CSI Canadian Securities Course Exam2 Sample Questions (Q146-Q151):

NEW QUESTION # 146

Which ratio gauges a company's ability to repay its debts using funds generated from operating activities?

- A. Interest coverage.
- B. Cash flow-to-total debt**
- C. Asset coverage.
- D. Debt-to-equity

Answer: B

Explanation:

The cash flow-to-total debt ratio assesses a company's ability to repay its debts using cash generated from its operating activities. It is calculated by dividing operating cash flow by total debt. A higher ratio indicates better capacity to cover debts. This metric is crucial for evaluating financial health and understanding a firm's liquidity position. Other ratios listed have different focuses:

* Interest coverage(B) measures a company's ability to pay interest with operating income.

* Asset coverage(C) measures the protection provided to creditors.

* Debt-to-equity(D) evaluates capital structure but not immediate debt repayment ability.

A telephone call with an advisor ensures the portfolio generated by the algorithm aligns with the client's risk tolerance and investment objectives. This step helps meet regulatory suitability requirements.

- * A. The service is exclusively provided to intermediaries such as advisors and employers: Robo-advisors are directly available to retail clients and are not exclusive to intermediaries.
