How to Prepare For CTAL-TM Certification Exam

Preparation Guide for CTAL-TM Certification Exam

Introduction to CTAL-TM Exam

Certified Tester Advanced Level Test Manager(CTAL-TM), This is a rigorous professional certification program based on exams. The CTAL-TM certification is offered to candidates who pass the Tester Advanced Level Test Manager(CTAL-TM) of the International Board of Software Testing Qualifications (ISTQB).

This ISTQB course is intended for testing professionals who want to excel in a management or lead role. In this course, students will learn how to administer a testing project and execute a risk-based technique for testing. Students will also be examining how a technique correlates with test estimation, monitoring, and planning. During this course, students will learn how to send report to stakeholders, build successful test teams and implement significant test plans

The creation of the ISTQB exams is the responsibility of the councils of each member country so that they better reflect the language, use and specific conditions of the country. Unlike other English-based ISTQB exams that you can find, ASTQB exams are created as original exams for English speakers, not translated from another language. US employers recognize this and have expressed their preference for evaluators who have passed the ASTQB ISTQB exams.

Our world-renowned subject matter experts have worked very hard to create the ASTQB versions of the ISTQB exams and we believe that our exams are of the highest quality, without difficult questions. This gives you a better exam experience.

ISTQB Test Manager certification takes aspirants career to the next level. This certification adds a grat value to candidates skills and demonstrates their commitment to the testing profession and lead others as a manager in the organization. Certified professionals are recognized as an expert in software testing, quality, and project management.

Under your guidance, the team profile is raised as more effective and efficient in testing by practicing methods and techniques included in the Test Manager Certification series.

An Advanced Test Manager would be able to :

- Propose a business case for test activities which outlines the costs and benefits expected.
- Participate in and lead test process improvement initiatives.
- Identify and plan necessary skills development within their test team.
- Organize and lead risk identification and risk analysis sessions and use the results of such sessions for test estimation, planning, monitoring and control.
- Ensure proper communication within the test team and with other project stakeholders.
- Continuously monitor and control the test activities to achieve project objectives.

ISTQB Certified Tester Advanced Level - Test Manager Sample Questions (Q59-Q64):

NEW QUESTION # 59
Which statement about defect management in hybrid software development is TRUE?

- A. When multiple teams are working in different development models, they will need to use different defect management tools
- B. When multiple teams are working to different development models, fixes should be aligned to a separate plan that reflects the characteristics of their development model
- C. Defect management meetings should be held more often by teams working in Agile ways than those working in sequential ways
- D. Defect management meetings should be held more often by teams working in sequential ways than those working in Agile ways

Answer: B

Explanation:
A hybrid approach often necessitates flexible planning across development models. Aligning defect fixes to the specific development characteristics ensures clarity and efficiency.
"The way in which defects are logged may vary depending on... the test level and the software development lifecycle model."
- ISTQB-CTFL_Syllabus_2018_V3.1, section 5.6

NEW QUESTION # 60

You are responsible for porting a performance testing tool to a new operating system. You are at what stage in the tool's lifecycle? [1]

- A. Evolution
- B. Support and Maintenance
- C. Retirement
- D. Acquisition

Answer: A

Explanation:
According to the tool lifecycle model, the evolution stage is when the tool is adapted to new requirements or environments, such as a new operating system. This stage involves modifying the tool to meet the changing needs of the users and the system. The evolution stage is followed by the retirement stage, when the tool is no longer used or supported. NEW QUESTION # 61
Which of the following product risks would be most effectively addressed just by static testing? 3 credits

- A. In the delivered application, one of the countries, as specified in the requirements, has not been correctly implemented.
- B. The application takes too long to process a request for additional cover.
- C. The test cases do not cover the key requirements.
- D. The successful bidder may not deliver all the required functionality on time.

Answer: C

NEW QUESTION # 62
You are a test team lead working on a large project and have been subject to considerable stress due to exceptional workload. Your manager has suggested that you need to delegate more work to your team members to both reduce the pressure on yourself and allow team members to take on more responsibility which would, in turn, benefit their growth. Which phase of the Tuckman model would this situational skill represent?

- A. Performing
- B. Norming
- C. Storming
- D. Forming

Answer: A

Explanation:
The "Performing" stage in the Tuckman model is characterized by high-performing teams that are well- organized, motivated, and able to manage and delegate responsibilities effectively. Delegation and enabling team member growth are signs of a mature and performing team. This corresponds to fostering autonomy and productivity, a key trait of the Performing stage.
Reference: Though not named explicitly in the syllabus, the Tuckman model is generally accepted in team dynamics and is a valid topic under leadership responsibilities of a test manager in ISTQB Advanced Test Manager context.

NEW QUESTION # 63
