

# Certification Microsoft AI-102 Exam Dumps, Valid AI-102 Test Pdf

2026 Latest VCEDumps AI-102 PDF Dumps and AI-102 Exam Engine Free Share: [https://drive.google.com/open?id=11FlpddG4m0ZNVi\\_l0rhsALFjyngLM0G](https://drive.google.com/open?id=11FlpddG4m0ZNVi_l0rhsALFjyngLM0G)

You should keep in mind to pass the AI-102 certification exam is not an easy task. It is a challenging job. If you want to pass the AI-102 exam then you have to put in some extra effort, time, and investment then you will be confident to pass the Designing and Implementing a Microsoft Azure AI Solution (AI-102) exam. With the complete and comprehensive AI-102 exam dumps preparation you can pass the Designing and Implementing a Microsoft Azure AI Solution (AI-102) exam with good scores. The VCEDumps AI-102 Questions can be helpful in this regard. You must try this.

Our website can offer you the latest Microsoft pass guide and learning materials, which enable you pass AI-102 valid exam at your first attempt. Besides, there are AI-102 free braindumps that you can download to learn about our products. Once you decide to buy our test answers, you will be allowed to free update your AI-102 Top Dumps one-year.

## 2026 Certification AI-102 Exam Dumps | Valid Designing and Implementing a Microsoft Azure AI Solution 100% Free Valid Test Pdf

The VCEDumps is a leading platform that has been helping the Microsoft AI-102 exam aspirants for many years. Over this long time period, thousands of Microsoft AI-102 Exam candidates have passed their dream AI-102 certification exam and have become a member of Microsoft AI-102 certification exam community.

Microsoft AI-102 Exam is designed for professionals who want to validate their skills and knowledge in designing and implementing AI solutions on the Microsoft Azure platform. Designing and Implementing a Microsoft Azure AI Solution certification is intended for individuals who have experience in programming languages such as Python, C#, and JavaScript, and are familiar with Azure services such as Azure Cognitive Services, Azure Machine Learning, and Azure Bot Service.

## Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q207-Q212):

### NEW QUESTION # 207

You are building an app that will use Azure AI Language to extract meaning from text messages. You need to provide additional context by adding references to supporting articles in Wikipedia. What should you use?

- A. custom entity extraction recognition (NER)
- B. entity linking
- C. Azure AI Content Safety
- D. key phrase extraction

## Answer: B

Explanation:

Entity linking in Azure AI Language identifies entities in text and links them to entries in a knowledge base such as Wikipedia, providing precisely the additional context and references you need. Custom NER extracts entities but doesn't link to Wikipedia; Content Safety moderates content; Key phrase extraction surfaces topics without external links.

Microsoft References:

- \* Entity linking overview (links entities to Wikipedia). Microsoft Learn
- \* How to call the Entity Linking API (returns entities with Wikipedia links)

## NEW QUESTION # 208

You are building a Language Understanding model for an e-commerce platform. You need to construct an entity to capture billing addresses.

Which entity type should you use for the billing address?

- A. Regex
- B. list
- C. Pattern.any
- D. machine learned
- E. geographyV2

## Answer: D

Explanation:

An ML entity can be composed of smaller sub-entities, each of which can have its own properties. For example, Address could have the following structure:

Address: 4567 Main Street, NY, 98052, USA

Building Number: 4567

Street Name: Main Street

State: NY

Zip Code: 98052

Country: USA

<https://docs.microsoft.com/en-us/azure/cognitive-services/luis/luis-concept-entity-types>

## NEW QUESTION # 209

You have an app that manages feedback.

You need to ensure that the app can detect negative comments by using the Sentiment Analysis API in Azure Cognitive Service for Language. The solution must ensure that the managed feedback remains on your company's internal network.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

□

## Answer:

Explanation:

□

Explanation:

Provision the Language service resource in Azure.

Deploy a Docker container to an on-premises server.

Run the container and query the prediction endpoint.

According to the Microsoft documentation, the Language service is a cloud-based service that provides various natural language processing features, such as sentiment analysis, key phrase extraction, named entity recognition, etc. You can provision the Language service resource in Azure by following the steps in Create a Language resource. You will need to provide a name, a subscription, a resource group, a region, and a pricing tier for your resource. You will also get a key and an endpoint for your resource, which you will use to authenticate your requests to the Language service API.

According to the Microsoft documentation, you can also use the Language service as a container on your own premises or in another cloud. This option gives you more control over your data and network, and allows you to use the Language service without an internet connection. You can deploy a Docker container to an on-premises server by following the steps in Deploy Language containers. You will need to have Docker installed on your server, pull the container image from the Microsoft Container Registry,

and run the container with the appropriate parameters. You will also need to activate your container with your key and endpoint from your Azure resource.

According

to the Microsoft documentation, once you have deployed and activated your container, you can run it and query the prediction endpoint to get sentiment analysis results. The prediction endpoint is a local URL that follows this format: `http://<container IP address>:<port>/text/analytics/v3.1-preview.4/sentiment`. You can send HTTP POST requests to this endpoint with your text input in JSON format, and receive JSON responses with sentiment labels and scores for each document and sentence in your input.

### NEW QUESTION # 210

You have 100,000 images.

You need to build an app that will perform the following actions:

- \* Identify road signs in the images and extract the text on the signs.
- \* Analyze the text to identify well-known locations.

The solution must minimize development effort.

What should you use for each action? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

### NEW QUESTION # 211

You have a Computer Vision resource named contoso1 that is hosted in the West US Azure region.

You need to use contoso1 to make a different size of a product photo by using the smart cropping feature.

How should you complete the API URL? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

### NEW QUESTION # 212

.....

Choosing to participate in Microsoft certification AI-102 exam is a wise choice, because if you have a Microsoft AI-102 authentication certificate, your salary and job position will be improved quickly and then your living standard will provide at the same time. But passing Microsoft certification AI-102 exam is not very easy, it need to spend a lot of time and energy to master relevant IT professional knowledge. VCEDumps is a professional IT training website to make the training scheme for Microsoft Certification AI-102 Exam. At first you can free download part of exercises questions and answers about Microsoft certification AI-102 exam on [www.VCEDumps.com](http://www.VCEDumps.com) as a try, so that you can check the reliability of our product. Generally, if you have tried VCEDumps's products, you'll very confident of our products.
