As long as you have the SAP C-THR81-2505 Certification, you will be treated equally by all countries.

SAP Certified Associate - SAP SuccessFactors Employee Central Core Sample Questions (Q79-Q84):

NEW QUESTION # 79

You want the Timezone field to be pre-populated when the location record is changed in Job Info. How do you configure this?

- A. Base Object: Job Information; Assigned to Location field as onChange
- B. Base Object: Location; Assigned to Timezone field as onChange
- C. Base Object: Location; Assigned to Timezone field as onSave
- D. Base Object: Job Information; Assigned to Timezone field as onChange

Answer: A

Explanation:

To pre-populate the Timezone field when the location record is changed in Job Information, you need to configure the association as follows:

* Base Object: Job Information

* Trigger Event: Assigned to the Location field with the event set to onChange. This configuration ensures that whenever the Location field is updated in Job Information, the system triggers the logic to update and pre-populate the Timezone field based on the associated Location. The onChange event drives this functionality.

NEW QUESTION # 80

How should you build the IF condition to identify the user when the employee is updating their own Personal Information?

Scenario 2: Approvals for Self-Service

3 of 16

How should you build the IF condition when the employee is updating their own Personal Information?

- ☐ This rule is always true. To add an expression please uncheck the Always True checkbox.
- ☒ Personal Information Model.Event Date/Value is equal to Today()
- ☒ Context.Current User is equal to Login User()
- ☐ Context.Current User is not equal to Null

- A. Option D
- B. Option A
- C. Option C
- D. Option B

Answer: C

Explanation:

To identify the user when the employee is updating their own personal information, the IF condition in Option C is correct. This configuration:

Checks if the Context.Current User is equal to the Login User.

Ensures that the rule applies only when the employee is making changes to their own personal data.

This approach is aligned with SAP SuccessFactors logic for self-service scenarios, enabling accurate identification of the user in such workflows.

Scenario 2: Approvals for Self-Service

NEW QUESTION # 81

In which business rule scenario do you use model base objects? Note: There are 2 correct answers to this question.

- A. Trigger Rules for Hire/Rehire
- B. Trigger Rules to Display Internal Job History
- C. Trigger Workflows
- D. Save Changes to Foundation Objects

Answer: A,C

Explanation:

In SAP SuccessFactors Employee Central, model base objects are utilized in business rules for scenarios such as:

A . Trigger Workflows

Model base objects can be used to define conditions that initiate workflows, automating processes based on specific data changes or events.

C . Trigger Rules for Hire/Rehire

During the hire or rehire process, model base objects help in setting default values, validating data, and enforcing business logic to ensure compliance with organizational policies.

Options B and D are not typically associated with model base objects in business rules:

B . Trigger Rules to Display Internal Job History

Displaying internal job history is generally managed through reporting and does not involve model base objects in business rules.

D . Save Changes to Foundation Objects

While foundation objects are essential for organizational data, saving changes to them does not typically require the use of model base objects in business rules.

NEW QUESTION # 82

Which of the following are features of the clean core dashboard? Note: There are 2 correct answers to this question.

- A. Customers can grant access to the dashboard to partners.
- B. Customers can use the dashboard in the dev, test, and production tenants.
- C. It can be used in all SAP S/4HANA Cloud editions.
- D. It can be accessed by using SAP For Me.

Answer: A,D

Explanation:

The clean core dashboard offers tools to monitor and maintain clean core operations.

Access via SAP For Me: The dashboard can be reached through the SAP For Me portal, a customer-centric interface for managing SAP environments.

Partner Access: Customers can grant partners access to the clean core dashboard, allowing collaborative management and monitoring.

The dashboard's functionality in specific tenants (like dev, test, production) or availability across all SAP S/4HANA Cloud editions depends on the specific system configurations.

NEW QUESTION # 83

How do you enable a cost center in the Succession Data Model to be used as a filter in a permission group?

- A. Go to <hris-element="jobInfo"> then add dg-filter="true"

- B. Go to <dg-filters> then add cost-center
- C. Go to <hris-field id="cost-center"> then add filter="true"
- D. Go to <custom-filters> then add cost-center

Answer: B

Explanation:

To enable a cost center in the Succession Data Model for use as a filter in a permission group, you must:

Navigate to the <dg-filters> section within the Succession Data Model.

Add an entry for the cost-center object within the <dg-filters> section.

This action allows the cost center to be selectable as a filter for Dynamic Groups, which are used to define permission groups in Employee Central.

A: Go to <dg-filters> then add cost-center

NEW QUESTION # 84

.....
