Hottest 1Z1-771 Certification - Pass Guaranteed Quiz Oracle 1Z1-771 First-grade Valid Test Guide

BTW, DOWNLOAD part of GetValidTest 1Z1-771 dumps from Cloud Storage: https://drive.google.com/open?id=1JQ0ydkLKfeCMX11DRnNWvq7qOTtJLRMX

GetValidTest Oracle 1Z1-771 exam braindump has a high hit rate which is 100%. It can guarantee all candidates using our dumps will pass the exam. Of course, it is not indicate that you will succeed without any efforts. What you need to do, you must study all the questions in our GetValidTest dumps. Only in this way can you easily deal with the examination. How about it feels? When you prepare the exam, GetValidTest can help you save a lot of time. It is your guarantee to pass 1Z1-771 Certification. Do you want to have the dumps? Hurry up to visit GetValidTest to purchase 1Z1-771 exam materials. In addition, before you buy it, you can download the free demo which will help you to know more details.

Oracle 1Z1-771 Exam Syllabus Topics:

Topic	Details
Topic 1	• Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.

Topic 2	• Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.
Topic 3	• Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.
Topic 4	• Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.
Topic 5	• Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.
Topic 6	• Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.
Topic 7	• Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.
Topic 8	• Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.
Topic 9	• Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.
Topic 10	• Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.
Topic 11	• Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.
Topic 12	• Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.
Topic 13	• Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.
Topic 14	• Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.
Topic 15	• Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.

Topic 16	• Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.

1Z1-771 Valid Test Guide, Latest 1Z1-771 Study Notes

When you are eager to pass the 1Z1-771 real exam and need the most professional and high quality practice material, we are willing to offer help. Our 1Z1-771 training prep has been on the top of the industry over 10 years with passing rate up to 98 to 100 percent. By practicing our 1Z1-771 Learning Materials, you will get the most coveted certificate smoothly. Our 1Z1-771 study quiz will guide you throughout the competition with the most efficient content compiled by experts.

Oracle APEX Cloud Developer Professional Sample Questions (Q53-Q58):

NEW QUESTION # 53
Which statement is true about Theme Styles in Oracle APEX?

- A. Theme Styles control the layout of a webpage.
- B. When the Is Public attribute is enabled, end users can choose the Theme Style from the runtime environment.
- C. The "Is Current" attribute of a Theme Style depends on the "Read Only" attribute.

Answer: B

Explanation:
Theme Styles define visual aspects (e.g., colors, fonts) in APEX:
B . When the Is Public attribute is enabled: Setting "Is Public" to "Yes" allows end users to select from available Theme Styles at runtime (e.g., via a UI switcher), enhancing customization.
A . Control the layout: False; layout is managed by templates and regions, not Theme Styles, which focus on aesthetics.
C . "Is Current" depends on "Read Only": False; "Is Current" marks the active style, independent of "Read Only" (which locks editing).
Practical note: Public styles require multiple defined styles in Shared Components.

NEW QUESTION # 54
Which two statements are true about the APEX_MAIL API?

- A. You can receive emails using the APEX_MAIL package in an Oracle APEX application.
- B. You can add files as attachments to your emails using the APEX_MAIL package.
- C. The APEX_MAIL package supports sending emails only to Oracle database users.
- D. You can send emails using the APEX_MAIL package from an Oracle APEX application.

Answer: B,D

Explanation:
The APEX_MAIL API facilitates email functionality:
A . You can add files as attachments: Using APEX_MAIL.ADD_ATTACHMENT (e.g., APEX_MAIL.ADD_ATTACHMENT(p_mail_id, p_attachment, p_filename)), you can attach BLOBs (e.g., PDFs) to emails.
C . You can send emails: APEX_MAIL.SEND (e.g., APEX_MAIL.SEND(p_to => 'user@example.com', p_body => 'Hello')) sends emails from APEX, leveraging the configured mail server.
B . You can receive emails: False; APEX_MAIL is send-only; receiving requires custom integration (e.g., IMAP).
D . Only to Oracle database users: False; emails can go to any valid address, not just database users.
Pitfall: Ensure the mail queue is processed (APEX_MAIL.PUSH_QUEUE) for timely delivery.

NEW QUESTION # 55
Which Process type do you use to run multiple processes in the background in APEX?

- A. Execute Server-side Code
- B. Execute Code
- C. Execution Chain
- D. Execute JavaScript Code

Answer: C

Explanation:
To run multiple processes in the background:
D . Execution Chain: This process type allows chaining multiple processes (e.g., PL/SQL, REST calls) to execute sequentially or conditionally in the background, managed via the Process Chain framework. It's ideal for complex, asynchronous tasks (e.g., batch updates).
A . Execute Code: Not a process type in APEX; likely a misnomer.
B . Execute Server-side Code: Runs a single PL/SQL block synchronously, not multiple background tasks.
C . Execute JavaScript Code: Client-side, not suited for background server processes.
Use case: Chain processes like data validation, logging, and email sending without blocking the UI.

NEW QUESTION # 56
Which step is mandatory to make an existing Oracle APEX application Progressive Web App (PWA) enabled?

- A. Add custom JavaScript to support offline functionality.
- B. Verify that Friendly URLs are turned on in the Application Definition.
- C. Enable the PWA flag in the Application Definition.
- D. Enable RESTful Web Services in the application.

Answer: C

Explanation:
To enable an existing APEX application as a Progressive Web App (PWA), the mandatory step is:
Enable the PWA flag in the Application Definition: In the Application Definition attributes under "Progressive Web App," setting "Enable PWA" to "Yes" activates PWA features like installability, push notifications, and service worker generation. This is the foundational step, after which optional customizations (e.g., icons, manifest) can be added.
Friendly URLs: While recommended for modern apps, they're not required for PWA functionality.
Custom JavaScript: Optional for offline capabilities, but not mandatory for basic PWA enablement.
RESTful Web Services: Unrelated to PWA features.
This step transforms the app into a PWA, enhancing user experience on mobile and desktop devices with native-like behavior.

NEW QUESTION # 57
Which statement is true about the Data Workshop utility?

- A. You cannot load data from an XLSX file with multiple worksheets.
- B. You can load or unload multiple tables at a time.
- C. The wizards load and unload table data only.
- D. The wizards load and unload all types of schema objects.

Answer: C

Explanation:
The Data Workshop utility in APEX is designed to load and unload table data only, not other schema objects like procedures or views. Option A is false because XLSX files with multiple worksheets are supported (each worksheet can be mapped to a table). Option B is incorrect as it's limited to table data. Option D is partially true but not the most precise answer, as "multiple tables at a time" depends on the process, whereas C is universally accurate.

NEW QUESTION # 58
......

Our 1Z1-771 learning prep is definitely the latest information on the market. As you know, the contents of many exams are constantly being updated, so you must choose the latest 1Z1-771 practice quiz that can keep up with the times and ensure that the

information you obtain is up-to-date. The staff really paid a lot of time and effort to ensure this. Of course, your ability to make a difference is our best reward with the help of the 1Z1-771 Exam Questions.
