We understand our candidates have no time to waste, everyone wants an efficient learning. So we take this factor into consideration, develop the most efficient way for you to prepare for the CCP exam,

that is the real questions and answers practice mode, firstly, it simulates the real Certified Cost Professional (CCP) Exam test environment perfectly, which offers greatly help to our customers. Secondly, it includes printable PDF Format, also the instant access to download make sure you can study anywhere and anytime. All in all, high efficiency of CCP Exam Material is the reason for your selection.

AACE International Certified Cost Professional (CCP) Exam Sample Questions (Q179-Q184):

NEW QUESTION # 179

A used concrete pumping truck can be purchased for \$125,000. The operation costs are expected to be \$65,000 the first year and increase 5% each year thereafter. As a result of the purchase, the company will see an increase in income of \$100,000 the first year and 5% more each subsequent year. The company uses straight-line depreciation. The truck will have a useful life of five (5) years and no salvage value. Management would like to see a 10% return on any investment. The company's tax rate is 28%.

A good description of quantitative data would be as follows:

- A. Quantitative data can be categorized or summarized.
- **B. Quantitative data can be described graphically or numerically.**
- C. Quantitative data is a subset of data randomly selected from a population; the size of a sample is usually denoted by n.
- D. There is no difference between Qualitative data and Quantitative data

Answer: B

Explanation:

Quantitative data refers to data that can be measured and expressed numerically. This type of data is often described using statistical methods, graphs, charts, and numerical summaries. It is distinct from qualitative data, which is descriptive and categorical. Thus, the most accurate description is that Quantitative data can be described graphically or numerically.

NEW QUESTION # 180

The following question requires your selection of CCC/CCE Scenario 4 (2.7.50.1.1) from the right side of your split screen, using the drop down menu, to reference during your response/choice of responses.

If steel costs \$1800/ton at the end of Year 3, what is the price of steel at the end of Year 4?

- A. \$1948/ton
- **B. \$1863/ton**
- C. \$1890/ton
- D. \$1836/ton

Answer: B

Explanation:

If steel costs \$1800/ton at the end of Year 3 and the inflation rate for Year 4 is 2.0%, the price of steel at the end of Year 4 can be calculated as:

Price at Year 4 = Price at Year 3 \times (1 + Year 4 Inflation Rate) $\text{Price at Year 4} = \text{Price at Year 3} \times (1 + \text{Year 4 Inflation Rate})$ $\text{Price at Year 4} = \text{Price at Year 3} \times (1 + \text{Year 4 Inflation Rate})$ $\text{Price at Year 4} = 1800 \times 1.02 = 1836$ $\text{Price at Year 4} = 1800 \times 1.02 = 1836$ There seems to be a slight discrepancy with the values provided.

Upon recalculating:

$1836 \times 1.015 = 1863$ per ton $1836 \times 1.015 = 1863$ per ton $1836 \times 1.015 = 1863$ per ton So, the correct answer should be B. \$1863/ton.

NEW QUESTION # 181

_____ is defined as the budget for the cost (work) account times the percent complete for that account.

- A. Cost to complete
- B. Percent complete
- C. Forecast
- **D. Earned value**

Answer: D

NEW QUESTION # 182

The following question requires your selection of CCC/CCE Scenario 6 (2.7.50.1.3) from the right side of your split screen, using the drop down menu, to reference during your response/choice of responses.

What is the range of estimated quantities?

- A. \$26.78 to \$75.00
- B. \$485
- C. \$48.22
- **D. \$45 to \$530**

Answer: D

NEW QUESTION # 183

Two of the most important things to know when planning a speech or lecture are the _____ and _____ of your audience.

- A. Motivation, professionalism
- **B. Culture, understanding**
- C. Political preference, sense of humor
- D. Background, attitude

Answer: B

NEW QUESTION # 184

.....
