CheckPoint 156-536 Exam Questions always provide ease to their consumers. therefore, the committed team is present around the clock to fix any problem.

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q77-Q82):

NEW QUESTION # 77

What does the Check Point Support Center as your one-stop portal offer?

- A. UserMates offline discussion boards
- B. Technical Certification
- C. SecureKnowledge technical database
- D. Offloads

Answer: C

NEW QUESTION # 78

To enforce the FDE policy, the following requirement must be met?

- A. A recovery file must be encrypted
- B. The client must obtain an FDE machine-based policy
- C. The client must obtain an FDE certificate
- D. Deployments must consist of at least one post-boot user

Answer: B

NEW QUESTION # 79

What connect options does the connection Awareness support?

- A. There are two options: Connected and Disconnected
- B. Master and Slave Endpoint Security Management Server.
- C. Client and Server model based on Idap model. The supported ports are 389 and 636.
- D. There are two options: Connected to Management and Connected to a List of Specified Targets.

Answer: D

NEW QUESTION # 80

What does the Check Point Support Center as your one-stop portal offer?

- A. UserMates offline discussion boards
- B. Technical Certification
- C. SecureKnowledge technical database
- D. Offloads

Answer: C

Explanation:

The Check Point Support Center serves as a centralized portal providing access to the SecureKnowledge technical database, which is a comprehensive resource containing technical articles, solutions, and troubleshooting guides essential for managing Check Point products, including Harmony Endpoint. This is explicitly supported by the CP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdf on page 3 under "Important Information," where it states, "Check Point R81.20 Harmony Endpoint Server Administration Guide For more about this release, see the R81.20 home page," implying a connection to broader support resources like SecureKnowledge, a well-known feature of Check Point's support infrastructure. Option C is the correct choice as it directly aligns with this functionality. The other options are less relevant: Option A ("UserMates offline discussion boards") appears to be a typographical error or misunderstanding, possibly intended as "UserCenter," but even then, it does not match the Support Center's primary offerings, and offline discussion boards are not mentioned in the document. Option B ("Technical Certification") pertains to training and certification programs, not the Support Center's core purpose. Option D ("Offloads") is not a recognized term in this context within the documentation or Check Point terminology, rendering it incorrect. Thus, the SecureKnowledge technical database is the verified offering of the Support Center.
