It-Tests 156-215.82 questions are the best option.

CheckPoint Check Point Certified Security Administrator - R82 Sample Questions (Q84-Q89):

NEW QUESTION # 84

Phase 1 of the two-phase negotiation process conducted by IKE operates in _____ mode.

- A. Quick
- **B. Main**
- C. Authentication
- D. High Alert

Answer: B

Explanation:

Phase 1 of the two-phase negotiation process conducted by IKE operates in Main mode or Aggressive mode². Main mode is more secure than Aggressive mode, as it protects the identities of the peers and uses six messages to establish the IKE SA¹³. Authentication, Quick, and High Alert are not valid modes for IKE phase 1.

NEW QUESTION # 85

Which of the following is NOT a valid deployment option for R80?

- A. SmartEvent
- B. Log server
- C. All-in-one (stand-alone)
- **D. Multi-domain management server**

Answer: D

Explanation:

Multi-domain management server is a valid deployment option for R81, not R80. R80 supports multi-domain security management, which is a centralized management solution for large-scale, distributed environments with many different domain networks¹. Multi-Domain Security Management Administration Guide R80

NEW QUESTION # 86

When URL Filtering is set, what identifying data gets sent to the Check Point Online Web Service?

- A. The URL and server certificate are sent to the Check Point Online Web Service
- B. The URL and IP address are sent to the Check Point Online Web Service
- **C. The host part of the URL is sent to the Check Point Online Web Service**
- D. The full URL, including page data, is sent to the Check Point Online Web Service

Answer: C

Explanation:

When URL Filtering is set, only the host part of the URL is sent to the Check Point Online Web Service for analysis. The host part is the part of the URL that identifies the web server, such as www.example.com. The Check Point Online Web Service uses this information to categorize the URL and return the appropriate action to the Security Gateway. The other options are not sent to the Check Point Online Web Service for analysis, as they may contain sensitive or irrelevant data.

NEW QUESTION # 87

Tom has connected to the Management Server remotely using SmartConsole and is in the process of making some Rule Base changes, when he suddenly loses connectivity. Connectivity is restored shortly afterward. What will happen to the changes already made?

- A. Tom's changes will be lost since he lost connectivity and he will have to start again.
- B. Tom will have to reboot his SmartConsole computer, and access the Management cache store on that computer, which is only accessible after a reboot.
- **C. Tom's changes will have been stored on the Management when he reconnects and he will not lose any of his work.**
- D. Tom will have to reboot his SmartConsole computer, clear the cache, and restore changes.

Answer: C

Explanation:

Tom's changes will have been stored on the Management when he reconnects and he will not lose any of his work. This is because SmartConsole uses a session mechanism that allows users to work offline and save their changes locally until they are ready to publish them to the Management¹³. If Tom loses connectivity, he can resume his session when he reconnects and continue working on his Rule Base changes. He does not need to reboot his SmartConsole computer, clear the cache, or restore changes. His changes will not be lost since he lost connectivity. NEW QUESTION # 88

What is the most recommended installation method for Check Point appliances?

- A. Cloud based installation
- B. DVD media created with Check Point ISOMorphic
- C. SmartUpdate installation
- **D. USB media created with Check Point ISOMorphic**

Answer: D

Explanation:

USB media created with Check Point ISOMorphic is the most recommended installation method for Check Point appliances, as it provides a fast and easy way to install the Gaia operating system and the latest software version⁴. SmartUpdate installation requires an existing Gaia installation and does not support fresh installations⁴. DVD media created with Check Point ISOMorphic is less convenient than USB media, as it requires burning the image to a DVD and inserting it into the appliance⁴. Cloud based installation is not applicable for Check Point appliances, as it is intended for cloud environments such as AWS or Azure⁴.
