Microsoft Dynamics 365 Supply Chain Management Functional Consultant Sample Questions (Q89-Q94):

NEW QUESTION # 89

A company uses Dynamics 365 Supply Chain Management. The company plans to add trucks to the existing truck fleet over the upcoming months.

The company requires truck drivers to complete a daily self-inspection of their trucks. The government requires that commercial trucks are inspected annually by a certified repair facility.

The fleet manager wants to minimize the amount of time the truck is in the shop.

* When a truck driver reports a problem during the daily inspection that requires a repair and is within a week of the annual inspection, the company requires that both events occur at the same time in the shop.

* The annual inspection can vary on due date for both new and existing trucks.

You must configure the requirements to minimize truck downtime.

What should you configure for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

NEW QUESTION # 90

A company uses procurement in Dynamics 365 Supply Chain Management.

You need to select the correct system functionalities to meet the company's requirements.

Which system functionalities should you select? To answer, drag the appropriate system functionalities to the correct business requirements. Each system functionality may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 91

You are the sales manager at a distribution company.

You have a drop-ship order for a batch of chemicals that will go directly from your vendor to your customer.

You need to create and process this direct delivery within Dynamics 365 Finance and Operations.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

NEW QUESTION # 92

A company manufactures wood furniture.

Cabinets can be purchased with different wood finishes including oak and maple.

You need to configure a product attribute to characterize the types of cabinet finishes.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

1 - Create an attribute type of type Text and define the different types of wood finishes

2 - Create an attribute associated with an attribute type for Cabinet Finishing

3 - Assign the attribute to the retail category.

NEW QUESTION # 93

A company uses Dynamics 365 Supply Chain Management.

You create a product by using an incorrect product dimension group. The product has not yet been released to the legal entities.

You need to determine whether you can change the product dimension group.

Which two conditions must be met? Each answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. The product master must not be released to any legal entities.
- B. Dimensions must not be specified for the product master.
- C. The item must not already be validated.
- D. Dimensions must be specified that match the original but not the new product dimension group.

Answer: A,B

Explanation:

Changing the product dimension group for a product master

The setup of the product dimension group for a product master can be changed if the product master has not been released, and if no dimensions have been created.

Otherwise, the following rules apply:

If a product master has been shared, the setup of the product dimension group cannot be changed. This rule applies both to the shared instance of the product master and to any company-specific instances.

If a product master is created as a released product master, the product dimension group cannot be changed.

If dimensions have been created for a product master, the product dimension group cannot be changed.

However, if the dimension setup of a new product dimension group is identical to the dimension setup of the original product dimension group, the new product dimension group can be changed.
