writing a batch Apex class would require additional development and maintenance and would not leverage the existing Reshuffle action. References: https://help.salesforce.com/s/articleView?id=sf.fs_gantt_reschedule_overview.htm&type=5
