Consider sitting for an AWS Certified Solutions Architect - Associate (SAA-C03) exam and discovering that the practice materials you've been using are incorrect and useless. The technical staff at ITdumpsfree has gone through the Amazon certification process and knows the need to be realistic and exact. Hundreds of professionals worldwide examine and test every Amazon AWS-Solutions-Associate Practice Exam regularly. These practice tools are developed by professionals who work in fields impacting Amazon AWS Certified Solutions Architect - Associate (SAA-C03), giving them a foundation of knowledge and actual competence. Our Amazon AWS-Solutions-Associate exam questions are created and curated by industry specialists.

Amazon AWS-Solutions-Architect-Associate exam is a certification exam that tests the knowledge and skills of candidates in designing and deploying scalable, highly available, and fault-tolerant systems on Amazon Web Services (AWS). AWS-Solutions-Associate Exam is intended for individuals who have experience in designing and deploying cloud-based solutions on AWS and want to validate their skills and knowledge.

The AWS-Solutions-Architect-Associate certification is highly valued by employers and is one of the most popular certifications in the field of cloud computing. AWS Certified Solutions Architect - Associate (SAA-C03) certification demonstrates that an individual has the skills and knowledge required to design and deploy highly available, scalable, and fault-tolerant systems on AWS. AWS Certified Solutions Architect - Associate (SAA-C03) certification also validates an individual's understanding of AWS best practices and their ability to design and implement secure and reliable systems on AWS.

## Free PDF Quiz 2026 AWS-Solutions-Associate: AWS Certified Solutions Architect - Associate (SAA-C03) – Efficient Exam Material

But our company can provide the anecdote for you--our AWS-Solutions-Associate study materials. Under the guidance of our AWS-Solutions-Associate exam practice, you can definitely pass the exam as well as getting the related certification with the minimum time and efforts. We would like to extend our sincere appreciation for you to browse our website, and we will never let you down. The advantages of our AWS-Solutions-Associate Guide materials are more than you can imagine. Just rush to buy our AWS-Solutions-Associate practice braindumps!

## Amazon AWS Certified Solutions Architect - Associate (SAA-C03) Sample Questions (Q443-Q448):

### NEW QUESTION # 443

Doug has created a VPC with CIDR 10.201.0.0/16 in his AWS account. In this VPC he has created a public subnet with CIDR block 10.201.31.0/24. While launching a new EC2 from the console, he is not able to assign the private IP address 10.201.31.6 to this instance. Which is the most likely reason for this issue?

- A. Private IP address 10.201.31.6 is not part of the associated subnet's IP address range.
- B. Private IP address 10.201.31.6 is reserved by Amazon for IP networking purposes.
- C. Private IP address 10.201.31.6 is blocked via ACLs in Amazon infrastructure as a part of platform security.
- **D. Private address IP 10.201.31.6 is currently assigned to another interface.**

**Answer: D**

Explanation:

In Amazon VPC, you can assign any Private IP address to your instance as long as it is:

Part of the associated subnet's IP address range

Not reserved by Amazon for IP networking purposes

Not currently assigned to another interface

#### NEW QUESTION # 444

A company copies 200 TB of data from a recent ocean survey onto AWS Snowball Edge Storage Optimized devices. The company has a high performance computing (HPC) cluster that is hosted on AWS to look for oil and gas deposits. A solutions architect must provide the cluster with consistent sub-millisecond latency and high-throughput access to the data on the Snowball Edge Storage Optimized devices. The company is sending the devices back to AWS.

Which solution will meet these requirements?

- A. Create an Amazon S3 bucket and an Amazon Elastic File System (Amazon EFS) file system. Import the data into the S3 bucket. Copy the data from the S3 bucket to the EFS file system. Access the EFS file system from the HPC cluster instances.
- **B. Create an Amazon S3 bucket. Import the data into the S3 bucket. Configure an Amazon FSx for Lustre file system, and integrate it with the S3 bucket. Access the FSx for Lustre file system from the HPC cluster instances.**
- C. Create an Amazon FSx for Lustre file system. Import the data directly into the FSx for Lustre file system. Access the FSx for Lustre file system from the HPC cluster instances.
- D. Create an Amazon S3 bucket. Import the data into the S3 bucket. Configure an AWS Storage Gateway file gateway to use the S3 bucket. Access the file gateway from the HPC cluster instances.

**Answer: B**

Explanation:

To provide the HPC cluster with consistent sub-millisecond latency and high-throughput access to the data on the Snowball Edge Storage Optimized devices, a solutions architect should configure an Amazon FSx for Lustre file system, and integrate it with an Amazon S3 bucket. This solution has the following benefits:

It allows the HPC cluster to access the data on the Snowball Edge devices using a POSIX-compliant file system that is optimized for fast processing of large datasets<sup>1</sup>.

It enables the data to be imported from the Snowball Edge devices into the S3 bucket using the AWS Snow Family Console or the AWS CLI<sup>2</sup>. The data can then be accessed from the FSx for Lustre file system using the S3 integration feature<sup>3</sup>.

It supports high availability and durability of the data, as the FSx for Lustre file system can automatically copy the data to and from the S3 bucket<sup>3</sup>. The data can also be accessed from other AWS services or applications using the S3 API<sup>4</sup>.

#### NEW QUESTION # 445

Provisioned IOPS Costs: you are charged for the IOPS and storage whether or not you use them in a given month.

- A. TRUE
- **B. FALSE**

**Answer: B**

#### NEW QUESTION # 446

A company hosts a website on Amazon EC2 instances behind an Application Load Balancer (ALB) The website serves static content Website traffic is increasing and the company is concerned about a potential increase in cost. What should a solutions architect do to reduce the cost of the website?

- A. Create an AWS WAF web ACL and associate it with the ALB. Add a rule to the web ACL to cache static files.
- **B. Create an Amazon CloudFront distribution to cache static files at edge locations.**
- C. Create an Amazon ElastiCache cluster Connect the ALB to the ElastiCache cluster to serve cached files.
- D. Create a second ALB in an alternative AWS Region Route user traffic to the closest Region to minimize data transfer costs

**Answer: B**

Explanation:

Explanation

Amazon CloudFront is a content delivery network (CDN) that can improve the performance and reduce the cost of serving static content from a website. CloudFront can cache static files at edge locations closer to the users, reducing the latency and data transfer costs. CloudFront can also integrate with Amazon S3 as the origin for the static content, eliminating the need for EC2 instances to host the website. CloudFront meets all the requirements of the question, while the other options do not. References:

#### NEW QUESTION # 447

You are using an m1.small EC2 instance with one 300GB EBS volume to host a relational database. You determined that write throughput to the database needs to be increased.

Which of the following approaches can help achieve this? Choose 2 answers

- A. Add an EBS volume and place into RAID 5
- **B. Increase the size of the EC2 instance**
- C. Enable multi-AZ mode
- D. Place the instance in an Auto Scaling Group
- E. Put the database behind an Elastic Load Balancer
- **F. Use an array of EBS volumes**

**Answer: B,F**

#### NEW QUESTION # 448

.....

On each attempt, the Amazon AWS-Solutions-Associate practice test questions taker will provide a score report. With this report, one can find mistakes and remove them for the final attempt. A situation that the web-based test creates is similar to the AWS-Solutions-Associate Real Exam Questions. Practicing in this situation will help you kill AWS Certified Solutions Architect - Associate (SAA-C03) (AWS-Solutions-Associate) exam anxiety. The customizable feature of this format allows you to change the settings of the AWS Certified Solutions Architect - Associate (SAA-C03) (AWS-Solutions-Associate) practice exam.
