Online Palo Alto Networks SecOps-Generalist Practice Test Engine Designed by Experts

The NewPassLeader product here is better, cheaper, higher quality and unlimited for all time; kiss the days of purchasing multiple Palo Alto Networks braindumps repeatedly, or renewing SecOps-Generalist training courses because you ran out of time. Now you can learn SecOps-Generalist skills and theory at your own pace and anywhere you want with top of the SecOps-Generalist braindumps, you will find it's just like a pice a cake to pass SecOps-Generalistexam.

Palo Alto Networks Security Operations Generalist Sample Questions (Q108-Q113):

NEW QUESTION # 108
Prisma SD-WAN allows administrators to define policies for different categories of applications, such as 'Voice & Video', 'Critical Business Apps', 'Bulk Transfer', and 'Default'. Which type of policy is used to define how traffic matching these application categories should be prioritized, managed, and steered across the available WAN links?

- A. Qos Policy
- B. Application Identification Policy
- C. Security Policy
- D. NAT Policy
- E. Path Policy

Answer: E

Explanation:
Prisma SD-WAN's Path Policy (sometimes also referred to as Business Intent Overlay or similar concepts in SD-WAN) is where the application categories are mapped to specific forwarding behaviors and link preferences. You define rules saying 'for Voice &

Video traffic, prefer paths with low jitter', 'for Bulk Transfer, use paths with high bandwidth', etc. Option A controls allow/deny/inspect. Option B prioritizes traffic on a link. Option C handles address translation. Option E is part of App-ID, which identifies the application, but doesn't define the pathing behavior.

NEW QUESTION # 109

When a remote user's device attempts to connect to a GlobalProtect Gateway, and the GlobalProtect policy requires a Host Information Profile (HIP) check, where is the result of this HIP check (whether the device is compliant with configured HIP profiles) typically logged?

- A. System logs
- B. Threat logs
- C. HIP Match logs
- D. Decryption logs
- E. Traffic logs

Answer: C

Explanation:
HIP checks generate dedicated logs. Option A logs session activity after policy match. Option B logs security threats. Option D logs system events. Option E logs decryption status. HIP Match logs specifically record the outcome of HIP checks performed by the GlobalProtect gateway, indicating which HIP profiles were matched or not matched, and the compliance status of the endpoint based on its reported attributes.

NEW QUESTION # 110

When remote users connect to Prisma Access via GlobalProtect, their traffic is directed through the cloud security platform. Which security zone is typically used to represent the source of traffic originating from these connected mobile users in Security Policy rules?

- A. The zone configured for the 'Remote Networks' in Prisma Access.
- B. The zone representing the public internet (e.g., 'Public' or 'Internet').
- C. The zone assigned to the user's home network interface.
- D. The zone assigned to the GlobalProtect Gateway interface.
- E. A dedicated 'Mobile-Users' zone in Prisma Access.

Answer: E

Explanation:
Prisma Access assigns traffic from mobile users connecting via GlobalProtect to a specific, dedicated zone for policy enforcement purposes. Option A refers to a zone on a self-managed firewall. Option B is for site-to-site VPNs. Option C is for the destination zone for internet traffic. Option E is the user's local physical interface, not relevant to the traffic flow through Prisma Access. Prisma Access uses the 'Mobile-Users' zone to logically segment traffic originating from connected remote users.

NEW QUESTION # 111

An organization has strict policies regarding employee access to certain types of websites, such as adult content, gambling, and illegal downloads. They are using Palo Alto Networks NGFWs with an Advanced URL Filtering subscription. Which configuration component on the firewall is used to define the actions (allow, block, alert, continue, override) that should be taken when a user attempts to access a URL belonging to a specific category?

- A. Data Filtering profile
- B. Security Policy rule's Action tab
- C. Threat Prevention profile
- D. URL Filtering profile
- E. Application Override policy

Answer: D

Explanation:
URL Filtering policies are defined within URL Filtering profiles. This profile specifies the action to take for each of the predefined

(and custom) URL categories. When a Security Policy rule includes a URL Filtering profile, the firewall evaluates the destination URL against the profile to determine the action. Option A defines the overall session action (allow/deny). Options C, D, and E are for different security functions.

NEW QUESTION # 112

An organization relies on Palo Alto Networks NGFWs (PA-Series and VM-Series) to protect against the latest threats. Which dynamic updates are MOST critical for ensuring these firewalls have the most current information to identify applications, detect known malware and vulnerabilities, and identify malicious websites?

- A. Threat Prevention updates (Antivirus, Vulnerability Protection, Anti-Spyware signatures)
- B. URL Filtering updates
- C. PAN-OS software updates
- D. App-ID updates
- E. WildFire updates

Answer: A,B,D,E

Explanation:
Dynamic content and threat updates are essential for maintaining security efficacy. - Option A: PAN-OS software updates provide new features, bug fixes, and security patches to the firewall operating system itself, but not the latest threat intelligence or application definitions. - Option B (Correct): App-ID updates provide definitions for new applications, changes to existing applications, and application function identities, ensuring the firewall can correctly identify and control the latest applications. - Option C (Correct): Threat Prevention updates deliver the latest signatures for detecting known malware, exploits, and spyware/C2 traffic. These are released frequently in response to new threats. - Option D (Correct): WildFire updates deliver verdicts and associated signatures from WildFire analysis of unknown threats, providing rapid protection against zero-day malware. - Option E (Correct): URL Filtering updates provide real-time categorization and threat status information for URLs, including newly identified malicious websites (phishing, malware hosting, C2). These updates ensure accurate web filtering and blocking of risky sites.

NEW QUESTION # 113

......

Once you have decided to purchase our SecOps-Generalist study materials, you can add it to your cart. Then just click to buy and pay for the certain money. When the interface displays that you have successfully paid for our SecOps-Generalist study materials, our specific online sales workers will soon deal with your orders. You will receive the SecOps-Generalist study materials no later than ten minutes. You need to ensure that you have written down the correct email address. Please check it carefully. If you need the invoice, please contact our online workers. They will send you an electronic invoice, which is convenient. You can download the electronic invoice of the SecOps-Generalist Study Materials and reserve it.

SecOps-Generalist Practice Exam Pdf: https://www.newpassleader.com/Palo-Alto-Networks/SecOps-Generalist-exam-preparation-materials.html

In addition, SecOps-Generalist test dumps of us have the most of the knowledge points, and you can improve your ability in the process of learning, Passing Palo Alto Networks SecOps-Generalist Certification Test Exam is just a piece of cake, ITCertMaster is the best choice which can help you to pass the Palo Alto Networks SecOps-Generalist Practice Exam Pdf certification exams, it will be the best guarantee for your exam, The SecOps-Generalist questions & answers are edited and verified by our IT professional experts with decades of IT experience.

The candidates will learn how to initiate project activities, SecOps-Generalist Practice Exam Pdf Applying window functions to answer more sophisticated questions, and gain deeper insight into your data.

In addition, SecOps-Generalist Test Dumps of us have the most of the knowledge points, and you can improve your ability in the process of learning, Passing Palo Alto Networks SecOps-Generalist Certification Test Exam is just a piece of cake!

High Pass Rate SecOps-Generalist Study Materials Tool Helps You Get the SecOps-Generalist Certification
