

C-BCBTP-2502 Testing Engine - C-BCBTP-2502 PDF

Exam Code: C_BCBTP_2502
Total No. of Questions: 30
Passing Percentage: 70
Exam Duration: 60 Min

Positioning SAP Business Technology Platform as part of SAP Business Suite

Question 1

Which of the following can you do with SAP Datasphere? Note: There are 2 correct answers to this question.

- A. Create and consume in-memory caches
- B. Manage user accounts and authorizations
- C. Integrate data from different sources
- D. Provide a unified data and analytics platform

Answer C D

Positioning SAP Business Technology Platform as part of SAP Business Suite

Question 2

What are the main types of APIs commonly used in SAP BTP? Note: There are 2 correct answers to this question.

- A. SOAP APIs
- B. REST APIs
- C. FTP APIs
- D. RPC APIs

Answer A B

Positioning SAP Business Technology Platform as part of SAP Business Suite

Question 3

What are some of the SAP BTP commercial models? Note: There are 2 correct answers to this question.

- A. Modular Pricing
- B. Pay-As-You-Go
- C. Subscription
- D. Named User License

Answer B C

Wenn Ihr Budget beschränkt ist und Sie brauchen vollständiges Schulungsunterlagen, versuchen Sie mal unsere Schulungsunterlagen zur SAP C-BCBTP-2502 Zertifizierungsprüfung von EchteFrage. Sie können Ihren Erfolg in der Prüfung garantieren. EchteFrage ist eine populäre Website für Schulungsmaterialien zur Zeit im Internet. C-BCBTP-2502 Prüfung wird ein Meilenstein in Ihrem Berufsleben sein. Sie ist wichtiger als je zuvor in der konkurrenzfähigen Gesellschaft. Wir versprechen, dass Sie nur einmal SAP C-BCBTP-2502 Prüfung ganz leicht bestehen können. Und Ihre späte Arbeit und Alltagsleben werden sicher interessanter sein. Außerdem können Sie auch neue Gelegenheiten und Wege finden. Es ist wirklich preiswert. Der Wert, den EchteFrage Ihnen verschafft, ist sicher viel mehr als den Preis.

SAP C-BCBTP-2502 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.

Thema 2	• Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.

C-BCBTP-2502 PDF, C-BCBTP-2502 Online Prüfungen

Die Schulungsunterlagen zur SAP C-BCBTP-2502 Zertifizierungsprüfung aus EchteFrage sind nicht nur echt, sondern auch preiswert. Nach dem Kauf unserer Prüfungsmaterialien werden Sie einjährige Aktualisierung genießen. Sie können einen Teil von den kostenlosen originalen Fragen herunterladen, bevor Sie die Schulungsunterlagen zur SAP C-BCBTP-2502 Zertifizierungsprüfung aus EchteFrage kaufen. Wenn Sie die SAP C-BCBTP-2502 Prüfung nicht bestehen oder die Schulungsunterlagen zur SAP C-BCBTP-2502 Zertifizierungsprüfung irgend ein Problem haben, geben wir Ihnen eine bedingungslose volle Rückerstattung.

SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite C-BCBTP-2502 Prüfungsfragen mit Lösungen (Q30-Q35):

30. Frage

Which market trend is driving the adoption of SAP BTP?

- A. Decreasing focus on API-based integrations.
- **B. Increased need for data-driven decision-making.**
- C. Declining use of cloud-based solutions.
- D. Reduced emphasis on business automation.

Antwort: B

Begründung:

One of the most powerful market trends driving the global adoption of SAP BTP is the increased need for data-driven decision-making. In today's hyper-competitive landscape, "gut feeling" is no longer a viable strategy for business leaders. Organizations are sitting on mountains of data, but the challenge lies in extracting actionable insights from it. SAP BTP addresses this trend by providing a unified environment where data management, analytics, and AI converge. This allows businesses to transform raw data into a strategic asset, enabling more accurate forecasting, optimized operations, and enhanced customer experiences. This trend is further accelerated by the "Digital Transformation" movement, where companies are moving away from monolithic, isolated systems toward agile, interconnected platforms. Businesses now demand real-time visibility across their entire value chain- from procurement to sales. SAP BTP's ability to integrate disparate systems and provide a "single source of truth" through SAP HANA Cloud and SAP Analytics Cloud directly addresses this market demand. As companies strive to become "Intelligent Enterprises," they rely on BTP to provide the technical infrastructure that supports continuous innovation, rapid automation, and the ability to pivot their business models based on data-driven evidence rather than historical assumptions.

31. Frage

How does SAP BTP enable businesses to extend their existing SAP applications?

- A. By limiting customization to SAP standard functionalities.
- B. By requiring all applications to be developed from scratch.
- C. By restricting integration with external systems.
- **D. By providing low-code/no-code development tools.**

Antwort: D

Begründung:

A fundamental principle of modernizing the SAP ecosystem is the concept of a "Clean Core." SAP BTP enables this by allowing organizations to build extensions "side-by-side" rather than within the core ERP code (classic "in-app" customization). By providing low-code/no-code development tools, such as SAP Build, the platform empowers both professional developers and "citizen developers" (business users with limited coding knowledge) to create applications that add specific business value without compromising the stability or upgradeability of the core SAP S/4HANA system.

