

PEGACPRSA22V1 Accurate Prep Material - PEGACPRSA22V1 Training Pdf

BONUS!!! Download part of DumpsTests PEGACPRSA22V1 dumps for free: https://drive.google.com/open?id=1CuNkNz2d9C8q0fZehgV_iVPp1UO_hDCe

Our PEGACPRSA22V1 exam questions can meet your needs to the maximum extent, and our PEGACPRSA22V1 learning materials are designed to the greatest extent from the customer's point of view. So you don't have to worry about the operational complexity. As soon as you enter the learning interface of our system and start practicing our PEGACPRSA22V1 Learning Materials on our Windows software, you will find small buttons on the interface. These buttons show answers, and you can choose to hide answers during your learning of our PEGACPRSA22V1 exam quiz so as not to interfere with your learning process. Every aspect is perfect.

We are a certification exam dumps website that meets the needs of many IT workers who are going to participate in the Pegasystems PEGACPRSA22V1 real exam. Our colleagues will always check the updating of PEGACPRSA22V1 practice questions and the similarity of real question is almost 100%. It will be not difficult for candidates to clear PEGACPRSA22V1 Exam Braindumps if they are good at considering and conclude except practicing PEGACPRSA22V1 dumps pdf.

PEGACPRSA22V1 Training Pdf - Authentic PEGACPRSA22V1 Exam Hub

We are concentrating on the reform on the PEGACPRSA22V1 exam material that our candidates try to get aid with. We own the profession experts on compiling the PEGACPRSA22V1 practice questions and customer service on giving guide on questions from our clients. Our PEGACPRSA22V1 Preparation materials contain three versions: the PDF, the Software and the APP online. They give you different experience on trying out according to your interests and hobbies. And they can assure your success by precise information.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q43-Q48):

NEW QUESTION # 43

A service request manager, who responds to 1000 active service tickets per week, receives a ticket for new account creation. This ticket has been marked as the highest priority and contains all the necessary details for an account creation. The manager creates an activity and assigns all the context values with appropriate values. Which two activity methods of the account creation ticket can be used to close the ticket within priority? (Choose two.)

- A. Start
- B. StartNowAndWait
- C. StartNow
- D. StartAndWait

Answer: A,D

NEW QUESTION # 44

Which three of the following characterize automatic step creation? (Choose Three)

- A. Displays a blue Gear icon.
- B. Automatically available for applications that X-ray Vision supports.
- C. Available for previously interrogated application controls.
- D. Usable at any time by clicking the Gear icon.
- E. Automatically used for applications that X-ray Vision does not support.

Answer: A,B,C

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

Automatic Step Creation is a Pega Robot Studio feature that allows developers to automatically generate automation steps based on actions performed in an interrogated application. It leverages X-ray Vision for supported applications to intelligently detect UI elements and generate corresponding steps without requiring manual drag-and-drop logic creation.

According to the Pega Robotics System Design and Implementation Guide, section "Using Automatic Step Creation and X-ray Vision":

"Automatic Step Creation simplifies automation building by detecting user interactions in X-ray Vision- supported applications and automatically adding the equivalent automation steps to the design surface.

* A blue gear icon indicates that automatic step creation is active and available.
* Automatic step creation works with previously interrogated application controls.
* The feature is automatically available for applications that X-ray Vision supports.
* For applications not supported by X-ray Vision, developers must manually create steps using traditional interrogation." Detailed Reasoning:

* B. Displays a blue Gear icon.
* Correct. When automatic step creation is active, the blue gear icon indicates the feature is enabled and ready to record actions.
* D. Available for previously interrogated application controls.
* Correct. Automatic step creation can only generate steps for controls that have already been interrogated, ensuring proper mapping between actions and UI elements.
* E. Automatically available for applications that X-ray Vision supports.
* Correct. The feature activates automatically in X-ray Vision-supported applications, which include modern UI frameworks like HTML5 and WPF.

Incorrect Options:

* A. Automatically used for applications that X-ray Vision does not support.
* Incorrect. It only works for applications supported by X-ray Vision.
* C. Usable at any time by clicking the Gear icon.
* Incorrect. The gear icon appears only when automatic step creation is available, not universally across all projects.

Final Correct answer: B, D, E

Reference:Extracted and verified from Pega Robotics System Design and Implementation Guide, Automatic Step Creation and X-ray Vision Integration section (Pega Robotics 19.1 and later).

NEW QUESTION # 45

You are designing an attended project for a banking customer. This project requires you to add new customers from an application to a combo box in a custom user surface.

Which steps do you take to gain access to the methods of the combo box items within an automation?

- A. Select the combo box in the Palette tab of an automation, and then filter for the method that you want to access in the properties grid.
- B. Select the combo box in a design form of the user interface to open the Select action window.
- **C. Drag the combo box to the automation surface to open the Select action dialog box, and then filter for the method that you want to access.**
- D. Open the Globals tab, filter for the method that you want to access, and then drag the method to the design surface.

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

When working with UI controls such as combo boxes in a custom user interface (Windows form or User Interaction form), you can expose their methods and events by dragging the control from the Palette or Object Explorer to the automation design surface. According to the Pega Robotics System Design and Implementation Guide, section "Accessing Control Methods and Properties in Automations":

"To access a control's methods or events in an automation, drag the control (such as a combo box or text box) from the Object Explorer or Palette to the automation surface.

The Select Action dialog box appears, allowing you to filter and choose the specific method or event (for example, AddItem, RemoveItem, or Clear)." Detailed Reasoning:

- * A. Drag the combo box to the automation surface... - Correct. This opens the Select Action dialog, exposing all available methods and events for that control.
- * B. Open the Globals tab... - Incorrect. The combo box methods are not global; they belong to a specific UI form.
- * C. Select the combo box in a design form... - Incorrect. This action edits UI layout, not automation logic.
- * D. Select the combo box in the Palette tab... - Incorrect. The properties grid shows attributes, not callable methods.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Using Control Methods and Events in Automations section (Pega Robotics 19.1 and later).

NEW QUESTION # 46

While interrogating a web application, you come across a hidden menu item: AddressType. The AddressType menu item activates when the pointer hovers over the control; the menu displays a drop-down list.

How do you interrogate this hidden drop-down list control?

- A. Choose HTML Table Editor from the Interrogation Form dialog box.
- B. Choose Select Element from the Interrogation Form dialog box.
- C. Access the Virtual Controls tab on the adapter tab.
- **D. From the Web Controls tab, select the browser and frame, then select List Web controls.**

Answer: D

Explanation:

References:

NEW QUESTION # 47

Your Pega Robot Manager indicates that one of your robots has an unhealthy status and has failed several assignments.

What is the first step in troubleshooting an unhealthy robot?

- A. Open the Developer Toolbar and use the Tracer to review a log of all the robot's actions.
- B. Open the Developer Toolbar and use the Clipboard tool to review the data available in the pyWorkPage.
- C. Confirm that the File Publisher Diagnostics settings are enabled and review a run-time log of all the robot's actions.
- **D. Modify the File Publisher Diagnostics settings to review a studio log of all the robot's actions.**

Answer: D

NEW QUESTION # 48

.....

For candidates who will buy the PEGACPRSA22V1 learning materials online, they may pay more attention to the safety of their

money. We adopt international recognition third party for your payment for the PEGACPRSA22V1 exam braindumps, and the third party will protect interests of yours, therefore you don't have to worry about the safety of your money and account. In addition, PEGACPRSA22V1 Learning Materials of us are famous for high-quality, and we have received many good feedbacks from buyers, and they thank us for helping them pass and get the certificate successfully.
