In order to strengthen your confidence for Salesforce Sharing-and-Visibility-Architect Exam Dumps, we are pass guarantee and money back guarantee.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q21-Q26):

NEW QUESTION # 21

Universal Containers has enabled External Default Sharing and wants to allow for external users to have the External Sharing Default set to Public Read-Only for a custom object. Which two options are valid Internal Default sharing settings for the custom object?

- A. Controlled by Parent
- B. Public Read Only
- C. Private
- D. Public Read/Write

Answer: B,D

Explanation:

Explanation

The Internal Default sharing settings for a custom object can be either Public Read/Write or Public Read Only if the External Default sharing setting is set to Public Read Only. Controlled by Parent and Private are not valid options because they would not allow external users to access the custom object records.

NEW QUESTION # 22

Universal Containers (UC) implemented Sales Cloud and requested that only certain branch staff trained to sell high risk products can create opportunities for high risk products.

In which two ways can an Architect allow only specific branch staff to sell high risk products?

Choose 2 answers

- A. Configure Price Book Organization wide default to No Access.
- B. Share (High Risk) price book with the trained staff via sharing rule.
- C. Share (High Risk) price book with the trained staff via manual sharing.
- D. Set Price Book Organization Wide Default to View Only and share the price book (High Risk) with the trained staff.

Answer: C,D

Explanation:

Explanation

Price books are a way to store different prices for products that can be added to opportunities. Price books can have different organization-wide defaults (OWD) settings that control the baseline level of access for users. To allow only specific branch staff to sell high risk products, the architect can recommend setting the price book OWD to View Only and sharing the high risk price book with the trained staff via manual sharing or sharing rules. Manual sharing allows the owner or anyone with Full Access to a record to share it with another user or group of users. Sharing rules allow the admin to automatically grant access to records based on certain criteria.

Therefore, the answer A and C are correct and the other options are incorrect.

NEW QUESTION # 23

Which advanced tool should Salesforce enable for large-scale Role Hierarchy realignments?

- A. Granular Locking
- B. Skinny Table Indexing
- C. Partitioning by Divisions

Answer: A

NEW QUESTION # 24

Which features does Salesforce provide for restricting login access to the application?

Choose 2 answers.

- A. Organization-wide login hour restrictions
- B. Profile-based login hour restrictions
- C. Role-based IP restrictions
- D. Profile-based IP restrictions

Answer: B,D

Explanation:

Explanation

Profile-based login hour restrictions and profile-based IP restrictions are two features that Salesforce provides for restricting login access to the application. These features allow administrators to specify when and from where users can log in to Salesforce based on their profiles. Role-based IP restrictions and organization-wide login hour restrictions are not valid features in Salesforce.

NEW QUESTION # 25

Jane, a support representative at Universal Containers, created a report to view all her open cases that have been created in the past 7 days and saved the report in the "Private Reports" folder.

Who can view and run the report?

- A. The report owner and users with the "View All Data" permission
- B. The report owner and anybody in the role hierarchy above the report owner
- **C. The report owner**
- D. The report owner and any users who have been given access to the "My Private Reports" folder

Answer: C

Explanation:

Explanation

The report owner is the only one who can view and run the report that is saved in the "Private Reports" folder.

Option A is incorrect, since there is no such thing as the "My Private Reports" folder in Salesforce. Option B is incorrect, since the role hierarchy does not affect the access to private reports. Option D is incorrect, since the "View All Data" permission does not grant access to private reports.

NEW QUESTION # 26

.....
