COBIT-2019學習指南 - COBIT-2019最新試題

COBIT-2019 認證題庫讓你順利高分甚至滿分通過 COBIT-2019 考試, 短時間取得應該取得 ISACA 證照。Testpdf 题库网承诺, 只要使用本网站的题库去参加 COBIT-2019 认证考试, 我们确保你能一次通过 ISACA 的 COBIT-2019 考试, 否则退还购买题库的所有费用。同时, 网站会根据考试认证厂商的动态变化而及时更新, 确保 COBIT-2019 题库始终是最新最全的。

最新的 COBIT Foundation COBIT-2019 免費考試真題 (Q61-Q66):

問題 #61

Which of the following is a PRIMARY objective of reviewing the effectiveness of a new IT governance system that has been operational for 6 months?

- A. Identifying further governance requirements
- B. Evaluating business performance reports
- C. Obtaining executive management support for IT governance

答案: A

解題說明:

The primary objective of reviewing the effectiveness of a new IT governance system that has been operational for 6 months is to identify further governance requirements. An IT governance system is a set of components that provide direction, oversight, evaluation, monitoring, assurance, etc., for an enterprise's information and technology. The effectiveness of an IT governance system can be reviewed using different methods or tools, such as audits, assessments, surveys, feedbacks, etc. The primary objective of reviewing the effectiveness of a new IT governance system that has been operational for 6 months is to identify further governance requirements that may arise from changes in the internal or external environment, stakeholder needs, business objectives, etc.¹² References: COBIT 2019 Framework: Introduction and Methodology, COBIT 2019 Implementation Guide: Implementing an Information and Technology Governance Solution

問題 #62

When refining the scope of a new IT governance system during the design phase, which of the following is the MOST significant driver to be considered?

- A. The size of the enterprise
- B. National or international locations
- C. Cloud versus on-premises services

答案： C

解題說明：

Explanation

According to the COBIT 2019 Implementation Guide: Implementing an Information and Technology Governance Solution, one of the most significant drivers to be considered when refining the scope of a new IT governance system during the design phase is cloud versus on-premises services. This driver reflects the different delivery models of I&T services, such as software as a service (SaaS), platform as a service (PaaS), infrastructure as a service (IaaS) or on-premises solutions. The choice of delivery model has implications for governance objectives, roles, responsibilities, policies, processes, controls, risks and performance measures.⁵, p. 40-41 References: 5: COBIT 2019 Implementation Guide: Implementing an Information and Technology Governance Solution

問題 #63

When is the BEST time to acquire or develop solutions for implementing process improvement projects defined by the EGIT implementation program plan?

- A. When defining the EGIT Implementation road map
- B. When defining potential implementation problems and opportunities
- C. When executing the EGIT implementation program plan
- D. When developing the EGIT implementation program plan

答案： D

解題說明：

According to the COBIT 2019 Official Manual, it is best to acquire or develop solutions for implementing process improvement projects when the EGIT implementation program plan is being developed. This allows the implementation plan to take into account any solutions or technologies that are required to support the process improvement projects. Acquiring or developing solutions should not be done when defining the EGIT implementation roadmap or when defining potential implementation problems and opportunities, as these do not involve the actual implementation of the program plan. Solutions should be acquired or developed when executing the EGIT implementation program plan, as this is when the actual implementation of the program plan takes place.

問題 #64

Time-to-market is a market that is directly related to which of the following enterprise goals?

- A. Portfolio of competitive products and services
- B. Optimization of internal business process functionality
- C. Managed digital transformation programs

答案： A
