JN0-232 Latest Exam Pass4sure | JN0-232 Useful Dumps

The desktop Security, Associate (JNCIA-SEC) (JN0-232) practice exam software helps its valued customer to be well aware of the pattern of the real JN0-232 exam. You can try a free Security, Associate (JNCIA-SEC) (JN0-232) demo too. This Security, Associate (JNCIA-SEC) (JN0-232) practice test is customizable and you can adjust its time and Security, Associate (JNCIA-SEC) (JN0-232) exam questions.

Juniper Security, Associate (JNCIA-SEC) Sample Questions (Q32-Q37):

NEW QUESTION # 32

What is the purpose of rate-limiting exception traffic in the Junos OS?

- A. to prevent denial-of-service attacks on the Routing Engine
- B. to enhance the performance of the forwarding plane
- C. to manage routing protocols and updates
- D. to simplify the configuration of network interfaces

Answer: A

Explanation:

Exception traffic is traffic that must be sent from the Packet Forwarding Engine (PFE) to the Routing Engine (RE) for processing, such as routing protocol updates, management traffic, or other control-plane packets.

Because the RE is a limited and critical resource, Junos OS implements rate limiting on exception traffic.

- * The purpose is to prevent denial-of-service (DoS) attacks on the Routing Engine by controlling the amount of traffic directed to it.
- * This ensures the RE continues to process control-plane operations reliably, even under potential attack or heavy traffic conditions.
- * Rate limiting does not enhance forwarding plane performance (Option A), simplify interface configuration (Option B), or manage routing protocols directly (Option D).

Reference: Juniper Networks - Junos OS Security Fundamentals, Exception Traffic Handling.

NEW QUESTION # 33

Which two statements are true about the NextGen Web Filtering (NGWF) feature on an SRX Series device? (Choose two.)

- **A. The NGWF feature requires a license.**
- **B. The NGWF feature consults the Juniper cloud before consulting your local lists.**
- C. The NGWF feature does not require a license.
- D. The NGWF feature consults your local lists before consulting the Juniper cloud.

Answer: A,B

Explanation:

NextGen Web Filtering consults the Juniper cloud first to categorize and evaluate URLs in real time, ensuring up-to-date threat and content intelligence.

NextGen Web Filtering is a licensed feature and requires a valid subscription to operate on an SRX Series device.

NEW QUESTION # 34

Which two statements are correct about security zones? (Choose two.)

- **A. A security zone can contain multiple interfaces.**
- **B. Interfaces in the same security zone must share the same routing instance.**
- C. An interface can exist in multiple security zones.
- D. Interfaces in the same security zone must use separate routing instances.

Answer: A,B

Explanation:

* Option B: Correct. Interfaces in the same security zone must belong to the same routing instance; zones cannot span multiple routing instances.

* Option D: Correct. A security zone can contain multiple interfaces, allowing grouping of similar trust levels (e.g., multiple LAN subnets in a trust zone).

* Option A: Incorrect. An interface can belong to only one zone at a time.

* Option C: Incorrect. Interfaces within the same zone cannot be split across routing instances.

Correct Statements: Interfaces in the same zone must share the same routing instance, and a zone can contain multiple interfaces.

Reference: Juniper Networks - Security Zones and Routing Instances, Junos OS Security Fundamentals.

NEW QUESTION # 35

What is the default timeout value for TCP sessions on an SRX Series device?

- A. 30 seconds
- **B. 30 minutes**
- C. 60 seconds
- D. 60 minutes

Answer: B

Explanation:

By default, TCP has a 30-minute idle timeout, and UDP has a 60-second idle timeout.

Additionally, known IP protocols have a 30-minute timeout, whereas unknown ones have a 60-second timeout. Setting the inactivity timeout is very useful, particularly if you are concerned about applications either timing out or remaining idle for too long and filling up the session table.

According to the Juniper SRX Series Services Guide, this can be configured using the 'timeout inactive' statement for the security policy.

NEW QUESTION # 36

Which three operating systems are supported for installing and running Juniper Secure Connect client software? (Choose three.)

- A. Windows 7
- B. Linux
- C. Android
- D. macOS
- E. Windows 10

Answer: A,D,E

Explanation:

Juniper Secure Connect client software is supported on the following three operating systems:

Windows 7, Windows 10, and macOS. For more information, please refer to the Juniper Secure Connect Administrator Guide, which can be found on Juniper's website. The guide states: "The Juniper Secure Connect client is supported on Windows 7, Windows 10, and macOS." It also provides detailed instructions on how to install and configure the software for each of these operating systems.

NEW QUESTION # 37

.....

How can you pass your exam and get your certificate in a short time? Our JN0-232 exam torrent will be your best choice to help you achieve your aim. According to customers' needs, our product was revised by a lot of experts; the most functions of our JN0-232 exam dumps are to help customers save more time, and make customers relaxed. If you choose to use our JN0-232 Test Quiz, you will find it is very easy for you to pass your JN0-232 exam in a short time. You just need to spend 20-30 hours on studying with our JN0-232 exam questions; you will have more free time to do other things.
