Dear everyone, are you still confused about the SAFe-Practitioner exam test. Do you still worry about where to find the best valid Scrum SAFe-Practitioner exam cram? Please do not search with aimless. ExamcollectionPass will drag you out from the difficulties. All the questions are edited based on lots of the data analysis by our IT experts, so the authority and validity of Scrum SAFe-Practitioner Practice Test are without any doubt. Besides, SAFe-Practitioner training dumps cover almost the key points, which can ensure you pass the actual test with ease. Dear, do not hesitate anymore. Choose our ExamcollectionPass Scrum exam training test, you can must success.

Earning the Scrum SAFe-Practitioner certification provides several benefits to individuals seeking to advance their career in agile software development. SAFe Practitioner Exam (6.0) certification demonstrates an individual's knowledge and expertise in SAFe principles and practices, making them a valuable asset to any organization. Certified individuals are also eligible for better job opportunities and higher salaries compared to their non-certified peers. Furthermore, the certification is recognized globally and opens opportunities for individuals to work with clients worldwide who value agile software development methodologies.

Scrum SAFe-Practitioner (SAFe 5 Practitioner (SP)) Exam is a certification exam that focuses on the implementation of the Scaled Agile Framework (SAFe) in organizations. SAFe is a widely used framework for large-scale software development and product delivery, and is designed to help organizations improve their software development and delivery processes. The SP Exam is designed for individuals who are seeking to demonstrate their knowledge and understanding of SAFe and its implementation.

Latest SAFe-Practitioner Dumps Sheet, SAFe-Practitioner Valid Mock Test

You may bear the great stress in preparing for the SAFe-Practitioner exam test and do not know how to relieve it. Dear, please do not worry. ExamcollectionPass SAFe-Practitioner reliable study torrent will ease all your worries and give you way out. From ExamcollectionPass, you can get the latest Scrum SAFe-Practitioner exam practice cram. You know, we arrange our experts to check the latest and newest information about SAFe-Practitioner Actual Test every day, so as to ensure the SAFe-Practitioner test torrent you get is the latest and valid. I think you will clear all your problems in the SAFe-Practitioner actual test.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q222-Q227):

NEW QUESTION # 222

When is the System Demo conducted during program execution?

- A. Each week
- B. When the System Team is ready
- C. Only when all the stakeholders are available
- **D. At the end of every Iteration**

Answer: D

Explanation:

System Demo is a critical event that provides stakeholders an integrated view of the new features delivered by the Agile Release Train (ART) over the past iteration. It offers the ART a fact-based measure of current, system-level progress within the Program Increment (PI). It also enables fast feedback and learning cycles, which help the ART build the right solution and improve quality. The System Demo takes place as close to the end of the iteration as possible, ideally the next day. It requires implementing the scalable engineering practices necessary to support Continuous Integration across the ART12. References: System Demo - Scaled Agile Framework, Sample Test: SAFe Practitioner - scaledagile.com

NEW QUESTION # 223

What is the purpose of the Team Sync?

- **A. To coordinate daily work**
- B. To identify Iteration goals
- C. To make announcements to the entire ART
- D. To identify ART PI risks

Answer: A

Explanation:

n: The Team Sync is a short meeting (usually 15 minutes or less), typically held about daily, to inspect progress toward the team goals, communicate, and adjust upcoming planned work1. The Team Sync helps the team members align their activities, identify and resolve impediments, and collaborate effectively. The Team Sync is also an opportunity to share information, celebrate achievements, and foster team spirit. The other options are incorrect because:

* A. The Team Sync is not the place to identify ART PI risks. Risks are identified and managed at the Program level, using the ROAM board and other tools2.

* C. The Team Sync is not the place to identify Iteration goals. Iteration goals are defined and agreed upon during the Iteration Planning event, which happens at the beginning of each Iteration3.

* D. The Team Sync is not the place to make announcements to the entire ART. The Team Sync is a team-level event, where only the team members and the Scrum Master participate. Announcements to the entire ART are made during the ART Sync, which is a program-level event that happens weekly or biweekly4. References: 1: Team Sync - Scaled Agile Framework, 2: Program Risks - Scaled Agile Framework, 3: Iteration Planning - Scaled Agile Framework, 4: ART Sync - Scaled Agile Framework

NEW QUESTION # 224

During the final plan review, ART PI risks are ROAM'ed. What do the letters in ROAM represent?

- A. Resolved, Owned, Assigned, Mitigated
- B. Resolved, Owned, Active, Mitigated
- C. Resolved, Owned, Accepted, Mitigated
- D. Resolved, Owned, Approved, Mitigated

Answer: C

Explanation:

ROAM is an acronym that stands for Resolve, Own, Accept, and Mitigate, and it is a framework for making risks visible and actionable in SAFe. During the final plan review, teams present their PI plans and risks to the other teams and stakeholders, and then use the ROAM board to categorize and prioritize the risks. Resolved risks are no longer a threat, owned risks are assigned to a team member for further action, accepted risks are acknowledged but not addressed, and mitigated risks are reduced by a plan. ROAM helps teams collaborate and align on how to handle risks effectively and transparently. References: SAFe Roam Board for Risk Management | Miro, Managing Risks with ROAM in Agile - Planview Blog

NEW QUESTION # 225

What is the role of the System Architect/Engineer?

- A. To define the design for the system
- B. To guide the teams and support the Architectural Runway
- C. To implement continuous improvement methods
- D. To manage dependencies

Answer: B

Explanation:

The role of the System Architect/Engineer in SAFe is to guide the teams and support the Architectural Runway, which is the existing code, components, and technical infrastructure needed to implement near-term features without excessive redesign and delay. The System Architect/Engineer defines and communicates the technical and architectural vision for the solutions developed by an Agile Release Train (ART), ensuring that they fit the intended purpose and align with the enterprise and solution architecture. The System Architect

/Engineer also collaborates with various roles, teams, and stakeholders within and outside the ART to ensure that the system architecture supports the evolving business needs and enables fast and reliable implementation. References: System Architect/Engineering - Scaled Agile Framework, Architectural Runway - Scaled Agile Framework

NEW QUESTION # 226

Which of the below are not part of the CALMR approach to DevOps?

- A. Automation
- B. Large batches
- C. Measurement
- D. Culture

Answer: B

NEW QUESTION # 227

.....

Many candidates who take the qualifying exams are not aware of our SAFe-Practitioner exam questions and are not guided by our systematic guidance, and our users are much superior to them. In similar educational products, the SAFe-Practitioner quiz guide is absolutely the most practical. Also, from an economic point of view, our SAFe-Practitioner Exam Guide Materials is priced reasonable, so the SAFe-Practitioner test material is very responsive to users, user satisfaction is also leading the same products. You can deeply depend on our SAFe-Practitioner exam guide materials when you want to get the qualification.
