So what you still waiting for, go to get new Prep4cram Scrum SAFe-Practitioner exam training materials early.

## Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q146-Q151):

**NEW QUESTION # 146**
What is part of the role of Product Management?

- A. To assign business value to Features
- B. To define Enablers
- C. To prioritize the ART Backlog

**Answer: A**

Explanation:
One of the roles of Product Management is to assign business value to Features. Features are services provided by the system that fulfill stakeholder needs. They are the primary artifact for defining, managing, and prioritizing the work of the Agile Release Train

(ART). Product Management is responsible for defining and prioritizing the features in the Program Backlog, as well as assigning a business value to each feature based on its expected benefits and costs. The business value is used to guide the economic decision-making and trade-offs during PI Planning and execution. Product Management also collaborates with other roles, such as Solution Management, System Architects, and Business Owners, to ensure that the features align with the solution vision and roadmap, and meet the quality standards and nonfunctional requirements. References: Features - Scaled Agile Framework, Product Management - Scaled Agile Framework

## NEW QUESTION # 147
Who directs the Agile team?

- A. The Agile Team is self-organizing
- B. Scrum Master
- C. Project Manager
- D. Product Owner

**Answer: A**

## NEW QUESTION # 148
Which statement correctly describes one aspect of the team's commitment at the end of PI Planning?

- A. A team commits only to the PI Objectives with the highest business value
- B. A team does not commit to uncommitted objectives
- C. A team commits to all the Stories they put on their PI plan
- D. A team commits to all the Features they put on the ART planning board

**Answer: B**

Explanation:
A team's commitment at the end of PI Planning is based on the PI Objectives that they have defined and negotiated with the Business Owners and other stakeholders. PI Objectives are SMART (Specific, Measurable, Achievable, Relevant, and Time-bound) goals that reflect the expected business and technical outcomes for the upcoming PI. A team does not commit to uncommitted objectives, which are stretch goals that may or may not be achieved depending on the actual capacity and velocity of the team. Uncommitted objectives are not included in the vote of confidence or the business value assessment. ## NEW QUESTION # 149
What is one of the dimensions of Lean-Agile Leadership?

- A. Emotional Intelligence
- B. Relentless improvement
- C. Mindset and Principles
- D. Support organizational change

**Answer: C**

Explanation:
= Mindset and Principles is one of the three dimensions of Lean-Agile Leadership, along with Leading by Example and Leading the Change. Mindset and Principles refers to how leaders embed the Lean-Agile way of working in their beliefs, decisions, responses, and actions. Leaders model the expected norm throughout the organization by learning and applying the SAFe Core Values, Lean-Agile Mindset, and SAFe Principles. References: = Lean-Agile Leadership - Scaled Agile Framework, Exam Study Guide: SP (6.0) - SAFe Practitioner

## NEW QUESTION # 150
How does SAFe describe Customer Centricity?

- A. As a mindset focused on Customer behaviors that produce the best innovations
- B. As a strategy to meet the needs of an ever-changing Customer market
- C. As a way of working to include the Customer in daily work processes and planning
- D. As a set of practices employed to make products focused on the Customer

**Answer: A**

Explanation:
Customer Centricity is a mindset that helps organizations make decisions that are based on a deep understanding of its effect on customers and end-users. It motivates teams to focus on the customer, understand their needs, think and feel like them, build whole product solutions, and know their lifetime value.
Customer Centricity is related to Design Thinking, which provides the tools and practices to support creating desirable products that are profitable and sustainable over their lifecycle.
