Salesforce Certified B2C Commerce Cloud Developer Sample Questions (Q65-Q70):

NEW QUESTION # 65

Universal Containers calls the following combination of products "The Basics" and sells the combination as a unique product ID:

One Model 103 container

Five Model 611 container

Tree Model 201 container

The Developer created these three products in the catalog.

What is the next step in Business Manager to create "The Basics" as a combination?

- A. In the Product Sets module, create a product set named "The Basics".
- B. In the Product Bundles module, create a bundle named "The Basics".
- **C. In the Products module, create a product named "The Basics" and add the products to the Product Bundles tab.**
- D. In the Products module, create a product named "The Basics" and add the products to the Product Sets tab.

Answer: C

NEW QUESTION # 66

A developer is writing a server side script that needs to maintain state across calls. The persistent information needed includes these items.

* The current customer

* Whether or not the customer is authenticated

* The privacy attributes (such as tracking consent or cookie policy)

Which technique should the developer use to maintain state in an efficient and scalable manner that follows best practice?

- **A. Use the Session class in the B2C Commerce api.**
- B. Use an SFRA controller, because it runs server-side, the state is automatically maintained
- C. Use a non-replicable Custom Object to store the information temporarily.
- D. Use a client-side cookie to store the information for the session duration.

Answer: A

NEW QUESTION # 67

When looking at Custom Object instances for a site, a merchant notices that the creation date is not showing up on the instances in Business Manager.

Where should the developer add this attribute to the Custom Object so it is visible for the merchant to see in Business Manager?

- A. Mark the existing creation date attribute as visible.
- B. Assign the current date/time to a new custom attribute, creationDate, via code.
- **C. Add the creation date to the attributes of the Custom Object.**
- D. Add the creation date to the attribute group for the Custom Object.

Answer: C

NEW QUESTION # 68

Universal Containers created a site export file from staging in the global export directory. How should the Digital Developer update their sandbox using this staging site export file?

- A. Download the site export file and use UX Studio to transfer the data to the sandbox.
- B. Use the Site Development > Import & Export Business Manager module.
- **C. Use the Site Development > Site Import & Export Business Manager module.**
- D. Perform a data replication from staging.

Answer: C

NEW QUESTION # 69
