We boost the top-ranking expert team which compiles our 200-901 guide prep elaborately and check whether there is the update every day and if there is the update the system will send the update automatically to the client. The content of our 200-901 Preparation questions is easy to be mastered and seizes the focus to use the least amount of answers and questions to convey the most important information.

Cisco DevNet Associate Exam Sample Questions (Q298-Q303):

NEW QUESTION # 298

What is the purpose of the Cisco VIRL software tool?

- A. To test performance of an application
- B. To verify configurations against compliance standards
- C. To simulate and model networks
- D. To automate API workflows

Answer: C

NEW QUESTION # 299

When OSPF learns multiple paths to a network, how does it select a route?

- A. It counts the number of hops between the source router and the destination to determine the route with the lowest metric.
- **B. It divides a reference bandwidth of 100 Mbps by the actual bandwidth of the exiting interface to calculate the route with the lowest cost.**
- C. It multiplies the active K values by 256 to calculate the route with the lowest metric.
- D. For each existing interface, it adds the metric from the source router to the destination to calculate the route with the lowest bandwidth.

Answer: B

Explanation:

Section: IP Connectivity

NEW QUESTION # 300

Drag and Drop Question

Drag and drop the descriptions from the left onto the correct application deployment models on the right.

□

Answer:

Explanation:

□

NEW QUESTION # 301

What are two advantages of version control software? (Choose two.)

- **A. It allows new team members to access the current code and history.**
- B. It provides wiki collaboration software for documentation.
- C. It supports tracking and comparison of changes in binary format files.
- D. It allows old versions of packaged applications to be hosted on the Internet
- **E. It supports comparisons between revisions of source code files.**

Answer: A,E

Explanation:

Version control software offers numerous benefits to development teams. Key advantages include:

* Comparisons between revisions of source code files: Version control allows developers to compare different versions of source code files, track changes, and identify what modifications were made and by whom. This is essential for debugging and maintaining code quality.

* Access to current code and history for new team members: New team members can quickly get up to speed by accessing the current version of the code and the entire history of changes. This transparency facilitates onboarding and improves collaboration among team members.
