Scrum SAFe Product Owner/Product Manager POPM (6.0) 認定 SAFe-POPM 試験問題 (Q45-Q50):

質問 # 45

What is one question that helps Product Management create a Vision?

- A. Which themes are on the Roadmap?
- **B. What problem(s) will the Solution solve?**
- C. What Features must be de-scoped?
- D. How many Features have been released to the Customer?

正解: B

解説:

One of the questions that helps Product Management create a Vision is what problem(s) will the Solution solve for the customers and stakeholders. The Vision is a description of the future state of the Solution under development, and it reflects the needs and expectations of the customers and stakeholders¹. The Vision also provides the context and purpose for the features and capabilities of the Solution². Therefore, Product Management needs to understand the problem(s) that the Solution aims to address, and how it will deliver value and benefits to the customers and stakeholders³.

質問 # 46

What is a PI Planning input that demonstrates how Product Management plans to accomplish the Vision?

- A. The business context
- B. The Team Backlog
- **C. The top ten Features**
- D. The ART planning board

正解: C

解説:

The top ten Features are a PI planning input that demonstrates how Product Management plans to accomplish the Vision. The vision is a description of the future state of the solution under development, reflecting customer and stakeholder needs, as well as the features and capabilities proposed to meet those needs¹. The top ten Features are the highest priority features of the ART backlog, which are derived from the vision and roadmap, and provide the most value to the customers and stakeholders². By presenting the top ten Features to the Agile Release Train (ART) during PI planning, Product Management communicates the main objectives and scope of the upcoming Program Increment (PI), and guides the teams to plan their work accordingly². The top ten Features also

help align the teams and stakeholders to a shared mission and vision, and foster cross-team and cross-ART collaboration².

質問 # 47

Which of the following events shows how well the ART is progressing toward meeting the PI Objectives?

- A. PO Sync
- **B. Inspect and Adapt**
- C. Backlog Refinement
- D. PI Planning

正解: **B**

解説:

The event that shows how well the Agile Release Train (ART) is progressing toward meeting the Program Increment (PI) objectives is the Inspect and Adapt (I and A) event. The Inspect and Adapt event occurs at the end of each PI and provides an opportunity for the entire ART to reflect on the progress made during the PI, identify and address the root causes of any impediments, and plan for improvement actions in the next PI¹.

質問 # 48

What is one tool that visualizes Features representing a workflow?

- A. Continuous Delivery Pipeline
- B. Team Kanban
- C. User Experience Design
- **D. Story Maps**

正解: **D**

解説:

Explanation

A story map is a tool that visualizes features representing a workflow. A story map is a two-dimensional arrangement of user stories that shows the relationship between the user activities and the features that support them¹. A story map helps the team to understand the user journey, prioritize the features based on value and dependencies, and plan the releases and iterations².

質問 # 49

What helps visualize work during PI Planning?

- **A. ART Planning Board**
- B. ART PI Kanban Board
- C. ART PI Objectives
- D. ART PI Risks

正解: **A**

解説:

Explanation

The ART Planning Board is a physical or virtual board that helps visualize the work of the Agile Release Train (ART) during PI Planning. It shows the features and dependencies for each team and iteration in the Program Increment (PI)¹. The ART Planning Board helps the teams and stakeholders to see the big picture, identify and resolve issues, and collaborate on the delivery plan².
