- A. What's New Viewer Tool
- **B. SAP Signavio Process Navigator Tool**
- C. Release Assessment and Scope Dependency Tool
- **D. Test Automation Tool**

Answer: B,D

NEW QUESTION # 47

What defines the organizational entities that are required in SAP Central Business Configuration?

Note:

There are 2 correct answers to this question

- **A. The selected deployment target**
- B. Added partner content
- C. System consistency checks
- **D. The selected scope**

Answer: A,D

Explanation:

The organizational entities that are required in SAP Central Business Configuration are defined by the selected deployment target and the selected scope. The deployment target specifies which SAP cloud solutions are included in the project, such as SAP S/4HANA Cloud, public edition. The scope specifies which business processes and countries/regions are included in the project, such as sales or professional services.

These choices determine which organizational units are required to run the underlying processes, such as company, business residence, sales organization, or project unit. Added partner content and system consistency checks do not define the organizational entities, but rather enhance or validate the configuration. References = SAP Central Business Configuration - Overview, page 5; Introducing SAP Central Business Configuration In SAP Central Business Configuration, the organizational entities that need to be defined for an SAP S

/4HANA Cloud Public Edition implementation are influenced by two primary factors: the selected deployment target and the selected scope. The deployment target refers to the specific environment or system where SAP S/4HANA Cloud will be implemented. This choice can affect which organizational entities are necessary based on the technical and business requirements of

that environment. The selected scope, on the other hand, pertains to the business processes and functions that the company intends to use within SAP S

/4HANA Cloud. This determines the organizational structures, such as company codes, sales organizations, and purchasing organizations, that need to be set up to support the scoped processes. Both factors are integral to ensuring that the configuration supports the business's operational needs and strategic objectives.

NEW QUESTION # 48

After integration requirements have been finalized, what is used to analyze, design, and document the integration strategy?

- A. Integration and API List
- B. SAP Cloud ALM Requirements app
- C. SAP Business Accelerator Hub
- D. Integration Solution Advisory Methodology

Answer: D

NEW QUESTION # 49

Which of the following requirements need to be documented in SAP Cloud ALM during the Fit-to-Standard workshops? Note: There are 2 correct answers to this question.

- A. A process flow diagram
- B. An SAP Fiori app customization
- C. A configuration value
- D. A business logic enhancement

Answer: B,D
