NEW QUESTION 27
Which Data Model Leverages external objects to support the use Case?

- A. Clinical Service Requests
- B. Member Plan
- C. Care Observations
- D. Claims

Answer: D

NEW QUESTION 28
An insurance organization wants to be able to track specialties and sub-specialties related to practitioner to use in provider search. Which would they store these relationships? (Choose threE.

- A. Care Taxonomy
- B. Care specialty
- C. Healthcare provider specialty

Health-Cloud-Accredited-Professional test questions have a mock examination system with a timing function, which provides you with the same examination environment as the real exam. Although some of the hard copy materials contain mock examination papers, they do not have the automatic timekeeping system. Therefore, it is difficult for them to bring the students into a real test state. With Health-Cloud-Accredited-Professional Exam Guide, you can perform the same computer operations as the real exam, completely taking you into the state of the actual exam, which will help you to predict the problems that may occur during the exam, and let you familiarize yourself with the exam operation in advance and avoid rushing during exams.

Salesforce Health-Cloud-Accredited-Professional (Salesforce Health Cloud Accredited Professional) Certification Exam is a specialized exam designed for professionals who want to demonstrate their expertise in using Salesforce's Health Cloud platform. Salesforce Health Cloud Accredited Professional certification is particularly useful for healthcare providers, insurers, and other organizations that use Health Cloud to manage patient data and provide better healthcare services. Health-Cloud-Accredited-Professional Exam covers a range of topics related to Health Cloud, including patient management, care coordination, and healthcare analytics.

Health-Cloud-Accredited-Professional Valid Exam Vce Free | Exams Health-Cloud-Accredited-Professional Torrent

If you buy online classes, you will need to sit in front of your computer on time at the required time; if you participate in offline counseling, you may need to take an hour or two of a bus to attend class. So even if you are a newcomer, you don't need to worry that you can't understand the contents. Industry experts hired by Health-Cloud-Accredited-Professional Exam Questions also explain all of the difficult professional vocabulary through examples, forms, etc. You can completely study alone without the help of others.

Salesforce Health Cloud Accredited Professional Sample Questions (Q35-Q40):

NEW QUESTION # 35
An admin wants to enable their users to leverage Provider Search, which denormalized object holds data to support this feature

- A. HealthCare Provider Facility
- B. Care Provider Searchable field
- C. Provider Search Sync Logs
- D. HealthCare Provider

Answer: B

Explanation:
Care Provider Searchable Field is the denormalized object that holds data to support the Provider Search feature in Health Cloud. Care Provider Searchable Field is a custom object that stores searchable fields from the Healthcare Provider and Healthcare Provider Facility objects. It allows users to search for providers based on various criteria such as name, location, specialty, and availability. Healthcare Provider Facility, Provider Search Sync Logs, and Healthcare Provider are not denormalized objects in Health Cloud.

NEW QUESTION # 36
A payer needs to implement a program to address the rising healthcare expenses and ensure affordable care for its members. The payer airs to strike a balance between quality care and managing the cost of care effectively by streamlining its approval processes for care requests.
Which capability in Health Cloud helps the payer accomplish this?

- A. Intelligent Appointment Management
- B. Integrated Care Management
- C. Provider Network Management
- D. Utilization Management

Answer: D

Explanation:
Step 1: Requirement Analysis
* Payer needs to manage healthcare expenses while ensuring quality, affordable care.
* Seeks to streamline approval processes for care requests.
Step 2: Utilization Management in Health Cloud
Utilization Management (UM) provides workflows and automation for reviewing, approving, or denying care requests. This supports balancing cost controls with quality care through evidence-based review processes.
Extract:
"Utilization Management helps payers manage costs and ensure members receive appropriate care by streamlining the review and approval process for pre-authorizations and care requests." Administer Health Cloud - Utilization Management Step 3: Review of Options
* A. Utilization Management: Directly addresses care request review, cost, and quality balance.
* B. Provider Network Management: Focuses on managing provider networks, not utilization/cost review.
* C. Intelligent Appointment Management: For scheduling only.

* D. Integrated Care Management:Focuses on care coordination, not cost/approval workflow.

NEW QUESTION # 37
Bloomington Caregivers has decided to enable Integrated Care Management so that Its end users can leverage Health Cloud Assessments. Administrators must now configure their org to be able to use Assessments.
Which three steps should the administrator take as part of the org setup to enable Assessments?
Choose 3 answers

- A. Add the Assessment component to the Patient page
- B. Download and Install OmniStudio.
- C. Enable Discovery Framework in Setup.
- D. Enable users to view and complete Assessments.
- E. Update sharing settings in Setup.

Answer: B,C,D

Explanation:
To enable Assessments in Salesforce Health Cloud, administrators must configure the org appropriately, ensuring that users can effectively utilize assessment tools for patient evaluations. The following steps are essential:
* Download and Install OmniStudio (Answer A):
* Purpose: OmniStudio provides a suite of declarative tools, including OmniScripts and DataRaptors, essential for building and managing assessments within Health Cloud.
* Implementation Steps:
* Access Salesforce AppExchange: Navigate to the AppExchange marketplace.
* Search for OmniStudio: Locate the OmniStudio package suitable for your Salesforce edition.
* Install the Package: Follow the installation prompts, ensuring that all components are correctly deployed.
Reference: For detailed installation instructions, refer to Salesforce's official documentation: OmniStudio Installation.
Enable Users to View and Complete Assessments (Answer B):
Purpose: Granting appropriate permissions ensures that users can access, view, and complete assessments as part of patient care management.
Implementation Steps:
Assign Permission Sets:
Health Cloud Permission Sets: Assign relevant Health Cloud permission sets to users, such as Health Cloud Standard or Health Cloud Platform, to provide baseline access.

NEW QUESTION # 38
How can a Health Cloud administrator change the label 'Patient Card' to 'Member Card' to be more aligned with their specific business terminology and use case?

- A. Go to Setup, navigate to the Patient Card object, and edit the Patient field name.
- B. Go to the Health Cloud - Admin Home page, select the Patient Card Configuration tab, and click 'New' to add a new configuration for 'Member.
- C. Edit the page layout where the Patient Card is shown, click on the attributes for the Patient Card component, and edit the name to 'Member'.
- D. Go to setup, navigate to Custom Labels, select the 'Patient_Card_Header' label, click the 'New Local Translation/Overrides' button, Select the language and enter the new label.
- E. The labels that come with the Health Cloud cannot be changed.

Answer: D

NEW QUESTION # 39
When implementing Provider Search functionality, which two changes allow an external user to access search results?
Choose 2 answers

- A. Give the site user profile Read access to the Care Provider Searchable Field object.
- B. Create a sharing rule on the Care Provider Searchable Field object to share with external users.
- C. Use Experience Builder to add the Provider Search component to a page on the site.

- D. Give the site user profile Read access to the Data Pipeline object.

Answer: A,C

Explanation:
Comprehensive Detailed Step by Step Explanation with exact Extracts from Salesforce Health Cloud documents that you have with References
* Experience Builder and Component Access:
* Add the Provider Search component to the Experience Cloud site page for external user access.
* Extract:
"Use Experience Builder to add Provider Search components to your site to enable external users to search for providers."
-Provider Search in Experience Cloud
* Read Access:
* Granting Read access to theCare Provider Searchable Fieldobject is required for site users to access search results.
* Extract:
"Grant the site user profile Read access to the Care Provider Searchable Field object to allow them to view provider search results."
-Provider Search Security
* Other Options:
* B:Sharing rules not typically required; object-level access is key.
* D:Data Pipeline object access is not relevant for provider search results.
References:
Provider Search in Experience Cloud
