NEW QUESTION # 77

A Solutions Architect has just completed the Layer 3 configuration for a new campus core switch.

The configuration includes several Switched Virtual Interfaces (SVIs) for inter-VLAN routing and a static default route for internet access. Before handing the solution over to the operations team, the architect needs to perform a final validation of the IP routing setup. The architect needs to verify the following in a single, consolidated view:

* That the directly connected VLAN interfaces (SVIs) are active in the routing table.
* That the static default route is correctly installed and active.
* The IP addresses of any next-hop gateways.

Which of the following validation commands provides this complete overview of the switch's Layer 3 forwarding information?

- A. `show ip route`
