## CheckPoint Check Point Certified Security Expert - R82 Sample Questions (Q113-Q118):

### NEW QUESTION # 113

During the policy installation, the CPM process needs to make a decision for Full Installation Policy or Fast Installation Policy. Depending on the decision the CPM process decides what kind of dump will be used. Which statement is true for the Fast Installation Policy?

- A. Modern Dump always combines the Legacy Dump in which the pre-verified and pre-generated code is included
- B. Modern Dump files are sent to the FWM (Firewall) process, which is responsible for code generation and compilation
- C. Modern Dump files already include the pre-verified and pre-generated code
- D. Modern Dump files never include the pre-verified and pre-generated code

**Answer: C**

Explanation:

For a Fast Installation Policy, Modern Dump is used and it already contains pre-verified and pre-generated compiled policy code,

allowing the gateway to load the policy directly without additional compilation, which significantly speeds up installation.

#### NEW QUESTION # 114

Alice & Bob are concurrently logged in to the SmartConsole under Logs & Servers to check for the IKE "Key Install" between a working VPN Site-to-Site Tunnel between site Alpha and site Bravo. Which of the following IKE versions are available?

- A. IKEv1 & IKEv3
- B. IKE
- C. IKEv2 & IKEv4
- **D. IKEv1 & IKEv2**

**Answer: D**

Explanation:

Check Point supports Internet Key Exchange versions 1 and 2 for VPN negotiations, and both versions are visible in SmartConsole logs when monitoring key exchange and tunnel establishment events.

#### NEW QUESTION # 115

What is false regarding prerequisites for the Central Deployment usage?

- A. Security Gateway must have the latest CPUSE Deployment Agent
- B. The administrator must have write permission on SmartUpdate
- **C. No need to establish SIC between gateways and the management server, since the CDT tool will take care about SIC automatically**
- D. The Security Gateway must have a policy installed

**Answer: C**

#### NEW QUESTION # 116

In Management HA, changes in policy and object are performed through the active server. What happens if the active server fails or is taken offline?

- **A. A changeover can be initiated manually to make a standby server become active**
- B. One of the standby servers must be promoted to Primary Management Server to make it active
- C. The standby server with the highest priority set by the administrator automatically becomes active
- D. The closest standby server will immediately become active within 3 seconds

**Answer: A**

Explanation:

In Management High Availability, failover is manual by default, so if the active server fails or is taken offline, an administrator must manually initiate a changeover to promote a standby server to become the active server.

#### NEW QUESTION # 117

While enabling the Identity Awareness blade the Identity Awareness wizard does not automatically detect the windows domain. Why does it not detect the windows domain?

- **A. SmartConsole machine is not part of the domain**
- B. Security Gateway is not part of the Domain
- C. Security Management Server is not part of the domain
- D. Identity Awareness is not enabled on Global properties

**Answer: A**
