PSPO-I Exam is designed to test not only knowledge of Scrum but also the ability to apply Scrum principles in real-world scenarios.

## Scrum Professional Scrum Product Owner I Sample Questions (Q22-Q27):

### NEW QUESTION # 22

What are three advantages of a Product Owner sharing a clearly defined Product Goal with the Scrum Team?  
(choose the best three answers)

- A. It provides a good overall direction so Sprints will feel less like isolated pieces of work.
- B. It helps the Scrum Team keep focus and they can weigh any decision against the Product Goal
- C. It is not mandatory in Scrum. There is no real advantage.
- D. It helps the Developers estimate the date that the Product Backlog will be complete.
- E. It is easier to inspect incremental progress at the Sprint Review.

**Answer: A,B,E**

Explanation:

Explanation

The advantages of a Product Owner sharing a clearly defined Product Goal with the Scrum Team are:

\* It provides a good overall direction so Sprints will feel less like isolated pieces of work. The Product Goal is a long-term objective for the product that guides all the activities of the Scrum Team. It helps the Scrum Team align their efforts and focus on delivering value that contributes to the product vision.

\* It helps the Scrum Team keep focus and they can weigh any decision against the Product Goal. The Product Goal serves as a filter for deciding what to work on and what not to work on. It helps the Scrum Team prioritize and optimize their work based on value and impact.

\* It is easier to inspect incremental progress at the Sprint Review. The Sprint Review is an event where the Scrum Team and the stakeholders collaborate on the product and inspect how it meets the Product Goal. The Increment is a concrete and usable outcome of the Sprint that provides a measure of progress towards the Product Goal.

Other options, such as helping the Developers estimate the date that the Product Backlog will be complete or being not mandatory in Scrum, are not valid advantages of having a Product Goal. They may reflect a misunderstanding of what a Product Goal is or how Scrum works.

- \* [Scrum Guide], page 10, section "Increment"

### NEW QUESTION # 23

The job of a Product Owner focuses on the following:  
(choose the best two answers)

- A. Working with customers and stakeholders to identify the most valuable product requirements.
- B. Clearly communicating project or release status and strategies to customers and stakeholders.
- C. Being with the Scrum Team all the time, just in case they need me to clarify a requirement.
- D. Writing clear, transparent User Stories.

**Answer: A,B**

Explanation:

The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team. The Product Owner is responsible for managing and refining the Product Backlog, collaborating with the stakeholders and the Developers, and

ordering the items in a way that best achieves goals and missions. The Product Owner represents the interests of everyone with a stake in the product and ensures that the Scrum Team works on the right things at the right time.

The job of a Product Owner focuses on the following aspects:

Working with customers and stakeholders to identify the most valuable product requirements: The Product Owner engages in frequent and regular interactions with the people who have a stake or interest in the product, such as customers, users, sponsors, managers, or other teams. The Product Owner solicits and incorporates their input, feedback, and insights to understand their needs and expectations, discover new opportunities or ideas, align and collaborate on the product direction and priorities, and validate and deliver value to them. The Product Owner translates these requirements into Product Backlog items that can deliver value to customers or users.

Clearly communicating project or release status and strategies to customers and stakeholders: The Product Owner communicates effectively and transparently with the customers and stakeholders about the progress, outcomes, and plans of the product development. The Product Owner shares relevant information and data about the product vision, goals, value proposition, roadmap, backlog, increment, feedback, or metrics. The Product Owner also communicates the strategies and decisions for delivering value to customers or users, such as release frequency, scope, quality, or risk management.

The other options are not valid or relevant aspects of a Product Owner's job. They are either too narrow, unrealistic, or unrelated to the product value delivery. They are:

Writing clear, transparent User Stories: This is not a valid aspect of a Product Owner's job. User Stories are a common format for expressing product requirements in an agile way. They consist of a brief description of a feature or function from the perspective of a user or customer. They usually follow a template such as "As a <role>, I want <goal>, so that <benefit>". However, User Stories are not mandatory or universal in Scrum. The Product Owner can use any format or method to express product requirements, as long as they are clear, concise, and valuable. The format or method does not affect the value or quality of the product or service delivered.

Being with the Scrum Team all the time, just in case they need me to clarify a requirement: This is not a realistic aspect of a Product Owner's job. The Product Owner does not have to be physically present with the Scrum Team all the time. The Product Owner can work remotely or asynchronously with the Scrum Team, as long as they maintain effective communication and collaboration. The Product Owner should also empower and trust the Developers to make technical decisions and trade-offs that best meet the product goals and quality standards. The Product Owner should also ensure that the Product Backlog items are sufficiently clear and refined before they are selected for a Sprint.

#### NEW QUESTION # 24

True or False: The Product Owner makes sure the Developers select enough from the Product Backlog for a Sprint to satisfy the stakeholders.

- A. True
- B. False

**Answer: B**

Explanation:

The Product Owner does not make sure the Developers select enough from the Product Backlog for a Sprint. The Product Owner is responsible for maximizing the value of the product and the work of the Developers, but the Developers are self-managing and decide how much work they can do in a Sprint<sup>1</sup>. The Product Owner and the Developers collaborate on the scope of the Sprint during Sprint Planning, but the final decision is up to the Developers<sup>2</sup>. The Product Owner should not interfere with the Developers' work during the Sprint, but should provide feedback and guidance on the product value<sup>[3][3]</sup>.

#### NEW QUESTION # 25

Following Scrum various practices are allowed to forecast the Sprint progress, like burn-downs, burn-ups, or cumulative flows.

- A. FALSE
- B. TRUE

**Answer: B**

**NEW QUESTION # 26**

Which statement is not correct about the Scrum Daily?

- A. It should be held at the same time and place.
- **B. It is moderated by the Scrum Master.**
- C. The developers have to participate in the meeting.
- D. It is a time boxed event (15 min).

**Answer: B**
