

F5CAB3 Exam Cram Review - Reliable F5CAB3 Exam Question

The F5 F5CAB3 exam dumps in all three formats are compatible with all devices, operating systems, and web browsers and assist you in BIG-IP Administration Data Plane Configuration F5CAB3 exam preparation and you will be ready to crack the F5CAB3 exam easily. Now you have all the necessary information that assists you in take the best decision for your professional career. The best decision is to enroll in the BIG-IP Administration Data Plane Configuration Exam F5CAB3 Certification Exam and download the F5 F5CAB3 pdf questions and practice tests and start preparing today. We are quite confident that you will pass the final BIG-IP Administration Data Plane Configuration F5CAB3 exam easily. Best of luck with exams and your professional career!!!

F5 F5CAB3 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Apply procedural concepts required to modify and manage virtual servers: This domain covers managing virtual servers including applying persistence, encryption, and protocol profiles, identifying iApp objects, reporting iRules, and showing pool configurations.
Topic 2	<ul style="list-style-type: none">Apply procedural concepts required to modify and manage pools: This domain addresses managing server pools including health monitors, load balancing methods, priority groups, and service port configurations.

If you choose to buy the Exams-boost's raining plan, we can make ensure you to 100% pass your first time to attend F5 Certification F5CAB3 Exam. If you fail the exam, we will give a full refund to you.

F5 BIG-IP Administration Data Plane Configuration Sample Questions (Q56-Q61):

NEW QUESTION # 56

A Standard Virtual Server for a web application is configured with Automap for Source Address Translation. The original client IP must be known by backend servers.

What should the BIG-IP Administrator configure?

- A. Performance (HTTP) Virtual Server
- B. HTTP profile to insert X-Forwarded-For
- C. SNAT pool using client IP
- D. HTTP Transparent profile

Answer: B

Explanation:

The X-Forwarded-For header preserves the original client IP when SNAT is enabled.

NEW QUESTION # 57

The BIG-IP Administrator is investigating if better TCP performance is possible for a virtual server. Which built-in profile should be tried first?

- A. f5-tcp-mobile
- B. f5-tcp-legacy
- C. f5-tcp-wan
- **D. f5-tcp-progressive**

Answer: D

Explanation:

F5 provides several pre-configured (built-in) TCP profiles designed to optimize traffic for different network conditions. When an administrator is looking to improve general performance but does not have a specific, narrow use case (like strictly mobile or strictly long-haul WAN), the f5-tcp-progressive profile is the recommended starting point.

The f5-tcp-progressive profile is designed as a modern, high-performance replacement for the older default TCP settings. It incorporates several advanced congestion control algorithms and buffer management techniques that allow it to adapt dynamically to varying network latencies and packet loss scenarios. Unlike f5-tcp-legacy (Option A), which uses older, less efficient stacks, the progressive profile leverages modern TMM (Traffic Management Microkernel) optimizations.

While f5-tcp-mobile (Option B) is highly effective for high-loss cellular networks and f5-tcp-wan (Option D) is optimized for high-latency long-distance links, they can sometimes be too aggressive or poorly suited for standard campus or data center environments. The f5-tcp-progressive profile acts as a "best-of-all-worlds" template that typically provides an immediate performance boost for most web applications by improving window scaling and fast-retransmit behavior. Therefore, it is the procedural "first step" in TCP performance tuning before moving to more specialized, niche profiles.

NEW QUESTION # 58

What is the status of a pool member when manual resume is enabled and a health check first fails and then passes?

- A. Available (Enabled)
- B. Available (Disabled)
- C. Offline (Enabled)
- **D. Offline (Disabled)**

Answer: D

Explanation:

With manual resume enabled, BIG-IP does not automatically return a pool member to service after recovery. The member remains offline until manually re-enabled.

NEW QUESTION # 59

A BIG-IP Administrator adds new pool members into a highly utilized pool. Users report application failures. Which pool-level setting should be checked?

- A. Availability Requirement
- B. Allow SNAT
- C. Action On Service Down
- **D. Slow Ramp Time**

Answer: D

Explanation:

Slow Ramp Time prevents new pool members from receiving full traffic immediately, avoiding overload.

NEW QUESTION # 60

The BIG-IP Administrator is investigating whether better TCP performance is possible for a virtual server. Which built-in profile should be tried first? (Choose one answer)

- A. f5-tcp-mobile
- B. f5-tcp-legacy
- C. f5-tcp-progressive
- D. No option

Answer: C

Explanation:

BIG-IP provides several built-in TCP profiles optimized for different traffic patterns and network conditions. When attempting to improve general TCP performance, the recommended starting point is f5-tcp-progressive.

According to the BIG-IP Administration: Data Plane Configuration documentation:

f5-tcp-progressive is designed as a balanced, general-purpose TCP optimization profile.

It dynamically adjusts TCP behavior to improve throughput and latency for most enterprise applications.

It is the recommended first-choice profile when tuning TCP performance before moving to more specialized profiles.

Why the other options are incorrect:

A . f5-tcp-legacy

This profile exists for backward compatibility and does not include modern TCP optimizations.

C . f5-tcp-mobile

This profile is optimized specifically for high-latency, lossy mobile networks and is not suitable for general-purpose environments.

D . No option

BIG-IP explicitly provides built-in TCP profiles for performance tuning; using none would forgo optimization opportunities.

Correct Resolution:

The administrator should first apply f5-tcp-progressive to evaluate potential TCP performance improvements before considering more specialized profiles.

NEW QUESTION # 61

.....

Our F5CAB3 study materials have a professional attitude at the very beginning of its creation. The series of F5CAB3 measures we have taken is also to allow you to have the most professional products and the most professional services. I believe that in addition to our F5CAB3 Exam Questions, you have also used a variety of products. We believe if you compare our F5CAB3 training guide with the others, you will choose ours at once.
