## 300-425 Certification Questions | 300-425 Practice Exam Online

ITExamSimulator provide a good after-sales service for all customers. If you choose to purchase ITExamSimulator products, ITExamSimulator will provide you with online service for 24 hours a day and one year free update service, which timely inform you the latest exam information to let you have a fully preparation. We can let you spend a small amount of time and money and pass the IT certification exam at the same time. Selecting the products of ITExamSimulator to help you pass your first time Cisco Certification 300-425 Exam is very cost-effective.

## Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q85-Q90):

### NEW QUESTION # 85

An engineer is designing a new wireless network. Based on the design, OfficeExtend AP functionality must be used. Which type of license must the Cisco 5520 WLC v8.3 have?

- A. OfficeExtend AP license
- B. WPlus license
- C. Base license
- D. Plus license

**Answer: C**

#### NEW QUESTION # 86

What causes the most signal attenuation, based on the wireless design tools?

- A. metal door
- B. office window
- C. cinder block wall
- D. glass wall

**Answer: A**

Explanation:

It is important to note that metal chair legs and desk components will interact with the antenna of the AP and change the pattern of the radiation. Surveying the results of placement decisions with a good tool is necessary

#### NEW QUESTION # 87

An engineer configured the optimized client roaming on Cisco WLC with an RSSI threshold of 72dBm. Clients report frequent disconnections. What must be configured for the AP to guide the client to a better AP?

- A. Disable coverage hole detection on the SSID and enable BSS transition on the SSID.
- B. Enable BSS transition at the radio level and optimized roaming on the SSID.
- C. Disable optimized roaming and enable 802.11v support on the SSID.
- D. Enable BSS transition on the SSID and optimized roaming at the radio level.

**Answer: D**

#### NEW QUESTION # 88

Where must the APs be mounted when used in a high-density wireless network to provide 6 dB to 20 dB of attenuation to a cell?

- A. under the stage
- B. in the aisle
- C. above the stage
- D. under the seat

**Answer: D**

Explanation:

Under seat or under desk mounting can provide from 6 dB to 20 dB of attenuation to the cell.

#### NEW QUESTION # 89

An enterprise is using the wireless network as the main network connection for corporate users and guests. To ensure wireless network availability, two standalone controllers are installed in the head office. APs are connected to the controllers using a round-robin approach to load balance the traffic. After a power cut, the wireless clients disconnect while roaming. An engineer tried ping from the controller but fails. Which protocol needs to be allowed between the networks that the controllers are installed?

- A. IP Protocol 97
- B. IP Protocol 77
- C. IP Protocol 67
