C_S4PM_2504 Testking Exam Questions, Reliable C_S4PM_2504 Exam Voucher

Passing an exam requires diligent practice, and using the right study SAP Certification Exams material is crucial for optimal performance. With this in mind, SurePassExams has introduced a range of innovative C_S4PM_2504 Practice Test formats to help candidates prepare for their C_S4PM_2504.

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q33-Q38):

NEW QUESTION # 33
What are some purposes of using Business Driven Configuration Questionnaires (BDCQs) during the implementation of SAP S/4HANA Cloud Public Edition? Note: There are 2 correct answers to this question.

- A. To ensure the appropriate level of business context for the Fit-to-Standard workshop
- B. To gather configuration values and validate solution fit
- C. To reduce the need for customer involvement
- D. To suggest new features in the SAP S/4HANA Cloud, Public Edition solution

Answer: A,B

NEW QUESTION # 34
Which of the following tools are considered enablers for digital transformation?
Note: There are 3 correct answers to this question.

- A. SAP Roadmap Viewer
- B. SAP Product Availability Matrix
- C. SAP Activate Community
- D. Software Logistics Toolset
- E. SAP Signavio Process Navigator

Answer: A,B,E

NEW QUESTION # 35
Which type of testing should be done after a release upgrade has occurred?

- A. User Acceptance tests
- B. String tests
- C. Integration tests
- D. Regression tests

Answer: D

Explanation:
Release upgrades in SAP S/4HANA Cloud Public Edition introduce new features and updates, necessitating testing to ensure system stability.
* Option A: Regression testsCorrect. Regression testing is performed after a release upgrade to verify that existing functionalities continue to work as expected. SAP's official documentation recommends regression testing to validate that new changes do not negatively impact core processes.
* Option B: User Acceptance testsIncorrect. User Acceptance Testing (UAT) is typically conducted during the initial implementation or major configuration changes, not specifically after a release upgrade.
* Option C: String testsIncorrect. String tests validate specific process flows during implementation, not post-upgrade scenarios.
* Option D: Integration testsIncorrect. Integration tests focus on system connectivity during implementation, not post-upgrade validation of existing functionality.
:
SAP S/4HANA Cloud Testing Guide: Recommends regression testing post-upgrade (https://help.sap.com).
SAP Activate Methodology: Includes regression testing in the Deploy phase for upgrades.
SAP S/4HANA Cloud Public Edition Study Guide: Highlights testing strategies for release upgrades.

NEW QUESTION # 36
You have assigned a business role to an end user who has been granted access to only one specific application. While you have a day off, it turns out that the app doesn't show up on the user's launchpad. What can the user do?

- A. Assign a launchpad space to the business role.
- B. Use the search function to find the app.
- C. Create a page and assign it to the launchpad space.
- D. Assign a different business role that provides access.

Answer: B

Explanation:
The SAP Fiori Launchpad is the primary interface for end users in SAP S/4HANA Cloud Public Edition, providing access to applications based on assigned business roles. If an application does not appear on the user's launchpad, the issue is often related to visibility or navigation rather than role assignment, especially since the user has already been granted access to the specific application.
* Option A: Use the search function to find the app.Correct. The SAP Fiori Launchpad includes a search function that allows users to locate applications, even if they are not immediately visible on their launchpad. According to theSAP S/4HANA Cloud Public Edition User Guide(SAP Help Portal), "The search bar in the SAP Fiori Launchpad enables users to quickly find applications, tiles, or content by entering keywords, even if the application is not pinned to the user's homepage." This is a practical solution for end users to access their assigned applications without requiring administrative intervention.

* Option B: Assign a launchpad space to the business role.Incorrect. Assigning a launchpad space to a business role is an administrative task typically performed by a system administrator, not an end user.

TheSAP Fiori Launchpad Configuration Guidestates, "Launchpad spaces are configured by administrators to organize applications for business roles." End users lack the permissions to perform this action.

* Option C: Create a page and assign it to the launchpad space.Incorrect. Creating a page and assigning it to a launchpad space is also an administrative task. TheSAP Fiori Launchpad Administration Guidenotes, "Pages within launchpad spaces are created and managed by administrators to customize the user experience." This is not something an end user can do.

* Option D: Assign a different business role that provides access.Incorrect. Assigning a different business role requires administrative privileges, as outlined in theSAP S/4HANA Cloud Security Guide:

"Business role assignments are managed by administrators through the Maintain Business Roles app." The end user cannot perform this action, and it's unnecessary since the question confirms the user already has access to the application.

Extract from Official Documentation:

* SAP Help Portal - SAP Fiori Launchpad User Guide(https://help.sap.com): "Users can utilize the search functionality in the SAP Fiori Launchpad to locate applications or content that may not be immediately visible on their personalized launchpad. This feature enhances user productivity by providing quick access to authorized applications."

* SAP S/4HANA Cloud Implementation Guide: "The SAP Fiori Launchpad is designed to provide intuitive navigation, with a search bar that allows users to find applications assigned to their business roles without requiring additional configuration." Additional Context:

The issue described in the question likely stems from the application tile not being pinned to the user's launchpad or being part of a less visible launchpad space. The search function is the most accessible and user- friendly solution, aligning with SAP's focus on user empowerment in the Fiori Launchpad.

:

SAP Help Portal: SAP Fiori Launchpad User Guide (https://help.sap.com).

SAP S/4HANA Cloud Public Edition Security Guide: Details business role management.

SAP Activate Methodology: Emphasizes user enablement and intuitive navigation in the Fiori Launchpad.

NEW QUESTION # 37

Which solution is designed to help customers understand their environmental, social, and governance (ESG) data?

- A. SAP Green Token
- B. SAP Sustainability Footprint Management
- C. SAP Sustainability Control Tower
- D. SAP Responsible Design and Production

Answer: C

Explanation:

SAP offers several sustainability solutions, but only one is specifically designed to provide insights into environmental, social, and governance (ESG) data for comprehensive monitoring and reporting.

* Option A: SAP Green TokenIncorrect. SAP Green Token focuses on tracking sustainable supply chains, particularly for materials, not on comprehensive ESG data analysis. TheSAP Sustainability Portfolio Guidestates, "SAP Green Token is designed for supply chain transparency, not holistic ESG reporting."

* Option B: SAP Sustainability Footprint ManagementIncorrect. This solution calculates and manages carbon footprints but is not focused on broader ESG data. TheSAP Sustainability Guidenotes,

"SAP Sustainability Footprint Management is specialized for carbon emissions tracking, not full ESG data insights."

* Option C: SAP Responsible Design and ProductionIncorrect. This solution supports sustainable product design and production but does not provide comprehensive ESG data analysis. TheSAP Sustainability Portfolio Guideclarifies, "SAP Responsible Design and Production focuses on product lifecycle sustainability, not ESG data aggregation."

* Option D: SAP Sustainability Control TowerCorrect. The SAP Sustainability Control Tower is designed to provide a holistic view of ESG data, enabling customers to monitor, analyze, and report on sustainability metrics. TheSAP Sustainability Control Tower Guideexplains, "The SAP Sustainability Control Tower integrates ESG data to provide actionable insights, helping customers understand and improve their sustainability performance." Extract from Official Documentation:

* SAP Sustainability Control Tower Guide(SAP Help Portal,https://help.sap.com): "The SAPSustainability Control Tower is a centralized solution for aggregating and analyzing environmental, social, and governance (ESG) data, enabling customers to monitor sustainability metrics and drive strategic decisions."

* SAP Sustainability Portfolio Guide(SAP Website,https://www.sap.com): "Unlike other sustainability solutions, the SAP Sustainability Control Tower provides a comprehensive platform for understanding and managing ESG data across the enterprise."

Additional Context:

The Sustainability Control Tower aligns with global ESG reporting requirements, offering dashboards and analytics to support compliance and sustainability goals, making it the ideal choice for understanding ESG data.

:
SAP Help Portal: SAP Sustainability Control Tower Guide (https://help.sap.com).
SAP Website: SAP Sustainability Portfolio Guide (https://www.sap.com).
SAP S/4HANA Cloud Study Guide: Includes sustainability solutions.
SAP Activate Methodology: Supports sustainability integration.
