## Salesforce Certified Omnistudio Consultant Sample Questions (Q141-Q146):

### NEW QUESTION # 141

A solution architect is working on a digital transformation project for a client. The client has complex business requirements that need to be implemented using Omnistudio tools. The solution architect needs to decide which Omnistudio tool to use.

Which Omnistudio tool should the solution architect use to automate the client's business processes and create guided interactions using data from the Salesforce org and external sources?

- A. Expression Sets
- **B. Omniscripts**
- C. Flexcards
- D. Integration procedures

**Answer: B**

Explanation:

\* OmniScripts (D) are designed to automate complex business processes and guide users through interactions using both Salesforce and external data sources.

\* They can fetch data dynamically, apply business logic, and execute actions such as record updates, API calls, or guided user inputs.

\* OmniScripts integrate seamlessly with DataRaptors, Integration Procedures, and FlexCards to provide a complete business

solution.

\* A. Integration Procedures - These are used for server-side processing and API calls, but they do not provide user interaction like OmniScripts.

\* B. FlexCards - These display data but do not automate guided interactions.

\* C. Expression Sets - These are used for calculations and business rules, but they do not provide guided interactions.

Comprehensive and Detailed In-Depth Explanation: Why not the other options?? Salesforce OmniStudio Reference:

\* OmniScripts Overview

\* Using OmniScripts to Automate Business Processes

### NEW QUESTION # 142

A company begins a project to unify its customer data across the enterprise. After completing the discovery and analysis phases of the project, the project team recommends FlexCards as the primary solution. The stakeholder of the project are excited to move forward with this recommendation. However, IT is concerned that creating FlexCards will require custom coding and advanced technical skills they do not have on their team.

Which two features should the consultant highlight to address IT's concerns?

Choose 2 answers

- A. Newport Design System used in FlexCards
- B. Lightning web components used in FlexCards
- C. The FlexCard Wizard
- D. The FlexCard Designer

**Answer: B,D**

Explanation:

The two features that the consultant should highlight to address IT's concerns are Custom Styles and FlexCard Designer. Custom Styles are a feature that allows applying custom CSS properties to an OmniScript or a FlexCard element. Custom Styles do not require any coding skills, and can be easily configured using a graphical interface. FlexCard Designer is a tool that allows creating and editing FlexCards using a drag-and-drop interface. FlexCard Designer also does not require any coding skills, and can be used by anyone who has access to OmniStudio tools.

### NEW QUESTION # 143

A telecommunications company wants to create a 360° view of their customers, including all customer installed products grouped by service address. During the discovery phase of the project, the consultant identifies that installed products can have 4 different statuses. Agents complete different processes, depending on status of installed product. The consultant creates an inventory of all statuses and processes as shown below.

\* Status = Active

o Pay bill

o Review usage

o Cancel service

\* Status = Suspended

o Pay bill

o Reconnect service

o Cancel service

\* Status = Pending installation

o Set up billing

o Schedule installation

o Cancel installation

\* Status = Canceled

o Reconnect service o Cancel service

\* Status = Pending installation

o Set up billing

o Schedule installation

o Cancel installation

\* Status = Canceled

o Pay bill

o Disconnect service

o Reconnect service

Which two FlexCard features should the consultant use to meet these requirements?

Choose 2 answers

- **A. States**
- B. Custom Style
- **C. OmniStudio Action**
- D. Flyout

**Answer: A,C**

Explanation:

The two FlexCard features that the consultant should use to meet these requirements are States and OmniStudio Action. A State is a condition that determines how a FlexCard displays data and actions based on certain criteria. The consultant can use States to filter the installed products by their status and display different fields and actions accordingly. An OmniStudio Action is a button that can invoke an OmniScript or an Integration Procedure from a FlexCard. The consultant can use OmniStudio Actions to enable the agents to complete different processes for each installed product, such as pay bill, cancel service, etc

#### **NEW QUESTION # 144**

which two of the following use cases are best solved using Calculation Procedures & Matrices?

Choose 2 answers

- A. To retrieve text data and convert it to an integer
- **B. To return output that is calculated differently based on the date**
- C. To determine the list of products to display to a customer
- **D. To apply the correct factor when determining a cost**

**Answer: B,D**

Explanation:

The two use cases that are best solved using Calculation Procedures & Matrices are: To apply the correct factor when determining a cost and To return output that is calculated differently based on the date. A Calculation Procedure is a tool that can perform complex calculations based on multiple input and output variables. A Calculation Matrix is a tool that can perform complex calculations based on multiple input variables and output values within groups. The consultant can use Calculation Procedures & Matrices to solve these use cases, because they involve applying rules and formulas to different data values and scenarios

#### **NEW QUESTION # 145**

A business has a project that must be completed soon in order to meet important deadlines. However, the developer on the project has left the company, and the new team on the project has decided to use OmniStudio tools. The development work completed so far was done using APEX code. The new team must complete the project following these guidelines:

\* Minimize implementation time

\* Ensure end-user processes are as simple as possible

\* Find a way to ensure optimal UX

In this scenario, what two actions should the consultant recommend to the project team? Choose 2 answers

- A. Replace existing APEX using DataRaptors and HTTPActions
- B. Use existing APEX classes as data sources
- **C. Implement FlexCards and OmniScripts for the front-end**
- D. Create new LWC templates for branding and styling

**Answer: C**

Explanation:

The two actions that the consultant should recommend to the project team are replace existing APEX using DataRaptors and HTTPActions, and implement FlexCards and OmniScripts for the front-end. Replacing existing APEX using DataRaptors and HTTPActions would reduce implementation time, as these tools are declarative and do not require coding. Implementing FlexCards and OmniScripts for the front-end would ensure end-user processes are as simple as possible, as these tools provide guided interactions and contextual data. Creating new LWC templates for branding and styling would increase implementation time, as this would require coding and testing. Using existing APEX classes as data sources would not ensure optimal UX, as this would limit the flexibility and scalability of the solution.

## NEW QUESTION # 146

.....

Holding a Salesforce Certified Omnistudio Consultant Plat-Con-201 Certification in a certain field definitely shows that one have a good command of the Plat-Con-201 knowledge and professional skills in the related field.
