Valid H35-211_V2.5 Exam Pass4sure - Practical H35-211_V2.5 Information

The PDF version of our H35-211_V2.5 guide quiz is prepared for you to print it and read it everywhere. It is convenient for you to see the answers to the questions and remember them. After you buy the PDF version of our H35-211_V2.5 study material, you will get an E-mail form us in 5 to 10 minutes after payment.Once any new question is found, we will send you a link to download a new version of the H35-211_V2.5 training engine. So don't worry if you are left behind the trend.

now our H35-211_V2.5 training materials have become the most popular H35-211_V2.5 practice materials in the international market. There are so many advantages of our study materials, and will show you some of them for your reference. First and foremost, our company has prepared H35-211_V2.5 free demo in this website for our customers. Second, it is convenient for you to read and make notes with our PDF version. So let our H35-211_V2.5 practice materials to be your learning partner in the course of preparing for the H35-211_V2.5 exam, especially the PDF version is really a wise choice for you.

Pass Guaranteed Quiz 2026 Huawei The Best H35-211_V2.5: Valid HCIP-Access V2.5 Exam Pass4sure

After you purchase our H35-211_V2.5 study material, you must really absorb the content in order to pass the exam. Our H35-211_V2.5 guide quiz really wants you to learn something and achieve your goals. And it is easy and convenient for you to make it.

For we have three versions of the H35-211_V2.5 Exam Questions for you to choose: the PDF, Software and APP online. So that you can study at any time you like. And the content of the H35-211_V2.5 learning braindumps is also simplified for you to easily understand.

Huawei HCIP-Access V2.5 Sample Questions (Q28-Q33):

NEW QUESTION # 28
(Single) When deploying home and guest services in a PON system, which of the following services has the highest priority?

- A. INTERNET
- B. GAME
- C. IPTV
- D. VOIP

Answer: D

Explanation:
In access networks, Huawei recommends prioritizing real-time voice (VoIP) traffic with the highest forwarding priority (typically EF, 802.1p 5) to ensure low latency and jitter. IPTV/video is generally next (AF classes), while gaming and general Internet browsing are treated lower than voice. Therefore, VOIP receives the top priority to protect call quality under congestion.
References: HCIP-Access V2.5 - QoS Service Planning on PON; Huawei OLT QoS Feature Guide - Traffic Classes and 802.1p/DSCP Mapping.

NEW QUESTION # 29
Type B protection provides redundant protection for both OLT PON ports and feeder (backbone) fibers.
When the OLT PON port or feeder fiber fails, manually switch to the other optical path.

- A. True
- B. False

Answer: B

Explanation:
Type B protection (OLT-side + feeder protection via 2×2 optical splitter) is designed for automatic protection switching (APS) upon detecting faults such as LOS/LOF on the working port or feeder. The system automatically switches to the standby PON port/feeder without manual intervention (manual cutover is optional but not required for protection).
(Reference: HCIP-Access V2.5 - GPON Type A/B/C protection definitions, trigger conditions, and APS behavior.)

NEW QUESTION # 30
The ports in an OLT upstream protection group must be in the same protection group, and the same port cannot belong to different protection groups.

- A. TRUE
- B. FALSE

Answer: A

Explanation:
For OLT uplink (NNI) protection groups (timedelay/weight, etc.), Huawei requires that each physical port belongs to one protection group only to avoid conflicting switchover control. A member port cannot be part of multiple protection groups simultaneously.
References: HCIP-Access V2.5 Study Guide - OLT Uplink (NNI) Port Protection Configuration Rules and Constraints.

NEW QUESTION # 31
(Radio) The 10G GPON system uses XGEM frames to encapsulate data, and the Port-ID is defined in the XGEM header as () bits.

- A. 0
- B. 1
- C. 2

- D. 3

Answer: B

Explanation:
XG-PON (10G GPON) adopts XGEM framing. Compared with GPON's 12-bit GEM Port-ID, XGEM expands the Port-ID field to 16 bits, increasing the number of logical data flows that can be identified per ONU/OLT and improving service granularity. Hence the correct length is 16 bits.
References: HCIP-Access V2.5 - XG-PON/XGEM Frame Structure; Huawei XG-PON Technology White Paper and Product Description - XGEM Header Fields.

NEW QUESTION # 32
(Radio) In the FTTB/C scenario, ONU is used as an AG device to access the phone, and there is no possible cause of sound failure for SIP protocol off-hook

- A. The voice server is down
- B. ONU and IMS routes are unreachable
- C. The ONU side MG interface status is abnormal
- D. There are packet losses in the olt upper-layer network

Answer: C

NEW QUESTION # 33
.....

For a guaranteed path to success in the HCIP-Access V2.5 (H35-211_V2.5) certification exam, Prep4King offers a comprehensive collection of highly probable Huawei H35-211_V2.5 Exam Questions. Our practice questions are meticulously updated to align with the latest exam content, enabling you to prepare efficiently and effectively for the H35-211_V2.5 examination. Don't leave your success to chance—trust our reliable resources to maximize your chances of passing the Huawei H35-211_V2.5 exam with confidence.
