受信任的Adobe AD0-E117: 最新Adobe Experience Manager Architect Master考證 - 最新的PDFExamDumps AD0-E117指南

你是IT人士嗎? 你想成功嗎? 如果你想成功你就購買我們PDFExamDumps Adobe的AD0-E117考試認證培訓資料吧, 我們的培訓資料是通過實踐檢驗了的, 它可以幫助你順利通過IT認證, 有了PDFExamDumps Adobe的AD0-E117考試認證培訓資料你在IT行業的將有更好的發展, 可以享受高級白領的待遇, 可以在國際上闖出一片天地, 擁有高端的技術水準, 你還在擔心什麼, PDFExamDumps Adobe的AD0-E117考試認證培訓資料將會滿足你這一欲望, 我們與你同甘共苦, 一起接受這挑戰。

最新的 Adobe Experience Manager AD0-E117 免費考試真題 (Q52-Q57):

問題 #52

A client's marketing pages are generally slow to load which is causing a significant drop in sales. All other AEM pages load within expected performance guidelines regardless of whether the visitor is being served the desktop or mobile experiences.

The marketing pages typically get slower when multiple external campaigns such as Facebook and AdWords drive traffic to those pages. The page performance tends to dip during high traffic periods. Internal campaign clicks such as those from hero images use similar campaign codes as external campaign traffic.

What should the Architect do to resolve this issue?

- A. Set AEM to use GZIP compression instead of the web server's compression
- **B. Convert the marketing pages to a responsive design instead of an adaptive design**
- C. Add a new dispatcher farm to assist with the client's marketing pages
- D. Modify the dispatcher.any file's section to ignore campaign-based URL parameters

答案: B

問題 #53

In a client's test environment AEM QA Testers from multiple groups and regions are testing and making requests to the AEM application. Due to the sheer number of hosts making connections, an Architect needs a quick and easy way to allow any hosts to make requests to the AEM application.

Which approach should the Architect take to meet this requirement for this non-production environment?

- A. Enable Allow Empty in the Apache Sling Referrer OSGi Configuration
- B. Use Allowlists instead of Blocklists in the Dispatcher Configuration
- C. Restrict Clients that can flush the cache in the Dispatcher Configuration
- **D. Add GET as a Filter Method in the Apache Sling Referrer OSGi Configuration**

答案： D

問題 #54

A customer has an international presence and a strong brand image. The customer considers the exceptional quality images used for both print and on the website to be essential for its business. The customer uses AEM 6.5 managed services with a configuration of 2 dispatchers, 2 publishers, and 1 author.

The original images can weigh up to 500Mb with videos weighing even more. Renditions are generated after files are uploaded to AEM DAM by the Design team so the Authoring team can use them on the website.

The teams report issues with platform stability and slowness. Visitors report that images look pixelated on some screens and pages are very slow to load.

Which two actions should the Architect take to resolve these issues? (Choose two.)

- A. Add more dispatchers and publishers to the AEM configuration
- B. Allocate more memory to ImageMagick and FFmpeg
- C. Train the design team to upload smaller assets and save the originals elsewhere
- **D. Optimize renditions for the different viewports used by the visitors**
- **E. Split AEM Assets and Sites in two different stacks and use Connected Assets**

答案： D,E

解題說明：

"optimizing renditions for different viewports can improve the image quality and page load speed for visitors. Splitting AEM Assets and Sites in two different stacks and using Connected Assets can reduce the load on the author server and improve platform stability".

問題 #55

A large AEM enterprise site is implementing authentication and requires a true optimal load balancing across the site's multi AEM publish instances. Which approach should an Architect take to meet this requirement?

- A. Enable Encapsulated Token Option
- B. Configure the Dispatcher to run with a Dedicated System User
- C. Configure Sticky Connections
- **D. Enable Round Robin processing in Dispatcher configuration**

答案： D

問題 #56

An existing AEM sites platform will receive the latest service pack. The service pack includes functional and non-functional fixes such as security patches. Which action should the Architect take to make sure the update is successful?

- **A. Identify the packages affected by the service pack after installing them into production and monitor them.**
- B. Advise the customer to request Adobe to install the fixes directly on production since they are prechecked.
- C. Install the service pack in staging and ensure that all the bundles are up and running, then deploy to production.
- D. Do a full staging of the service pack including a regression test, if passed, deploy to production.

答案： A

問題 #57

.....

相信在IT行業工作的很多人都希望通過一些IT認證考試獲得到相應的認證證書。一些IT認證證書可以幫助你在競爭
