

# Microsoft MB-335 Download | MB-335 100% Correct Answers

What's more, part of that PrepAwayExam MB-335 dumps now are free: <https://drive.google.com/open?id=1Gf6mMAS5JBjhaoSSboA5uHqFzMRBefE>

PrepAwayExam aims to assist its clients in making them capable of passing the Microsoft MB-335 certification exam with flying colors. It fulfills its mission by giving them an entirely free Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) demo of the dumps. Thus, this demonstration will enable them to scrutinize the quality of the Microsoft MB-335 study material.

To prepare for the Microsoft MB-335 Certification Exam, Microsoft recommends that you have a fundamental understanding of supply chain management concepts and some experience with Microsoft Dynamics 365. Microsoft also offers various training courses and resources to help you prepare, including instructor-led courses, self-paced training modules, and online communities.

Microsoft MB-335 certification is a highly coveted certification for professionals working in supply chain management. By obtaining this certification, candidates demonstrate their expertise in configuring and managing supply chain processes using Dynamics 365. Moreover, the certification showcases their ability to optimize business processes and enhance customer satisfaction by delivering goods and services efficiently and effectively.

## MB-335 Actual Exam & MB-335 Exam Guide & MB-335 Practice Exam

By reviewing these results, you will be able to know and remove your mistakes. These MB-335 practice exams are created as per the pattern of the Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) real examination. Therefore, Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) mock exam takers will experience the real exam environment. It will calm down their nerves so they can appear in the MB-335 final test without anxiety or fear.

## Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q91-Q96):

### NEW QUESTION # 91

A company uses Process manufacturing.

You need to review formulas and how the different ingredient types impact the batch balancing process. Which ingredient types should you use? To answer, drag the appropriate ingredient types to the correct scenarios. Each ingredient type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

**Explanation:**

Explanation:

□

### NEW QUESTION # 92

A manufacturer is implementing Dynamics 365 Supply Chain Management with warehouse management processes (WMS). Warehouse workers use hand-held devices to pick and stage batch-tracked products for production. The warehouse manager requires that products are removed from on-hand inventory and consumed when they are picked and staged for production. You need to remove the products from on-hand inventory.

What should you configure?

- A. manufacturing execution, job card device
- B. mobile device menu item, start production order
- C. flushing principle, start
- D. flushing principle, available at location

**Answer: C**

Explanation:

The flushing principle is a setting that determines how and when the raw materials are consumed from inventory and registered as work in progress (WIP) for production orders and batch orders<sup>1</sup>. The flushing principle can be configured at the product level, the bill of materials (BOM) or formula line level, or the production order or batch order line level<sup>1</sup>.

The Start flushing principle indicates that the material will be automatically consumed when the production order is started<sup>1</sup>. The amount of material that is consumed is proportional to the quantity that is started. This principle is relevant if, for example, the variance in the consumption is low, the materials are low-value materials, there are no tracking requirements, or there's a short run time on operations<sup>1</sup>.

In this scenario, the warehouse manager requires that products are removed from on-hand inventory and consumed when they are picked and staged for production. Therefore, the Start flushing principle should be configured for the batch-tracked products. This way, the products will be deducted from inventory and set to WIP as soon as the production order is started on the hand-held device.

### NEW QUESTION # 93

A bicycle manufacturing company is implementing Dynamics 365 Supply Chain Management.

The warehouse must pick and stage parts other than paint for bicycle assembly. Paint is at the production station.

You need to configure the reservations for production.

What should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

**Answer:**

Explanation:

□

Explanation:

To configure the reservations for production, you should do the following:

\* Define configuration for paint reservation: You should configure the Item model group for paint. The Item model group determines the inventory policies for an item, such as reservation, tracking, and costing<sup>1</sup>. You can set the reservation policy for paint to FIFO date-controlled, which means that the inventory reservation is controlled by a sorting date according to the FIFO principle<sup>2</sup>. You can also set the Backward from ship date option, which means that the inventory reservation is controlled by the last update physical date according to the FIFO rule<sup>2</sup>.

\* Define the reservation principle for paint: You should set the reservation principle to Start. This means that inventory is reserved when production starts<sup>3</sup>. This way, you can ensure that paint is available at the production station when needed

### NEW QUESTION # 94

You need to determine the batch values on the combined mix batches for OperatorA.

Which values should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

**Answer:**

Explanation:
