If you have any questions about FCP_FCT_AD-7.4 exam dump, we will answer you in first time.

Fortinet FCP - FortiClient EMS 7.4 Administrator Sample Questions (Q66-Q71):

NEW QUESTION # 66

Which two statements about ZTNA destinations are true? (Choose two.)

- A. FortiClient ZTNA destinations do not support a wildcard FQDN.
- B. FortiClient ZTNA destination authentication is enabled by default.

- C. FortiClient ZTNA destinations use an existing VPN tunnel to create a secure connection.
- D. FortiClient ZTNA destinations provides access through TCP forwarding.
- E. FortiClient ZTNA destination encryption is disabled by default.

Answer: A,E

NEW QUESTION # 67

Refer to the exhibit.

Compliance Profile

Zero Trust Tagging Rule Set

Name: Sales Department Compliance

Tag Endpoint As: Sales Department Compliance

Enabled: ☒

Comments: Optional

Rules: [Edit Logic](#) [+ Add Rule](#)

Type	Value
Windows (2)	
Vulnerable Devices Severity Level	Medium or higher
Running Process	Calculator.exe

Save **Cancel**

Based on the settings shown in the exhibit, which two actions must the administrator take to make the endpoint compliant? (Choose two.)

- A. Run Calculator application on the endpoint.
- B. Enable the web filter profile.
- C. Patch applications that have vulnerability rated as high or above.
- D. Integrate FortiSandbox for infected file analysis

Answer: A,C

Explanation:

- * Observation of Compliance Profile:
- * The compliance profile shown in the exhibit includes rules for vulnerability severity level and running process (Calculator.exe).
- * Evaluating Actions for Compliance:
- * To make the endpoint compliant, the administrator needs to ensure that the vulnerability severity level is medium or higher is patched (D).
- * Additionally, the Calculator.exe application must be running on the endpoint (B).
- * Eliminating Incorrect Options:
- * Enabling the web filter profile (A) is not related to the compliance rules shown.
- * Integrating FortiSandbox (C) is not a requirement in the given compliance profile.
- * Conclusion:
- * The correct actions are to run the Calculator application on the endpoint (B) and patch applications with vulnerabilities rated as high or above (D).

NEW QUESTION # 68

Which statement about the FortiClient enterprise management server is true?

- A. It enforces compliance on the endpoints using tags
- B. It provides centralized management of multiple endpoints running FortiClient software.
- C. It receives the CA certificate from FortiGate to validate client certificates.
- D. It receives the configuration information of endpoints from FortiGate.

Answer: A

NEW QUESTION # 69

When multitenancy is enabled on FortiClient EMS, which administrator role can provide access to the global site only? (Choose one answer)

- A. Standard administrator
- B. Settings administrator
- C. Global administrator
- D. Tenant administrator

Answer: B

Explanation:

According to the FortiClient EMS Administration Guide (specifically the sections on Multitenancy), when multitenancy is enabled, the system introduces specific administrator roles to manage the separation between global settings and individual sites.

1. The Settings Administrator Role (Answer B)

* **Specific Scope:** The Settings administrator is a specialized role designed to have access to the global site only.

* **Permissions:** This role can access all configuration options on the global site, with the notable exception of administrator configuration (they cannot create or manage other admin accounts).

* **Use Case:** This is typically used for auditors or system managers who need to oversee global-level configurations without needing access to specific endpoint data within individual sites or the power to modify administrative users.

2. Comparison with Other Multitenancy Roles

* **Super administrator:** This role has unlimited access to the global site and all other sites within the EMS instance.

* **Site administrator:** This role is restricted to specified sites only and has no access to the global site.

* **Standard administrator (Answer C):** This is a generic role level within a site or a single-tenant environment but is not the role that defines "global-only" access in a multitenant setup.

* **Tenant administrator / Global administrator:** While these terms are common in general IT, FortiClient EMS documentation specifically uses the titles Super, Settings, and Site administrators for multitenancy management.

3. Curriculum References

* **FortiClient EMS 7.2/7.4 Study Guide (Multitenancy Chapter):** Explicitly lists "Settings administrator" as the role providing access to the global site only.

* **Admin Roles Table:** The documentation provides a comparison table where the Settings Administrator's scope is strictly defined as "Global site only".

NEW QUESTION # 70

An administrator wants to simplify remote access without asking users to provide user credentials. Which access control method provides this solution?

- A. ZTNA full mode
- B. L2TP
- C. ZTNA IP/MAC filtering mode
- D. SSL VPN

Answer: A

Explanation:

* **Simplifying Remote Access:**

* The administrator wants to simplify remote access without asking users to provide user credentials.

* **Evaluating Access Control Methods:**

* ZTNA full mode can provide seamless access by leveraging device identity and posture, eliminating the need for user credentials for each access request.

* Other methods like SSL VPN and L2TP typically require user credentials.

* **Conclusion:**

* The correct access control method that provides this solution is ZTNA full mode.