These tools allow for the rapid creation of user interfaces using SAP Fiori elements and the automation of manual tasks through visual drag-and-drop interfaces. This approach is a stark contrast to traditional development, which often required extensive, custom ABAP coding that made system upgrades difficult and expensive. By positioning BTP as the extension layer, SAP ensures that businesses can remain agile and respond quickly to market changes. This flexibility is supported by a robust set of services that facilitate secure communication between the extension and the core system via APIs. Consequently, businesses can innovate at the edge while maintaining a stable, standardized digital core, which is the hallmark of the SAP Business Suite's evolution into the cloud era.

32. Frage

Which SAP BTP capability enables businesses to deploy AI-driven chatbots?

- **A. SAP Conversational AI**
- B. SAP Business Process Intelligence
- C. SAP Fiori
- D. SAP Event Mesh

Antwort: A

Begründung:

To improve user experience and automate customer or employee interactions, SAP BTP offers SAP Conversational AI. This service provides an end-to-end platform for building, training, and monitoring intelligent chatbots (digital assistants). These chatbots utilize Natural Language Processing (NLP) to understand human language, identify user intent, and extract relevant entities from a conversation. Unlike simple rule-based scripts, these AI-driven bots can learn over time and provide a more intuitive, human-like interaction.

In the context of the SAP Business Suite, SAP Conversational AI is positioned as a powerful tool for scaling business operations without increasing headcount. For example, a chatbot can be integrated into SAP S/4HANA to help users check invoice statuses or into SAP SuccessFactors to answer common HR policy questions. This capability shifts the burden of routine inquiries away from human agents to automated systems that are available 24/7. While SAP Fiori provides the visual design language and SAP Event Mesh handles asynchronous messaging between systems, SAP Conversational AI is the specific component responsible for the "intelligence" and "interaction" layers of the platform, enabling a more conversational and efficient enterprise environment.

33. Frage

How does SAP LeanIX support IT landscape management when integrated with SAP BTP?

- A. By preventing real-time integration with business processes.
- **B. By providing enterprise architecture visualization and analysis.**
- C. By restricting governance of IT landscapes.
- D. By enforcing manual IT infrastructure tracking.

Antwort: B

Begründung:

As organizations adopt SAP BTP to build and extend their applications, their IT landscapes can become increasingly complex. SAP LeanIX (now a core part of SAP's enterprise architecture strategy) supports management by providing comprehensive visualization and analysis of the enterprise architecture. When integrated with SAP BTP, LeanIX allows IT leaders to see exactly how different BTP services, cloud applications, and on-premise systems are interconnected. This "map" of the IT landscape is essential for identifying redundant applications, managing technical debt, and ensuring that the IT strategy aligns with business goals.

The positioning of LeanIX alongside BTP is crucial for "Transformation Management." During a move to SAP S/4HANA or a transition to the cloud, LeanIX helps organizations plan their roadmap by showing the impact of changes on the existing architecture. It provides data-driven insights into which applications are critical, which are obsolete, and where there are gaps in security or compliance. By providing this transparency, LeanIX empowers architects to make informed decisions about where to deploy new BTP services. This prevents the "sprawl" of unmanaged cloud services and ensures that the evolution of the SAP Business Suite is organized, cost-effective, and fully aligned with the broader digital transformation objectives of the company.

34. Frage

How does SAP Business AI enhance SAP BTP's capabilities?

- A. By replacing all existing business processes with AI-only solutions.
- B. By restricting AI usage to SAP ERP modules.
- **C. By enabling AI-driven automation and decision-making.**
- D. By eliminating machine learning capabilities.

Antwort: C

Begründung:

SAP Business AI is the strategic layer that infuses intelligence directly into the business applications running on SAP BTP. It enhances the platform's capabilities by enabling AI-driven automation and intelligent decision-making across the entire enterprise value chain. Unlike generic AI, SAP Business AI is trained on industry-specific data and business semantics, ensuring that the insights it provides are relevant to specific corporate functions like finance, supply chain, and HR.

By leveraging services within BTP-such as SAP AI Core and SAP AI Launchpad-Business AI allows organizations to move from manual, reactive processes to proactive, automated ones. For example, it can automate the matching of incoming payments to invoices or predict potential supply chain disruptions before they occur. This positioning is critical for the SAP Business Suite because it doesn't just add a "feature"; it transforms the fundamental nature of the software from a "system of record" to a "system of intelligence." This allows human workers to focus on higher-value strategic tasks while the AI handles high-volume, repetitive data processing and provides data-backed recommendations, thereby significantly increasing organizational agility and competitive advantage.

35. Frage

.....

Mit SAP C-BCBTP-2502 Zertifikat können Sie Ihre Berufsaussichten verbessern und viele neuen Chancen erschließen. EchteFrage ist eine geeignete Website für die Kandidaten, die an der SAP C-BCBTP-2502 Zertifizierungsprüfung teilnehmen. Es wird nicht nur alle Informationen zur SAP C-BCBTP-2502 Zertifizierungsprüfung, sondern Ihnen auch eine gute Lernchance bieten. EchteFrage wird Ihnen helfen, die SAP C-BCBTP-2502 Zertifizierungsprüfung ganz einfach zu bestehen.
